THE SOCIAL FORM OF THE GUILD

LEGEND:

-  NETWORK
-  SYSTEM
-  PRIMAL

IMAGE
ANNOTATION

The
Network

The Global Interchange Base Centrum and extended forces on assignment who serve as research network, edge experimental force, and strategic planning corps on behalf of all primal guilds.

The Practical Strategy Exchange Base Centrum coordination of application of strategic models, enabled by global research assemblies. The corporate residue of this structure is common vision.

The Global Research Network Ongoing Base Centrum data-gathering and dissemination, coupled with gestalting of primal and system guild research results. The corporate residue of this structure is common methods.

The
System

The Decision Coordination Cell A small group of leadership representing all guilds in the region and representing the Religious House--responsible for accountability and absolution of the primal guilds, visioning, broad strategy, and coordination of resource usage across the primal guilds in the region.

The Guildsman Training Construct Areal office that coordinates and runs the scheduling and teaching of guildsman training events.

The Mass Impact Force A small group responsible for LENS marketing strategy, LENS followup planning, and the linking together of guildsmen across a region.

The
Primal

The Problem Solving Unit A gathering of diversely-covenanted guilders to research the needs and plan the future of the parish in relation to a delineated problem arena and in a delimited space of time. Participation shifts from PSU to PSU.

The Task Force A force of guilders who, regardless of their formal relationship to the guild, perform specific missional tactics. A primal guild is comprised of a series of task forces of shifting composition.

The Task Force Arenas Problem solving Units and Task Forces focus their efforts into four general arenas:

The Grassroots Mobilization Force Parish penetration and recruitment strategizing.

The Demonstration Awakenment Lab LENS marketing, special method courses, general local training events and course followup, all at the parish level.

The Community Celebration-Event Forms Care for the spirit life of the community, particularly through community symbols, symbolic events, and celebrations.

The Comprehensive Care Design Model-building and tactical actualization toward the end of creating adequate social structures for all persons in the parish.

RESEARCH SUMMARY: FORM OF THE GUILD

OPERATING
PRINCIPLES

1. Local guild initiation shall be co-ordinated with Global Movement priorities.
2. Implementation of the cell is the first step in implementing the Guild.
3. The Guild is a vehicle for the Local Church to act out its parish tactics.
4. The basic staging area for the Guild is at the Metro level.
5. The Guild is first of all a missional activity and only secondarily a sociological form.
6. The Guild is implemented with authorization from community leaders.
7. The Primal Guild is implemented initially in a parish with Galaxy affiliation.
8. Guild membership will be initially composed of Galaxy colleagues, Regional colleagues, and LENS graduates.
9. All North American Galaxies shall initiate a primal Guild by January 1, 1974.
10. Procedure for Guild implementation includes LENS, NSV-5, and Leadership Recruitment PSU's.

IMPLICATIONS

Theoretical
Clarity

1. Immediate refinement of NSV 5-Day course for teaching by Winter Quarter.
2. Regions and Galaxies conduct PSU's for study of S'73 Guild Implementation Models.
3. Base Centrum refinement of Guild Implementation Time-Line.
4. Study of practical relationships among: Metro Cell, Metro Catalytic Cadre, Galaxy, Primal Guild and Religious House.
5. Composition of Metro Cell.

Practical
Implementa-
tion

1. Establishment of Guild Formulation Post.
2. Presidium consensus on Guild Formulation Strategy.

RESEARCH SUMMARY: FORM OF THE GUILD

3. Galaxies establish time line for Guild implementation beginning January 1, 1974.
4. Potential Guild leadership located and trained in LENS and PSU's during Fall of 1973.
5. Establishment in Fall, 1973 of cells on the Metro level for catalyzing Primal Guilds.

