GLOBAL CENTRUM  
QUARTER I, 1975 - 76

THE GLOBAL ORDER CENTRUM REPORT  
FOR WEEK 4

BRUSSELS  
BOMBAY  
SINGAPORE  
HONG KONG  
CHICAGO

GLOBAL  
DEVELOPMENT  
CENTRUM

Globality of Centruns is demonstrated as development representatives from all Nexus meet at Global Priors Council, and also as visits in Brussels seek key to releasing blocked corporation funds in India and Africa. Even as meetings go on in Chicago, work continues around the globe with circuits to Appleton, Wisconsin, El Paso, Texas, and Chicago bringing back \$1952 in cash and \$3200 promised. India receives 100% tax-exempt status for ICA as non-profit organization in India which opens new possibilities and releases pending development proposals. Opening new contacts is also the trend in Brussels as Scandinavian countries are geared up for major funding. The contradiction lies in the arena of combining research and follow-up, of keeping cash flowing while building hard proposals for social demonstration.

GLOBAL  
MANAGEMENT  
CENTRUM

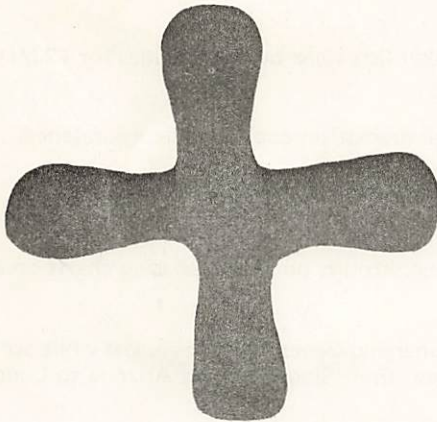

Gathering of Centruns causes both power and difficulty as Bombay finds that financial pulling together of reports dramatized glory of mundane while Brussels struggles with prioritizing the tasks during the weeks of low troop strength. Combined reports and thinking allows concrete projections for future efforts and the achievement of a financial report which communicates both our globality and financial position, and streamlined and simplified forms which pave the way for easier global reporting. The contradiction lies in the arena of a comprehensive system that allows the easy transfer of resources, both cash and personnel.

GLOBAL  
OPERATIONS  
CENTRUM

Combined forces allows deep thinking on dispersion of people to the right place at the right time as course calendars and rationales for program scheduling allow look at the total global picture. Broad contexts become very particular as Brussels tries to discern the program needed for each location in order to elicit the passion to become engaged, Bombay circuit rides point to new emphasis on necessary ecclesiastical structures, and in Chicago, printed assignment sheets result in a sudden influx of passport pictures, assorted shots, and visa applications. The contradiction lies in the arena of discerning the most effective use of time and troops for 1975-76 when Area plans have not been finalized beyond Quarter I.

GLOBAL  
RESEARCH  
CENTRUM

Seriousness about the world set the tone in Research Centrum as signaled by the decision of the Global Priors Council on the major strategies of the movement: Primal Community Experiment, Global Social Demonstration, and Global Community Forum. This consensus is reflected by the documents written by Europe '75 illuminating work of PCE and by the Regional Cadre PSUs in India which articulate four year long range vision and Regional formulation. Training is key in future with participants of Europe '75 suggesting three week training program, long-range planning of Cadre training in India, and realization that methods are key to Church which is key in Europe. The contradiction lies in the arena of commonness: forms that elicit commonness, grounding focus of PCE in day to day structures, and in keeping PCE forces excited about PCE as global force not individual thing.

When our enemies heard of it, and all the surrounding nations saw it, they thought it a very wonderful achievement, and they recognized that this work had been accomplished by the help of our Lord.

-the Prophet Nehemiah

GLOBAL CENTRUM  
QUARTER I , 1975-76

THE GLOBAL ORDER CENTRUM REPORT  
FOR WEEK 5

BRUSSELS  
BOMBAY  
SINGAPORE  
HONG KONG  
CHICAGO

GLOBAL  
DEVELOPMENT  
CENTRUM

Globality of Centrum bands is demonstrated as work in Brussels leads to anticipation of legalization in Germany, and development work in Australia results in Rs.12,000 arriving in Bombay in 'unmarked envelope'. In-kind continues to be overflowing cup as more crates and books arrive in Bombay and visit to Coca Cola brings in ITI in-kind contribution, scholarship, and LENS participants. The contradiction lies in the arena of shifting development strategies without clear picture of what the new will be and without the clear decision that anyone can be a developer.

