

Graphic Recording and Organizing of Facilitated Sessions

This training module was
designed by ICA Colleagues
Jim Troxel and Karen Snyder
when they were adjunct
faculty at DePaul University's
School for New Learning.
Circa 2000.

Knowledge Visualization

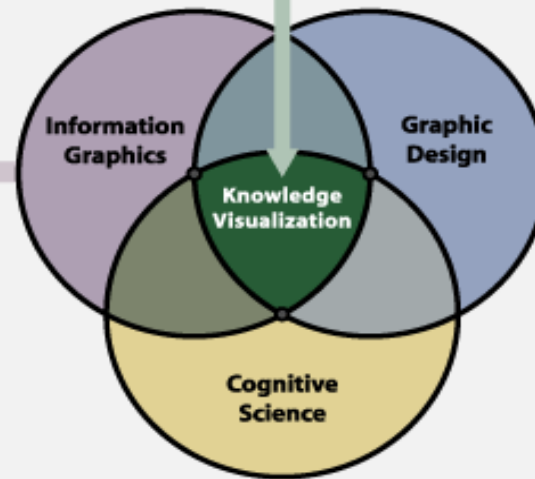

the visual explication of *conceptual* knowledge - is based on:

- Understanding the Domain Knowledge
- Applying Cognitive Principles
- Exploiting the Visual Parameters
- Encoding Salient Features Graphically
- Providing a Useful Process
- Producing Useful Output

Information Graphics

Visualizing quantitative information with graphs and diagrams, such as:

- Node-Link Diagrams
- Data Graphing
- Scientific Visualization
- Technical Illustration

The rich legacy of knowledge and techniques developed in art and illustration. Hard-won lessons of aesthetics and communication essential to exploiting the full power of visual representation.

Graphic Arts

The cognitive science relevant to knowledge elicitation, integration, and communication, and the cognitive processes underlying perception, categorization, visual and propositional reasoning, communication, creativity, and motivation.

Cognitive Science

8. CHURN, Baby, CHURN

There is no excuse for perpetuating a crappy state. 10/20/30

A REVOLUTION IS A PROCESS

7. Let A HUNDRED FLOWERS BLOSSOM

People you didn't anticipate are buying your products. People either REJECT innovation, or they PERFECT IT.

Take the money. perfection is good. find out why they love it!

Don't try to convert those who worship a false god.

BREAK

7:00pm - 9:00pm

Team Building
Activity

FRIDAY

8:30am - 10:00am

Leveraging and
Aligning Our Efforts

10:00am - 11:00am

Recaps and
Agreements

11:00am - NOON

Closing

OUTCOMES

- ▶ Concrete sense of how Team will work together and treat each other in doing the 'work'
- ▶ Commitment and clear next steps for developing and nurturing a culture of inquiry, learning informed decision-making and continuous improvement.
- ▶ Collective understanding of the continuum along which change process occurs and agreement on key indices of progress towards realistic outcomes
- ▶ Articulation of key priorities and strategies for FY2008 and programmatic and operational implications.
- ▶ Next steps and conversations identified and prioritized

THE DISCIPLINES OF THE LEARNING ORGANIZATION

	SYSTEMS THINKING	PERSONAL MASTERY	MENTAL MODELS	SHARED VISION	TEAM LEARNING
Description	allows for the seeing of wholes and interrelationships rather than static snapshots. It is the process of removing boundaries within an organization and understanding its complexities. Its goal is to help people avoid the overwhelming feeling of resignation and victimization that they can't make a difference.	is the discipline of continually clarifying and deepening ones personal vision, of focusing ones energies, of developing patience, and of seeing reality more objectively. Rooted in Eastern and Western spiritual traditions, mastery is the way of connecting personal learning with organizational learning.	are deeply ingrained assumptions, generalizations, and images of the world, of the organization, and oneself that influence how we understand how things function. This discipline is the act of discovering those unconscious mindsets and opening them up to conscious change.	binds people around a common identity and sense of destiny. A genuine vision causes people to do things because they want to, not because they have to. Vision builders uncover pictures of the future that are common to all members and inspire commitment.	is a tool for raising the collective intelligence quotient of an organization above that of anyone in it. This discipline includes dialogue as a group and overcoming defensiveness that undermines group learning. Teams are the fundamental learning unit within an organization.
Principles	<ol style="list-style-type: none"> 1. holism 2. interconnectedness 3. leverage 4. structure influences behavior 	<ol style="list-style-type: none"> 1. connectedness 2. generativity 3. vision 4. structural tension vs. emotional tension 	<ol style="list-style-type: none"> 1. love of truth 2. openness 3. espoused theory vs. theory-in-use 4. ladder of inference 5. balancing inquiry and advocacy 	<ol style="list-style-type: none"> 1. commonality of purpose 2. partnership 3. shared vision as a hologram 4. built on individual visions 	<ol style="list-style-type: none"> 1. collective intelligence 2. alignment 3. "dia-logos" 4. integrate dialogue and discussion
Skills	<ol style="list-style-type: none"> 1. systems archetypes 2. simulation 3. intuitive sense 	<ol style="list-style-type: none"> 1. clarifying personal vision 2. making choices 3. current reality balanced with future vision 	<ol style="list-style-type: none"> 1. testing assumptions 2. planning as learning 3. distinguishing data from generalizations 	<ol style="list-style-type: none"> 1. visioning process 2. acknowledging current reality 3. listening to others 4. art of facilitation 	<ol style="list-style-type: none"> 1. suspending assumptions 2. surfacing one's defensiveness 3. "practicing"