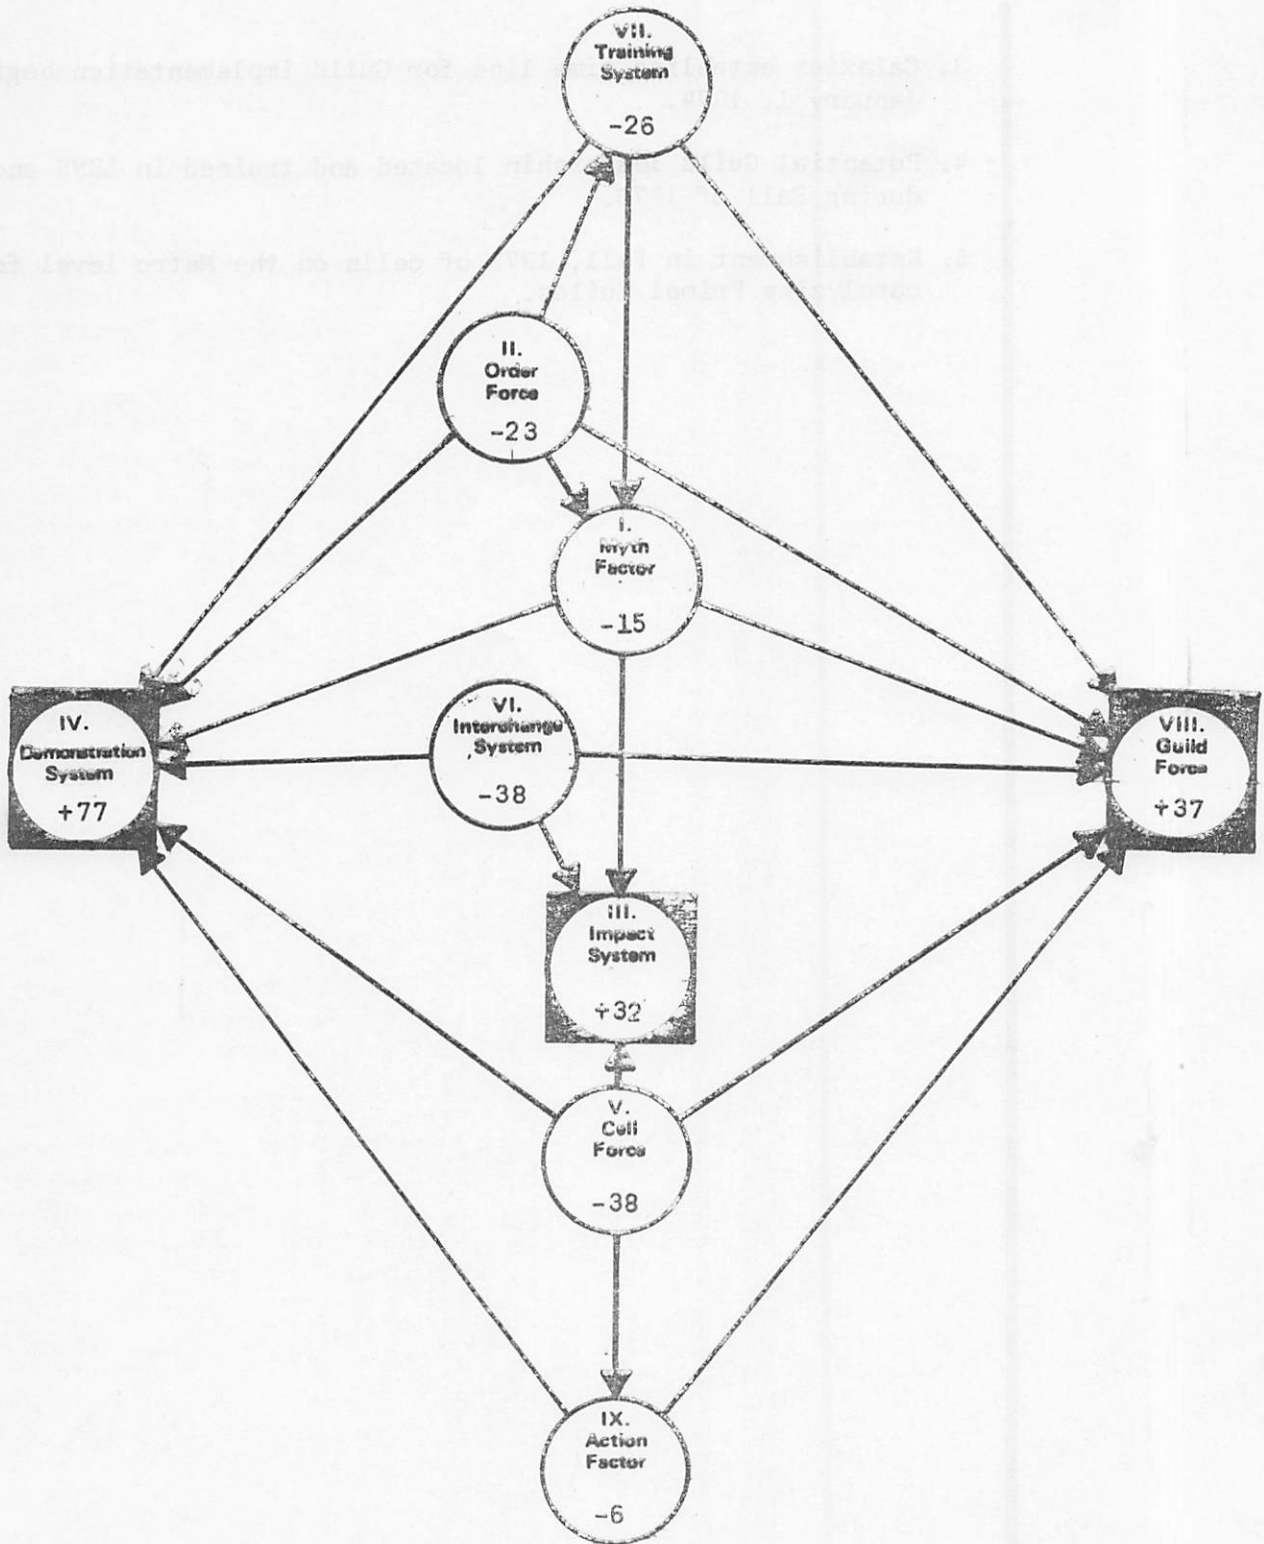

IMAGE
ANNOTATION

This diagram is a description of the Whistlepoint dynamic as ordered according to relative energy flows exposed by the relations off the Superweb.

The basic dynamic underlying all of the Logistics work is the Whistlepoints--the nine-fold practical dynamic of social change. These nine dynamics were analyzed and articulated in terms of the complexes of practical activity required in activating each of the nine dynamics. These practical activities were gestalted (apart from the Whistlepoints) into the Superweb.