GLOBAL  
MANAGEMENT  
CENTRUM

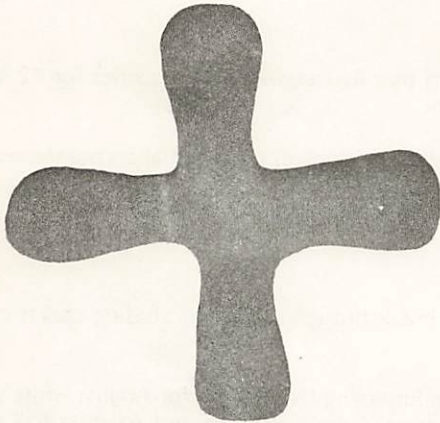

Symbol of the intentionality of management is the continuous sound of the printing presses as Publishing Houses work around the clock throughout discontinuity. Bombay readies and sends 'New Castle' study to all Houses, and Oombulgurri consult materials leave on time as Quarter II preparation begins. There is excitement over the smooth running of global structures and policies which allow anyone to serve in management. The contradiction lies in the arena of developing a system that has channels to provide even and easy flow of cash and yet also has locks to reserve monies for necessary immediate large outlays.

GLOBAL  
OPERATIONS  
CENTRUM

People on the move and ready to move - all over the world. Brussels has global staff ready for immediate assignment, comings and goings keep Chicago telephones constantly busy, and circuit initiations in all four Areas has Bombay rejoicing as Regional Cadres blossom across India. The Contradiction lies in the arena of the freedom/obedience tension - holding your own timeline and rules in tension with bureaucratic and diplomatic rules and regulations, and keeping from watching and waiting for 'them' to decide the direction of the next quarter.

GLOBAL  
RESEARCH  
CENTRUM

Commonality is the focal point in research as Centrum Band holds planning meeting at conclusion of Global Priors Council. Bombay completes comprehensiveness screen and common House collegium rationale and Centrum Nexus library catalogue rationale, and discontinuity means work moves toward completion on revised PCE Field Visit Manual and on Prayer and Fasting constructs. Work continues in Chicago on the transcription and distribution of Council lectures. The contradiction lies in the arena of utilizing established networks to enable regular flow of both information and personnel.

Forty years long thou didst sustain the men in the wilderness and they lacked nothing; their clothes did not wear out and their feet were not swollen.

---the Prophet Nehemiah

THE GLOBAL ORDER CENTRUM REPORT  
FOR WEEK SEVEN

GLOBAL CENTRUM  
QUARTER I 1975-76

Chicago sees that the great 222 (\$2.22 million) is accomplished as had been projected for the year 1974-75. Singapore sets the Guardians Meeting. In-hand money is constantly happening: Hong Kong nets \$US1000 and Singapore \$US500. A new Inter-centrum space design in Chicago has removed the walls between centrums and produced a new possibility to appropriate corporate space. The contradiction lies in the arena of our propensity to hesitate, wanting to wait for increasingly ambiguous relationships to be resolved, rather than moving ahead on into the new year.

GLOBAL  
DEVELOPMENT  
CENTRUM

As the year begins space design is once again a major issue, but comes this year more as an imaginal tool than as a practice to be gotten out of the way. At Chicago the facility post moved from management centrum space into the nexus central hub. Hong Kong is also brooding on new space models. Both Hong Kong and Chicago report in-kind is blossoming into a major development gift, freeing funds for the total mission. All points report cash flow as tight.

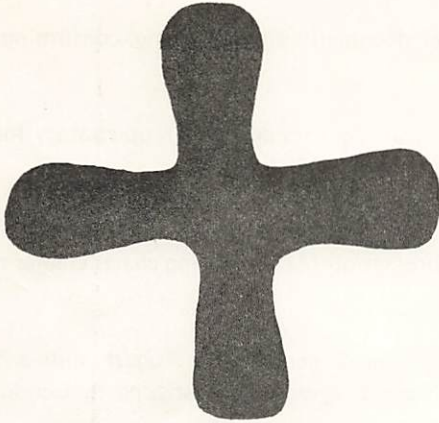

GLOBAL  
MANAGEMENT  
CENTRUM

In the first week of Foray 21-6 with 92% of the North American houses reporting 467 towns visited, 210 sponsors visited, and 92 secured, and 67 Town Meetings '76 scheduled with 214 more projected before January 1. North American continent alive, with dike broken open for first 1,000 Town Meeting with teams moving beyond polis circuits to micro level. Hong Kong creates list of all assignments to NE Asia houses from 1968-75 and charts the GOR of the last year as a tool to reveal movemental journey in NE Asia. Singapore continues visitation rhythm with skeleton crew. Global Operations experiences itself as briefing and debriefing focal point as new and old troops pass thru on way to new assignments. The contradiction lies in the arena of seeing ourselves as an arm of development while being the catalysis for transrational scheduling, transrational communications and transrational circuits.

GLOBAL  
OPERATIONS  
CENTRUM

Jelu ITI completes first week hearing reports from Global Priors Council. Hong Kong finds transitional time and assignment shifting occasion for exchange of models and debriefing of colleagues passing through. Oombulurri Consult highlights the appropriateness of Social Demonstration as 'showing by doing.' University 13 moves one step closer to accreditation after second meeting with University of Illinois officials. The contradiction lies in the arena of keeping the imagination ahead of actuality in inventing forms for the future.

GLOBAL  
RESEARCH  
CENTRUM

This is a sabbeth of sacred rest for you and you shall mortify yourselves; it is a rule binding for all time.
