

Fours years ago now when some of you took off to establish was it 4 religious houses? 4 plus 1? 5 religious houses, and now we have the symbolic number of 80-- and you can see how that will work in a moment--and this year, within a year from now we ought to have close to 90 with no more here at home, and then the following year we have 100. The number itself is overwhelming, but that is not the important thing. that it splattered across that globe. systematically, which finally--I am sure that the angels are sort of think9ing this way--I think they use our houses along with other things in this world to point out to the Lord that the breakloose of the spirit actually is global in our time. That is the shocking thing to me.

Anyway, let's go down and look at these, down to here, you have the houses that are already in existence including the ones which if I am not mistaken--3 up there-- in which you are ~~just~~ --some of you are going to leave in the next couple of days.to start. I know of one or two in the room that probably will not go back where they are going except to pick up those 2 suitcases which I take it are packed and by God if they don't have a passport--

Anyway, our token in

Latin America is Caracas, and that immediately, and I am going to use the

word immediately to go through September. Then when it is tomorrow, I will

try to get that said, too. --immediately, that there will be 2 families there.

Hopefully, McClesky tells me now, that next Winter the ITI will be there. There

is going to have to be a lot of work done there before that can be done, certainly.

Our report from Africa is simply astounding. I have one little disappointment, in it--

that is that the Cairo thing has been postponed for 6 or 12 months due to the political

and social unrest of that country, a part of which was the Muslims moved in and

burnt down in Cairo one of the Churches of the bishop that we are dealing with, and

when he sent 150 priests to try to prevent further, there was a knock-down and drag-out.

though

So the situation is serious, and the president of Egypt of came and apologised

personally to the pope, yet they feel that ~~this~~ this might not be the best of all

possible times. to have a course that might ~~have~~ have some social concern about it.

In black Africa to me the report is simply overwhelming. In fact, it is quite

an I had brains enough to see some months ago it could be. What we have

work in Africa. I believe,--and this means now we have to build a battleplan--  
this is far better than what I had anticipated. I think that probably without intending  
to it, I was leading us down a dead road. We need to build now a battleplan.  
I think it has to look like this. I always think of Africa, black Africa sort  
of like that (draws get outline on board), and It is divided for me--well, this  
isn't going to quite get at it--but really like that. We have to ignore this part  
of Africa, which is Angola, Mozambique, Rhodesia, South Africa, and those nations  
it has wrapped in its guts. So that I think of East, West, and Central Africa.  
are  
The Campbells are here. Maybe I better put it this way. We have one couple there,  
we have to get 2 more. We have one couple here. We have to get another couple  
immediately up to go to Nairobi. And by immediately I mean tomorrow, with the  
Campbells. But our strategy, I think, Maybe, we have to set up a stronghold--  
we have one in the East-- now we get one in the R West, and that could be Nigeria.  
Then one in the Central. My guess is that almost has to be Zambia, Northern Rhodesia.  
Then we begin to fan out from there. It is going to be different from India.

But we fan out from there. We have to get one in the East, one in the West, and one in the Central.

I do not think Africa is going to be easy, but at least it is open to us, and that is crucial. Now--in-London

Now, in London and Teaside things are going just fine there now. ~~It~~ I sort of want to make my remark. If I had been the Hahn's I wouldn't ~~xx~~ have left. I would have stayed there long enough to have reaped the rewards. But he is so dedicated to Uncle Van's song (Harvest Time), that he thought that the ones who did the weeping ought to get out of there. Anyway, that is breaking loose. And you will notice that I have here Glasgow, That is tomorrow that they open a house. That is between now and June. I have 2 others here, Birmingham and Bristol, which sometime in the next year, and it could be done much quicker, but ~~them~~ they are not just pushing it. And actually in a way you ought to pull Glasgow up there except we don't have the people set to go. Now

Now in India, we set up the house in Hyderabad. ~~Wxxxxxx~~ But we need more troops as of immediately. Ray Richmond has been sent to Hyderabad. Australia sent him-- to be with Ray Spencer. We need another couple immediately, and it

has to be a British passport. I have thought that Augusta and Titus maybe ought to go. I am not so sure but what they might not be more valuable in some place besides India, actually. But anyway, someone ~~can have~~ who has a Commonwealth passport, type of thing. That family literally has to leave tomorrow, or at least the man of it has to leave. More and more it looks to me like their names are Fisher. It looks that way to me.