This diagram reveals our current perception of the flow of energy around the Whistlepoints. Positive numbers indicate energy flowing in; negative numbers indicate energy flowing out of a given Whistlepoint. Negative numbers indicate catalytic power within the Whistlepoint dynamic. Positive numbers indicate direct power issuing from the Whistlepoint dynamic.

-38	Cell Forces
-38	Interchange Systems
-26	Training Systems
-23	Order Forces
-15	Myth Factors
- 6	Action Factors
+32	Impact Systems
+37	Guild Forces
+77	Demonstration Systems

Example: Any energy injected into Demonstration System, Impact System or Guild Force leaves the Whistlepoint system (arrows flow in only), whereas energy put into Cell Force and Interchange System flows out to other Whistlepoints.

Conclusion: The Task is to pour energy into Cell Force, Interchange System, Training System (i.e. those Whistlepoints with negative numbers) in order to catalyze Guild Force, Impact System, and Demonstration System (the Whistlepoints with positive numbers).

**OPERATING
PRINCIPLES**

1. The Logistical Systems describe the inclusive activities required of the Spirit Movement to practically catalyze social change across the globe.
2. The Logistical Systems are inclusive in that they describe all of the activities required of the Spirit Movement including ecclesiastical and secular, local and global, past and future.
3. The Logistical Systems are a practical description in that they do not depend on rational screens or gestalts of activities but on the formulation of organic complexes of activities which tend to be done in concert.
4. The Logistical Systems are a systematic description in that each complex of activity is described in terms of its internal and external activating relationships as a part of an array or a web.
5. The Logistical Systems are guided by the principle that form is given to the resurgence in human awareness and motivity in our time by creating secular/religious spirit nurture.
6. The Logistical Systems are guided by the principle that the depth meaning in life can be communicated through secular forms.
7. The Logistical Systems are guided by the principle that common engagement is structured through global/local systems.
8. The Logistical Systems are guided by the principle that structure must be given to the missional relations of the movement's diversity.
9. The Logistical Systems are guided by the principle that direct social engagement is necessary to embody the historical word in secular structures of society.
10. The Logistical Systems are guided by the principle that corporate power is demonstrated in missional enablement.

IMPLICATIONS**Theoretical
Clarity**

1. The web documents must be studied to extract new operating images of the movement discerned in the logistics work.
2. The work on the cell must be especially carefully studied in order to discern the practical activity required by that dynamic.
3. The web model must be studied to discern the usefulness of this work for the Spirit Movement.

Practical
Implementation

4. A methodology of battleplanning using the Whistlepoints and webs must be devised.
5. The webs must be cleaned to more clearly reflect current operating categories of movemental activity.
1. The work of Logistical Systems must be thoroughly studied both in terms of form and content before practical steps of implementation can be discerned.

IMAGE
ANNOTATION

Pressure Points-The nine 4th level social processes that are the keys to dealing with the contradictions and bringing into being the proposals of Summer '71.

Contextual Components-Each contextual component dimension, Impact Arena, Social Contradiction, and Social Vision has a primary and four secondary components.

Impact Arenas-The Impact arenas are those social forms that embody the pressure point and would be a major target of the tactics.

Social Contradictions-The social contradictions are those global contradictions in the arena of the pressure point that the tactics would be directed toward overcoming.

Social Vision-The social visions are the global visions for the pressure points that the tactics would be out to bring into being.

Master Strategies-There are three strategic arenas for each pressure point dealing with awakening, care and justice. Each strategic arena embodies the social vision, overcomes the social contradiction and is directed toward the impact arenas. These when stated for each pressure point become the Master Strategies for the tactical system.

Tactical Elements-The tactical elements are three paramount tactics, 15 primary tactics, and 75 secondary tactics for each Pressure Point. The tactics are directly related to the three Master Strategies. Each tactic is actualized independent of the other tactics.

OPERATING
PRINCIPLES

1. A direct tactic is practical, alters consciousness, and is a strategically organized explosive event.
2. The tactical system acts out the practical vision of the pressure points and thereby impacts the total social process.
3. Direct tactics create revolutionary change through the stance of the trans-establishment rather than liberal do-goodism.
4. The tactical system is made up of the contextual components, the Master strategies, the tactical elements, and the implementation scheme.
5. A paramount tactic of which there are three for each pressure point, deals with all the impact arenas, moves toward overcoming the contradiction in all nine pressure points, embodies the vision in all nine pressure points, yet has its primary focus on one particular pressure point.
6. There are five primary tactics for each paramount tactic which deal with the total impact arena, the total social contradiction, and the total social vision of its pressure point.
7. There are seventy-five secondary tactics associated with each pressure point which deal with some aspect of the impact arena, the social contradiction and the social vision.
8. The tactical system is to be implemented in a local community of 25,000 people, must deal concretely with the local forms, and be "doable" by local people.
9. Implementation of the tactics includes depth local community analysis, local modification procedures, and local forces engagement.
10. The tactical system out of a global context will be implemented in local communities by the guild.

IMPLICATIONS

Theoretical
Clarity

1. The tactics must be cleaned so that all are in the appropriate form.
2. The tactics need to be cross-checked for overlap and/or obvious holes in the system.
3. Some tactics must be checked to see if they hold original data.

Practical
Implementation

1. A detailed actualization manual must be written.
2. A practical model and timeline for the guild's use of the tactical system must be decided upon and created.