Team Basics Chart

The Five Dysfunctions of a Team

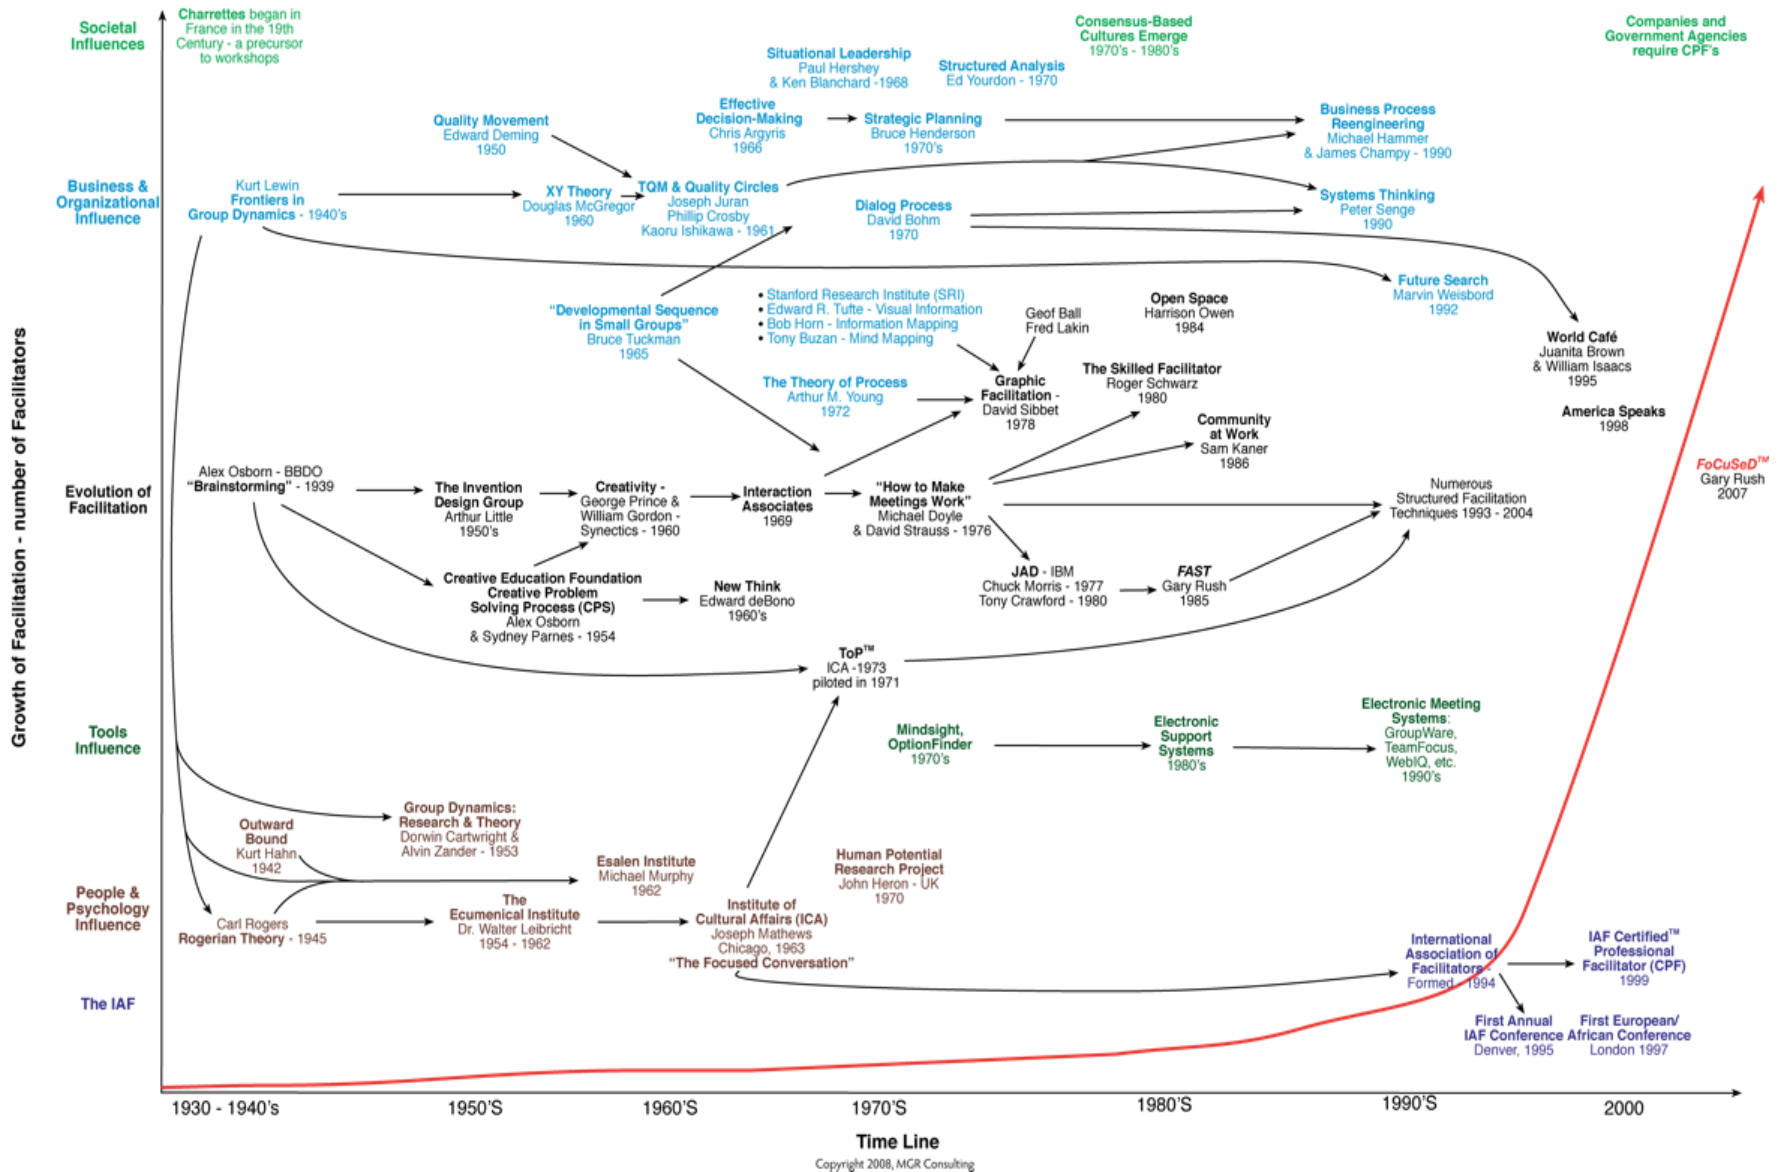

ADDRESSING THE DYSFUNCTIONS OF TEAMS

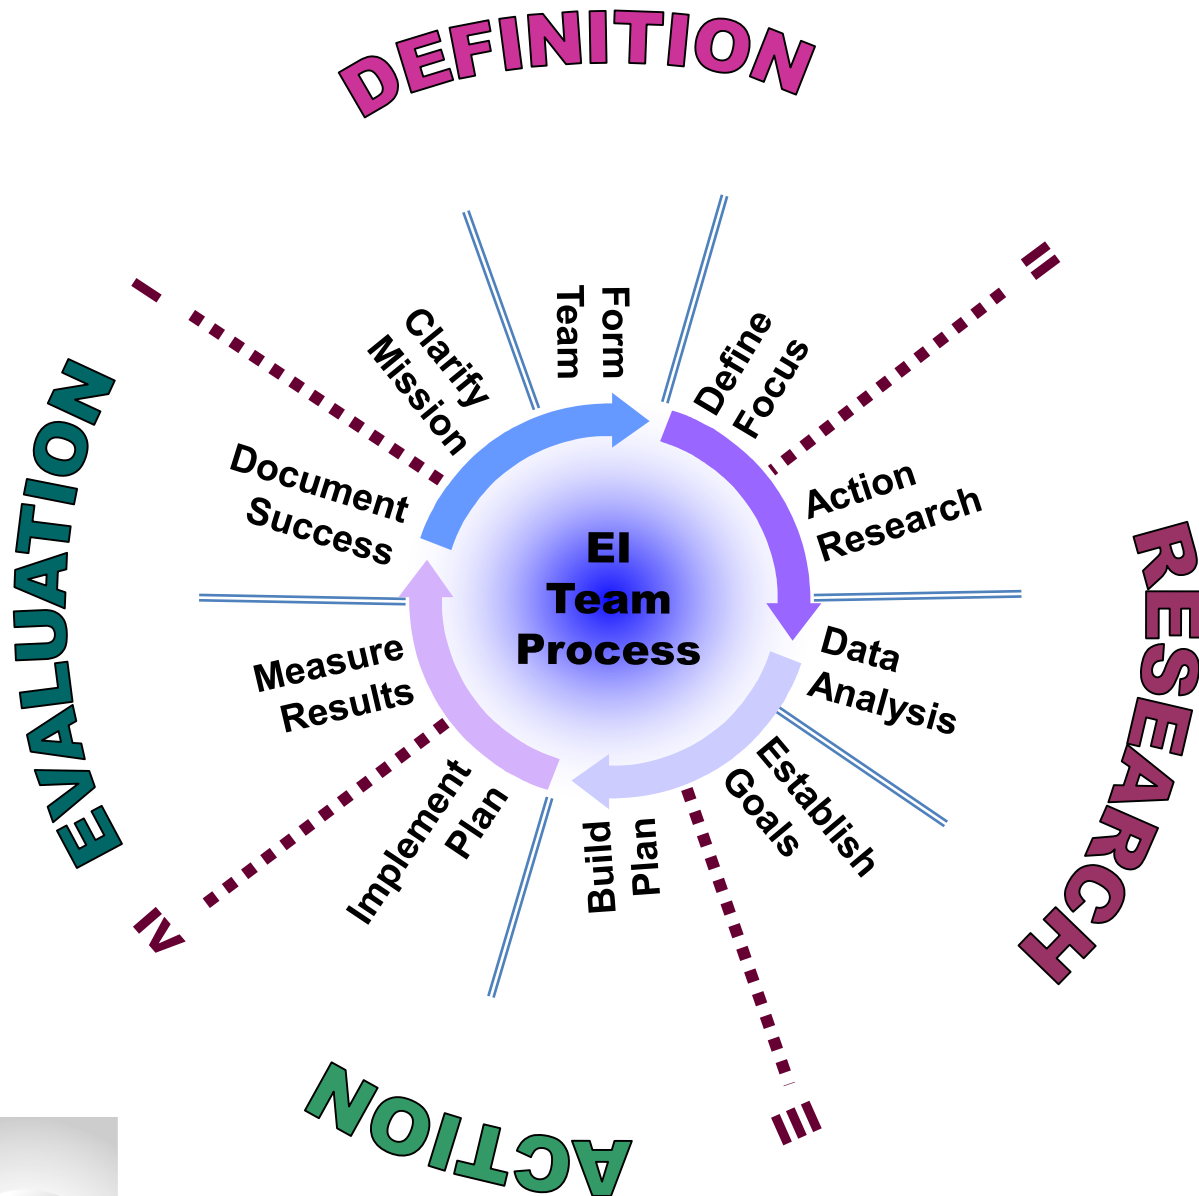

Dysfunction	Absence of Trust	Fear of Conflict	Lack of Commitment	Avoidance of Accountability	Inattention to Results
Description	Weaknesses concealed Hesitation to ask for and give help Conclusion-jumping Failure to use others' skills Meetings dreaded	Boring meetings Internal politics thrive Controversial topics ignored Fail to tap into opinions Posturing	Ambiguous direction and priorities Consensual over-emphasis Revisiting previous decisions Windows of opportunity close	Mediocrity tolerated Deadlines missed Over-reliance upon team leader Varying standards of performance tolerated	Fail to grow Stagnate Achievement-oriented employees leave Over-emphasis on Individual careers and goals
How to Address	Admit vulnerabilities Ask for help Accept questioning Give benefit of doubt Appreciate one another	Lively, interesting meetings Extract team members' ideas Solve problems quickly Minimize politics Put critical issues on table	Clarity about direction and priorities Align team around objectives Learn from mistakes Take advantage of opportunities	Pressure poor performers Question unhesitatingly Expect high standards Avoid excessive bureaucracy	Retain best employees Minimize individualistic behavior Avoid distractions Celebrate success Feel failure
Methods	Personal histories exercise Personality profiles 360-degree feedback	Mining Real-time permission	Cascading messaging Deadlines Worst-case scenario analysis	Publication of goals and standards Regular progress reviews Team rewards	Public declaration of results Results-based rewards
Role of the Leader	Demonstrate vulnerability and do not punish vulnerability of team members	Avoid premature interruption of disagreements Allow resolution to occur naturally, however messy	Be comfortable with making a decision that turns out to be wrong Constantly push for closure on issues	Allow the team to serve as primary accountability mechanism Serve as ultimate arbiter of discipline	Set the tone for a focus on results Be selfless, objective, reserve awards for those who deserve it