In Bombay the Barkers and Dharma is there--and I am after people that you know. There needs to be a Canadian family, or British passport family, that leaves tomorrow for that. And I mean tomorrow. They do not have to get on the plane tomorrow, like this one has to.

And then in Delhi, they need a Canadian family, or British passport family, as of immediately. The Powells are there. The Hutchinsons are there from Australia. This is the minimum of troops. I would say that within 6 months time 2 more couples are going to have to get in there, and the only way that an American can get in there ~~is that~~ that is useful at all to us is if you get a good job, like if you get into the ~~one of the~~ ~~one of the~~

Westerners and so on, you can get in on that kind of passport. The office, the control office is having 6 or 8 people apply for those jobs, even though they may not go at all, just to get that started, so we can be ready when we have to move.

Now you notice that finally I remembered Calcutta down here. I would say that Calcutta ought to be started in the Fall, depending on whether or not these ITI's ~~are~~ that are going to be held are absolutely out of this world. If there is one little hunk of ugly Americanism, we are going to be lucky to be in India. And we certainly are not going to be able to open Calcutta. But if you send the Fishers to Hyderabad, where they get themselves adjusted to India and let a few images get knocked out of their heads, as well as a few put in there, probably they are the ones who ought to go and start Calcutta. That is going to ~~be~~ be a sacred moment, because Calcutta has been a symbol for a long, long time in our Order.

Now, the very interesting thing in Australia is that

#### TAPE CHANGE

... to finish their grid of all of Australia, in that we left Mowanjum.

was Darwin, so that that is patched up, and I think that we can be very grateful for that. The Louisises have gone up there. Now, there are 2 other people that are needed. there--Well, I forgot. James Addington did a tremendous job in Australia. Their summer program was the finest they have ever had. And it was built on the model of our research assembly, a smaller model--it was for 3 weeks. What they did was to take the work we did here last summer and push it down onto the practical level. One of the things that we have to do is start studying their work. I just think they may have saved us months upon months of work. I think now this is going to begin to happen around the world. Anyway, Jim is going to stay there, and his wife is going out there to be with him soon, I think it is. They are going to be located in Sydney. They are going to have a complex job. One part is to begin to prepare Australia for the Local Church Experiment, which they are anxiously looking forward to. I will come back to that in a minute. Then they need help with their finances. We were going to send Thomas, but it looks like he is going to be needed for the money raising of the ITI, so I think maybe we will send

to at least be there 6 or 9 months, in which they just train them in how you go about raising money. Some of you who know Hay Hasnecock, we went to see her. We were testing out the balloons. We had a good time with her. We had 3 doctors when we went to see Hay. We gave her a fine day of it, together. ~~Then~~

Then, they shve decided to do Mowanjum all over again. We made the mistake I think, of leaving Mowanjum, maybe a year too early--that the leadership was not well enough trained. I believe that we have to start a another Mowanjum, and I suppose it will always be called Mowanjum, no matter where it is. In Australia they had a back-up plan of going into another place. I think they lost their courage and i didn't move. That back-up plan now is gone, so they worked out a plan where they take the basic leader out of Mowanjum, Mojali, and--what is Max Mac's name? Doug McCauley-- and put them in a landrover--they probably will have to start in Queensland, that is that big point that comes up on your left-hand side, right hand side as you face it, and find that Mowanjum, and that we move on it.

The Doctors that were with me, ~~Sam~~ promised them \$10,000 that they would raise here on the 11th of April when the guardians come in. to get them that land rover, and to