LOGISTICAL SYSTEMS

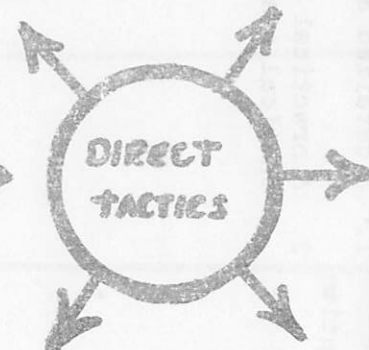

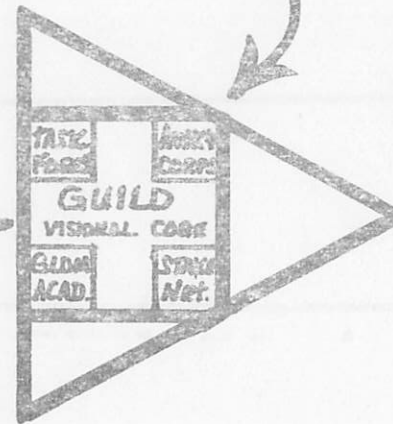

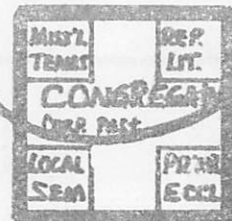

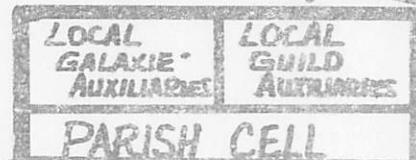

IMAGE
ANNOTATION

This design is a picture of the dynamics of a fully actualized Ecumenical Parish within the context of 216 parishes in the metro.

The Logistical Systems catalyze, coordinate and serve the Ecumenical Parish through the Metro Cell, especially through metro colleagues assigned to their respective parishes. The primary structure through which the metro relates to the parish is the Parish Cell. The Parish Cell is the ongoing local structure that coordinates the awakening, caring and guarding within the geo-socio realities of the parish. It is made up of representatives of the Congregational Cadres and the Guild Visional Core.

The Cadre is the self-conscious movemental force within the congregation, a part of whom are assigned to be galactic auxiliaries and a part of whom are assigned to participate in the congregation's team (which is assigned to the primal guild).

The Congregation is any body of people within a particular human settlement that is self-consciously grappling with the deeps of humanness and has a distinguishable symbolic life.

The Guild is the gathered awakened forces from within or beyond the congregation who assume responsibility for the transformation of their human settlement into a signal primal community.

The Direct Tactics is the comprehensive system of tactical deeds designed to be implemented by the guild within the local community, aimed at the radical transformation of local human sociality.

RESEARCH SUMMARY: THE FRAME OF THE GUILD

18

OPERATING
PRINCIPLES

1. There are five definitudes or foundational dynamics which define an Ecumenical Parish: It is the missional dynamic of the local church. It is the singular/pluriform dynamic. It is the local/global dynamic. It is the operating arena of the guild. It is the religious overlay on human settlement.
2. The Ecumenical Parish functions in transforming human settlement into primal community through the catalytic dynamic of the actional guild as it awakens, cares for, and guards local man within geo-social community.
3. There are five dynamically interrelated components of an Ecumenical Parish: cadre, congregation, guild, tactics and logistics.
4. The Ecumenical Parish Experiment is a 20-year design, there being an 8-year replication model by which the Ecumenical Parish Project is actualized within each of a metro's 216 parishes.
5. Metros are selected for the Experiment according to certain criteria. (For example, one criterion for selecting a signal metro is relative to its global cultural impact.)
6. A metro plan begins the Ecumenical Parish Experiment by forming, in the first year, a metro cell with representation from one parish of each of the metro's six polises. The parishes are selected according to certain criteria, (i.e. Each selected parish must have at least one galaxy congregation within it.).
7. Preparation for the project includes a series of events culminating in an Ecumenical Parish field visit.
8. There is a regulation centrum which coordinates the Ecumenical Parish Experiment.
9. There are both the parish and the metro manifestations of the cell dynamic functioning within the Ecumenical Parish Project.
10. There are constructs for the continued training, nurture, and mobilization of local men within each Ecumenical Parish.

IMPLICATIONS

Theoretical
Clarity

1. Further work needs to be done toward determining the function and form of the cell dynamic.
2. Further work needs to be done toward determining the roles and forms of the cadre dynamic.
3. Further work needs to be done in re-examining the sociological forms of the Ecumenical Parish articulated in the Summer Research.

Practical
Implementation

4. Further work needs to be done in pulling together a detailed model for the actualization of the Ecumenical Parish Experiment. This work should include models for phasing in particular situations, common battleplans, and actual form designation for the North American launching of the Ecumenical Parish Experiment.
 5. Further work needs to be done toward determining the basic training necessary for the launching of the Ecumenical Parish Experiment.
1. It is proposed that the Ecumenical Parish Experiment be initiated January 1, 1974 in North American metros meeting the criteria.
 2. It is proposed that the Movement use the Field Visitation Model in the Fall of 1973 in preparing metros for the Experiment.
 3. It is proposed that each selected metro initiate an Ecumenical Parish Project in one parish of each of its six polises the first year.
 4. It is proposed that symbolic centrum create a coordinating post that works in relation to the Ecumenical Parish Experiment.
 5. It is proposed that the replication of the LCX galaxies be intensified in coordination with the EPX preparation.

FORMS	LOGISTICS	TASK	FRAME
<p>The Form of the Guild researched the revolutionary nature of the guild and how it has appeared in history in order to come up with sociological form that will transform human community as it enables the Church in serving the parish.</p>	<p>The Logistics section built webs of the practical movemental activity required to create a movemental force in history that will catalyze the direct social enablement of local man in tactically reconstructing society for the benefit of all. The final products webs, clumps, and arrays delineate like a computer program the very precise interrelationships of a complex mechanism of social change some of which are surprising and indirect but yet are necessary to practically direct history in the reality of 20th century secular society.</p>	<p>The Task of the Guild created the tactical system based on the nine pressure points which are designed to direct comprehensive social change at the local level, simultaneously creating across the globe an avalanche of direct social action that will rebalance society toward the vision of "All the earth belongs to all the people."</p>	<p>The Ecumenical Parish section explored the presuppositions, functions, and inter-relationships of the concepts of the Ecumenical Parish in order to lay the foundation for the creation of universally applicable and practically achievable geo-social care structures capable of releasing the depth human creativity of local man.</p>

History is shifted, imbalances are counteracted and human spirit is resurged when the social contradictions depressing mankind are simultaneously attacked across the globe by local men organized into local guilds and armed with the tactics for occasioning avalanches of social change and the vision of recovered community awakened by the webs of catalyzing movemental activity of global social servants.

THE FORM OF THE GUILD: THE SOCIOLOGICAL FORMS

Week I					Week II				
Monday	Tuesday	Wednesday	Thursday	Friday	Monday	Tuesday	Wednesday	Thursday	Friday
DETERMINING THE SOCIAL FORM					IMPLEMENTING THE FORM				
REVOLUTIONARY STANCE	HISTORICAL DYNAMICS	PROFOUND FUNCTION	IMAGINAL FORM	FUNCTION OF THE FORMS	IMPLEMENTATION				
This section articulates the trend of our times as resurgent human beings calling forth the guild as a form of universal social engagement.	This section describes the guild in history as to how it has been occasioned and why, what forms and structures it has appeared as, and how it has functioned as awakening, caring and guarding dynamics.	This section describes the guild as the socio-spirit reality that is essential to humanness in transforming human community and further details four sub-functions and 20 aspects of the function of the guild.	This section analyzes the form of the guild from 3 perspectives 1)the direct tactics or task, 2) the profound function or socio-spirit reality, 3) the dynamics of awakening, caring, and guarding.	This section defines the forms, functions and relationships of the primal, system and net levels of the guild.	This section pulled together our practical wisdom for implementation into guidelines applicable to all 3 levels of implementation, and stylistically articulated the vision, purpose, and operating images of the guild.				
THE FORM OF THE GUILD					THE SOCIAL FORM OF THE GUILD				
THE REVOLUTIONARY STANCE OF THE GUILD	THE HISTORICAL DYNAMICS OF THE GUILD	THE PROFOUND FUNCTION OF THE GUILD	THE IMAGE OF THE GUILD	THE FORM AND FUNCTION OF THE GUILD	IMPLEMENTATION PRINCIPLES	THE GUILD MANIFEST			

The Form of the Guild researched the revolutionary nature of the guild and how it has appeared in history in order to come up with the sociological form that will transform human community as it enables the Church in serving the parish.

DOCUMENTS: THE FORM OF THE GUILD

Doc. #	Date	# Pages	# Prin.	Distribut'n	Title	Annotation
10	7/27	99	1200	League	GUILD IMPLEMENTATION	This document, completed during the second two-week session of Summer '73 Research Assembly, created extensive and specific particular plans as well as timelines and projections for implementing the Guild as it has been envisioned by Form of the Guild during the first two-week session.

RESEARCH SUMMARY: FORM OF THE GUILD
DOCUMENT DESCRIPTION

10A THE FORM OF THE GUILD

This document, completed during the first week, served to establish for the Research Assembly Participants a working image of the dynamic of the guild as a social construct. It is a document in three parts.

PART I - REVOLUTIONARY FUNCTION OF THE GUILD

The congregation prepared for writing this portion by corporately studying "Random Notes on the Guild" and "Winter Quarter Guild Research Summary". A montage of newspaper headlines was used to initiate a brainstorm under the categories of Trends, Shifts, Resurgence Songs and Demand for New Evangelism. From this data was written a document to describe the perspective out of which the Guild operates in the time of Resurgence.

PART II - HISTORICAL DYNAMICS OF THE GUILD

Preparation for this portion consisted of several hours of individual study of previous work done by the Order (notably the Guild PSU on Cultural Shifts, the entire set of documents for the 1972 Geo-Social analysis, and various guild PSU and background papers) as well as over 200 books from the Research Library, mostly in the area of sociology. Data from these sources was collected using the screens of Historical Dynamics of the Guild, Historical Situations of the Guild's birth, and Historical Organization of the Guild. The data and insights were then regestalted into primal, system and network dynamics and used to create a document which grounds the guild as ever present in history as covenanted care, humanness guardianship and sociological awakening.

PART III - PROFOUND FUNCTION

Building on the previous images and using a movie of the circus to create an analogy of the function of the guild in society, the five profound functions of the guild were identified by a brainstorm of three-word titles which were then swirled and titled; using the five profound functions thus identified, a document portion was portion was created which describes the function of the Guild in releasing human creativity and eliciting passionate engagement in society.

10B THE SOCIOLOGICAL FORM OF THE GUILD

This document, completed during the second week, puts the insights of the first document into practical, implementable form. It is a document in five parts.

PART I - REVOLUTIONARY STANCE OF THE GUILD

This is a re-edited version of the previously published "Revolutionary function of the Guild". (See above.)

RESEARCH SUMMARY: FORM OF THE GUILD
DOCUMENT DESCRIPTION

PART II - IMAGE OF THE GUILD

This is a diagram holding insights of the sociological form of the guild.

PART III - FORM AND FUNCTION OF THE GUILD

The congregation worked as three separate guilds, each one using a different screen to create a structural form of the guild. (Operation screen used the whistle points as categories; profound function screen used the previously identified five profound functions as categories; and the rational screen used three poles of the guild dynamic triangle as categories.) Data was thus collected in three radically different systems; the data thus collected was used in a corporate session of clumping and webbing to arrive at three forms which should hold the guild dynamic in being by their interaction. These three forms were delineated as specific plans for actualized guild models and represent the most specific and concrete articulation of the form of the guild produced during the first two weeks.

PART IV - GUILD IMPLEMENTATION PRINCIPLES

Relying on wisdom already accumulated, a brainstorm methodology produced the basis of the section which consists of the broad guidelines for local implementation of the guild.

PART V - MANIFEST OF THE GUILD

This section was written essentially by a group working on behalf of the congregation. It consists of a dedication of ourselves to accomplish the task of the guild in our time.

10 GUILD IMPLEMENTATION

This document, completed during the second two-week session of Summer '73 Research Assembly, created extensive and specific particular plans as well as timelines and projections for implementing the Guild as it has been envisioned by Form of the Guild during the first two-week session. These plans were supported by creation of step-by-step manuals on a PSU for use in Guild Leadership Recruitment, Guidelines for Guild Preparation, and guidelines for External Relations of the Guild.

THE LOGISTICS OF THE GUILD: WEBS OF PRACTICAL MOVEMENTAL ACTION

Week I					Week II				
Monday	Tuesday	Wednesday	Thursday	Friday	Monday	Tuesday	Wednesday	Thursday	Friday
PRACTICAL DYNAMIC OF SOCIAL CHANGE				EVALUATING MOVEMENT OPERATIONS		PRACTICAL ORGANIZATION OF MOVEMENT ACTIVITY			
PROFOUND FUNCTION OF THE 9 WHISTLEPOINTS		PRACTICAL REQUIREMENTS		CURRENT MVT CONTRADTNS	MOVEMENT EXPERIENCE	PRIORTIZED CLUMPS OF MOVEMENT ACTIVITY		WEBS OF 9 W. P.	COSMIC CLP SUPER WEB
The Whistlepoints were studied to state the theoretical definition, the historical grounding, and gapped to spell out the profound function of each Whistlepoint.		The practical requirements and tasks necessary for carrying out the profound function in out society were brainstormed and organized.		The movement operations were analyzed to reveal their gaps, blocks, & contradictions impeding full actualization of a W.P.	Study of movement wisdom, exp, & construct and new brainstorm create inclusive list of mvt activities to do W.P.s	The 8,000 tactics were organized into clumps and arrayed within each whistlepoint. The valance power was established.		The clumps in each WP were organized into a web	The clumps of each W. P. were organized into cosmic clumps. The 14 cosmic clumps were then super webbed.
THE PROFOUND FUNCTION OF THE WHISTLEPOINTS		PRACTICAL REQUIREMENTS:HOLDING P's		PRACTICAL DYNAMICS OF SOCIAL CHANGE				9 W.P. WEB MANUALS	MASTER TACTICAL WEBS
This section states the theoretical dynamic of social change by grounding how the Whistlepoint dynamic catalyzes direct social transformation and spells out the practical requirements for activating the Whistlepoints in our time.				This section evaluates movem't. operation to state contradictions blocking the movem't from actualizing the Whistlepoints.		This section organizes all the thousands of movemental activities into clumps and webs for each Whistlepoint and then interrelates all movemental activity in one superweb.			

The Logistics section of Summer ' 73 build the webs of practical movemental activity required to create a force in history organized to catalize the direct social engagement of local man in tactically reconstructing society for the benefit of all. The final products, webs, clumps, and arrays, delineate like a computer program the very precise interrelationships of a complex mechanism of societal change, surprising, indirect yet necessary to history.

RESEARCH SUMMARY: LOGISTICS OF THE GUILD
DOCUMENT DESCRIPTION

33

30A PROFOUND FUNCTION OF THE WHISTLEPOINTS

This document states the profound function of the whistlepoints overall and each whistle point grouped in the three categories of Contextual Determinants (Myth Factor, Action Factor), Enabling Agencies (Cross Forces, Cell Forces, Guild Forces), and Implementing Systems (Impact Systems, Demonstration Systems, Interchange Systems, Training Systems). Historical examples are described with each whistlepoint and overall.

30B PRACTICAL REQUIREMENTS: HOLDING PARAGRAPHS

Each whistlepoint and the whistlepoint's overall are described by the five practical characteristics and four practical tasks which would be necessary to carry out the profound function of the whistlepoints. This document is rough in its statement and production and needs reworking and polishing for further production.

30C PRACTICAL DYNAMICS OF SOCIAL CHANGE

The five priority contradictions in the movement and the unmet practical requirements for each whistlepoint are described as the intermediate step to intimate grounding of the whistlepoints as the new operating systems of the movement. This document is referred to as the Contradiction document and was reworked but not republished.

30D MASTER TACTICAL WEBS PART I

Part I consists of an introduction to the document and an overall description of the Superweb and diagram. Each of the 14 Cosmic Components, which are the clumps of the 135 major components of the whistlepoint webs, are described by characteristics, intent, impact on and by the other cosmic components, illustrations, and a list of the major components in the cosmic component. The second section is the description of the nine whistlepoint webs which includes the diagram of the web, a practical internal description, an overall external description and illustrations.

30E-M WHISTLEPOINT WEBS

Each whistlepoint has a descriptive narrative of each of its major components--the intent, the impact on and by the other major components, and illustrations. Next is a practical description including the forces, first steps, valence, illustrations, and a list of functions of each tactical component clump. Each major component has an array drawing.

30 TOWARD A PRACTICAL IMPLEMENTATION OF THE LOGISTICS OF THE GUILD, PART II

This document is a descriptive analysis of the webs of document 30E-M, using the social process, and a cross check of components. The guiding principles of the Logistical Systems are described and the next steps for

RESEARCH SUMMARY: LOGISTICS OF THE GUILD
DOCUMENT DESCRIPTION

application are stated. An analysis of the movement now in terms of shifts and implications for the future is delineated. A rational diagram of the cosmic components is proposed.

DIRECT TACTICS--CREATING THE TOOLS OF SOCIETAL CHANGE

Week I					Week II

THE OPERATING CONTEXT			THE TACTICAL SYSTEM						
			CONTEXTUAL COMPONENTS			MASTER STRATEGIES AND TACTICAL ELEMENTS			
Brainstormed the historical setting the characteristics of the tactics and the function of the tactics. Gestalted data and wrote the document.			Used Document E to gather all the data on proposals and contradictions for each pressure point. Gestalted data to create vision and contradiction statements and the impact arenas of the pressure points.		Brainstormed and selected tactics on each pressure point by tactical categories(paramount, primary, and secondary.) Named the three master strategies for each of the pressure points. Checked selected tactics over against the contextual components and for internal consistency. Polished and published the synopsis and the nine part document.				
THE OPERATING CONTEXT OF THE TASK OF THE GUILD			THE TASK OF THE GUILD:A SYNOPSIS OF THE TACTICAL SYSTEM AND THE NINE BOOKLETS						
This document sets the task of the guild in the historical context of the 20th century. Then it describes generally the characteristics of the tactics, and the function of the tactics.			The synopsis contains a statement describing the vision, contradiction, and impact arena of each of the nine pressure points. It has the charts holding the Master Strategies, and three word statements for the paramount, primary, and secondary tactics. The nine booklets contain a paragraph on each of the paramount and primary tactics and a sentence on each of the secondary tactics. There is a booklet for each of the nine pressure points.						

The Task of the Guild created the tactical system based on the nine pressure points which are designed to direct comprehensive social change at the local level.

There are tactic charts on each of the tactics, paragraphs on each of the Paramount Tactics, and sentences on each of the Secondary Tactics. This is the final document of the first two week's research. Produced as nine booklets.
40	7/27	78	1200	League	OPERATING DESIGN OF THE TASK OF THE GUILD	This document is the implementation document of the tactics. It presents designs and constructs for implementation, lays out the foundation for the tactical system, shows the modification techniques, and has a training design necessary for implementation.

RESEARCH SUMMARY: TASK OF THE GUILD
DOCUMENT DESCRIPTION

40A OPERATING CONTEXT OF THE TASK OF THE GUILD

This document sets the context of the task of the guild by pointing to its practical setting in the times and amidst the people of the 20th century, by defining the characteristics of a direct tactics system, and by describing the function of the direct tactics in total global revolution. The setting is that of human resurgence in the historical moment, of sociological manifestations in a time of resurgence, of human response in time of resurgence, of the historical Church in a time of resurgence, and of the primal guild in a time of resurgence. The characteristics of the direct tactics are described as a concretized vision and a particular mission. Also, the forces who are the system, the impact arenas, and tactical action are described in the characteristics as the global revolution in the local community, local revolution as systematic care, awakening of local community, foundational justice in the local community and primal care of the local community.

40B THE TASK OF THE GUILD: A SYNOPSIS OF THE TACTICAL SYSTEM

This document takes each one of the nine pressure points (Inclusive Myth, Community Groupings, Basic Roles, Social Morality, Formal Methods, Knowledge Access, Bureaucratic Systems, Deliberative Systems, and Anticipated Needs) and pulls out of the Task of the Guild document the vision, the contradiction, the impact arena, and the three 5x5 charts of tactics. The vision, the contradiction, and the impact arena are described in the form using one primary component and four secondary components. The 5x5 charts contain three-word phrases of the master strategy, the paramount tactic, the five primary tactics, and the twenty-five secondary tactics.

40C THE TASK OF THE GUILD

This document takes each of the nine pressure points (Inclusive Myth, Community Groupings, Basic Roles, Social Morality, Formal Methods, Knowledge Access, Bureaucratic Systems, Deliberative Systems, and Anticipated Needs) and states there the vision, contradiction, and impact arenas as well as describing tactics for each pressure point. The statements of the vision, the contradiction, and the impact arenas are stated giving a primary component statement and a statement on each of the four secondary components. On each pressure point there are three 5x5's on each of the three Paramount Tactics and its associated Primary tactics and Secondary Tactics. Each Paramount Tactic and each Primary Tactic is explained in a paragraph. Each of the Secondary Tactics is described in a single descriptive sentence.

RESEARCH SUMMARY: TASK OF THE GUILD
DOCUMENT DESCRIPTION

40 OPERATING DESIGN OF THE TASK OF THE GUILD

This document is the implementation document of the tactics. It has four parts: the context of implementation, the rationale and method for local community analysis, the rationale and method of modifying tactics to the local situation, and an initial local training model.

ECUMENICAL PARISH: PRACTICAL THEORETICS

EXPERIMENTAL DESIGN

THE DEFINITUDES

THE FUNCTIONING

THE COMPONENTS

THE DESIGN

THE FINALE

Defined the foundational images which distinguish the Ecumenical Parish as the form for revolutionary sociological change within human settlement.

Described how the Ecumenical Parish embodies the local activity of making men human.

Described the unique and essential components of the Ecumenical Parish as historical human dynamics and their relationship to the functioning of the Ecumenical Parish.

Analyzed the particular role of the congregation in relationship to the design of the experiment and described the experimental design that enables the Ecumenical Parish to embody the dynamic of reformulating global society.

Re-wrote the various documents, compiling them into one 2 part document as the final product of the first 2 weeks research.

20A TOWARD CREATING THE DESIGN OF THE EXPERIMENT:
THE ECUMENICAL PARISH: THE FRAME OF THE GUILD:

This document contains the major insights on the Ecumenical Parish as the Frame of the Guild gained in the Summer '73 first two weeks of research. It is a document of three parts.

PART A - THE DEFINITUDES

This document section explores the five dynamics of the Ecumenical Parish-missional dynamic of the local church, singular/pluriform, local/global, arena of the guild, and religious overlay on human settlement-which define it as a unique instrument of comprehensive care. It is a complete re-write of the document of the same title written July 3, published July 6, and issued to the Research Assembly at the July 10 Plenary.

PART B - THE COMPONENTS

This document section contains insights gained as a result of polar gestalting into the primary and secondary characteristics of each component--the Congregation, the Guild, the Cadre, the Tactics and the Logistics.

PART C - THE DESIGN

This document section indicates the concrete sociological forms within the Congregation, Guild, Cadre and Logistics components necessary for the Ecumenical Parish within the context of history to perform its functions.

An INTRODUCTION sets the Ecumenical Parish within the context of history. A CONCLUSION summarizes the document in terms of the poetry of the Cabaret and the Circus.

20B TOWARD CREATING THE DESIGN OF THE EXPERIMENT:
THE ECUMENICAL PARISH: THE FRAME OF THE GUILD: PART II

This document contains insights of secondary importance into the functioning of the Ecumenical Parish. It is a document of four parts.

PART A - THE FUNCTIONING

This section examines the Awakening, Guarding and Caring functions of the Ecumenical Parish, as well as its function as Primal Community and Actional Guild in the light of the Definitudes, concluding with an analysis of the role of the Guild in each of five typological cities. Edited from July 5.

PART B - THE COMPONENTS (FUNCTIONING)

This section is an elaboration of the way in which each of the Congregation, Guild, Cadre, Tactics and Logistics uniquely engage in the functions of Awakening, Caring and Guarding. This is a slightly amended version of the working document issued July 9.

PART C - THE COMPONENTS (DYNAMICS)

This section articulates the creates, limits, and sustains relationships of each component to each of the other components. Edited from July 6 draft.

PART D - THE COORDINATION CENTRUM

This section is a discussion of factors involved in initiating, coordinating and sustaining a full-scale Ecumenical Parish Project. It is very rough initial work in this arena. July 13, 1973.

20C TRUTHS AND PERVERSIONS OF THE CONGREGATION

A collection of insights about Sacred Space, Missional Decision, Local Logistics, Symbolic Life, Comprehensive Context and Missional Responsibility. July 11, 1973. Useful as a basis for further reflection.

20 THE FRAME OF THE GUILD THE ECUMENICAL PARISH

Written during the second two weeks holding the wisdom of the movement regarding the practical design and implementation of an Ecumenical Parish Experiment. A document of four parts.

I. OPERATING DESIGN

Lays out in detail how the movement will be orchestrated to deliver that transforming structure of the EPX to every local community on a 10-year T/L.

II. INTERNAL/EXTERNAL RELATIONS

Spells out the external relationships between the EPX and the structures of society, and the internal relationships between the structures of the EPX.

III. ECUMENICAL PARISH EXPERIMENT IMPLEMENTATION

Delineates the criteria for selection and basic steps in mobilizing the movement to implement the Ecumenical Parish Experiment.

IV. FIELD VISIT

A one-page 4x4 chart of the 4-hour field visit designed to launch a particular Ecumenical Parish.

22 FIELD VISIT MANUAL

A 29-page detailed manual of all the contexts and constructs to put on an Ecumenical Parish Experiment Field Visit.
