**THE  
SEVEN MASTER  
TACTICAL COMPONENTS  
OF THE NEW SOCIAL VEHICLE**

corporately written by  
the participants in the  
**SUMMER '72 RESEARCH ASSEMBLY**

The Ecumenical Institute  
3444 Congress Parkway  
Chicago, Illinois 60624

## PREFACE

The seven practical indirect strategies of the new social vehicle are described in another of the Summer '72 documents. Each strategy is composed of five components each, totalling 35 components for the seven strategies. The 35 were gestalted into seven master tactical components according to the actions described in the 35 components. Each of the seven master tactical components was then described by its identifying characteristics and a set of five primary, 25 secondary, and 125 tertiary tactics were created for each. These seven sets of tactics form the indirect tactical system of the new social vehicle.

This document contains the 5x5x5 of each tactical component, the statement of its identifying characteristics, and written descriptions of primary, secondary, and tertiary tactics.

**MASTER TACTICAL COMPONENT #1  
INDIRECT EDUCATION SYSTEMS**

Indirect Education Systems is a master tactical component intended to develop and broadcast the new global secular myth through various forms of informal education characterized by Secular Curriculum, Imaginal Presentation Methods, Secular Religious Forces, and Research and Training Centrum.

The first identifying characteristic of this master tactical component is Secular Curriculum. This curriculum is a storehouse of short-course sonstructs, conversations, and recontexted vocations education using a universal story and secular language. This curriculum consists of illustration and short course banks, short story pools, graffiti and humor using images based on life experiences. These are indirect motivational constructs in intriguing story-telling methodologies. The goal of this characteristic is to create a common global myth, illuminating the depth meaning of life and enable responsible decision-making and the reforging of local history.

The second identifying characteristic of this master tactical component is Imaginal Presentation Methods. This characteristic intends to raise everyman's experience to articulation through depth motivating impacts intentionally planned with a format designed for universal use. Through a distributing center with long-range timelines and a plan for particular thrusts through a geo-social grid intentional presentations would be promulgated. This center would administer a net of interrelated speakers bureaus and controlled use of mass media as a tangetial input channel into communities. This would take the form of pocket books, cartoons, murals, music, radio, T.V. and art forms which inform and relate contemporary events.

The third identifying characteristic of this master tactical component is Secular Religious Forces. They would embody the self-concious secular witness and include pedagogical personnel, signal community leaders, and local story-telling guilds trained in imaginal presentation of the secular evangelism curriculum. Pedagogical personnel are comprehensively assigned to teach through a global network. Signal community leaders act out a futuric intentional role in the community. The local story-telling guild, composed of artists, media personnel, and writers, corporately builds art forms to present to mass audiences.

The fourth identifying characteristic of the master tactical component is Research and Training Centrum. The Centrum would be involved in Basic and foundational research involving, but not limited to collecting and analysing the content and form of primal and current myths, identifying predominate societal mindsets (global and parochial) histoical research, futuric projection. Periodic assemblies of local researchers and will create medels for future work and dissemination of completed research. It would employ a global-local network of research to ensure universal applicability of the myth, research and curricula developed.

MASTER TACTICAL COMPONENT #1  
INDIRECT EDUCATION SYSTEMS

## INDIRECT EDUCATION SYSTEMS

### Life Story Research Interchange

The Life Story Research Interchange discovers life stories as a means of articulating humanness and makes life story methodologies available to all men. The tactic will be the means of discovering new data relative to the articulation of life stories throughout history and in contemporary cultures and will provide means of future life story articulation. It will further develop models for research and life story development. The tactic will relate to Recruitment Training Network by providing appropriate life stories and means of involving new recruits in research. It will enable the Local Outreach Schema by providing primary research data, information and models for the Permeation Logistics Administration, finally, it will be the source of cell models and information held by the Constructs Resources Pool.

### Materials Control

Materials Control intends to locate, analyze, coordinate and store data through use of a data bank and resource library, then provide data distribution through internal publications and channels of interchange. Data Interchange indicates monitoring the practices of the flow of research data into the research interchange and the dissemination of data to the other components. Internal Publications is the publication of materials among the research staff for the purpose of their work. Resource Library collects and holds all tangential and background reading and reference materials. Data Bank holds all researched information in retrievable form for later reference. Data Coordination is the dynamic which controls all use of data.

### Primary Analysis

Primary Analysis is intended to interpret media, gather cultural information, and be involved in corporate reading and field surveys so that PSU's assemblies can be established. Media Interpretation is the review and screening of art forms commonly referred to as mass media in order to determine where the life-story was grounded at the point in history of the creation of the art form. Cultural Ontology is the study of History, Religion, Literature, Anthropology, and so forth on a cross-cultural basis to get to the roots of man's self-consciousness. Corporate Reading is a grassroots, globally related way of screening masses of necessary materials on a particular area of research. Think Tanks are time-defined grassroots research sessions such as PSU's and Research Assemblies using both analytic and intuitive approaches to data or to a problem. Field Surveys is the sending of research teams to a particular area to glean first hand experience of the current relational stance of local man to his situation.

## Coordination Strategies

Coordination Strategies intends to form units such as Room E, reserve forces, scouting parties, as well as gridding areas, timeline work, and mailing quarterly plans to local centers. Personnel Assignments deals with the assignment of all research forces including survey teams and problem solving units. Strategy Creation deals with short term planning of the research, determining the what and how of current work and mailing out such things as the quarter plan for global research. Operations Hub is a locus and group of people who recruit researchers and operate out of the Room E dynamic, use themselves as guinea pigs for the researching. Battle Plan deals with long range research planning, timelining, and gridding, including the decision of placement of area research centers. Special Forces are special units created for a short term to handle on the spot research.

## Analytic Techniques

Analytic Techniques will build analytic models such as the social processes triangle that will be universally applicable, create evaluative schemes such as the methodological use of prototypes, experiment with research methods through trial and error methodologies, set operational guidelines whereby research work might be concretized, and finally extricate common wisdom through techniques such as corporate writing. Methodology Experimentation refers to the creation of new methods for the research such as the analytic methods created before this research assembly, e.g. swirling. Analytic Models refers to the creation of abstract models or pictures, such as the Social Process Triangles, to insure the universal applicability of the research. Operational Guidelines is the creation of procedures to guide the research troops in their tasks. Evaluation Schemes refer to the creation of a means to evaluate the products of the research, such as conducting dry runs with sample populations. Wisdom Extrication refers to the means of obtaining grassroots wisdom for the research, such as workshopping, conversation, and corporate writing.

## Constructs Development

Construct Development creates the Life Story and prototype presentation from which the curriculum is constructed utilizing audio-visual units and informal tools. Life-Story Formulation is the task of forming out of all the work an over-arching, secular, and meaningful story for 20th century man. Proto-type Curricula are course constructs, including short stories, conversations, short courses, created and tested for the Constructs Resource Pool to distribute to local man. Audio Visuals are media art forms and symbols which disseminate the global life story and allow local man to create his own stories. Edge Publication is the periodic publication of reports and results of the research which provide the theoretical framework for the research and for the purpose of keeping research troops in the total network up to date. Marketable Writing are research products such as popular books, songs, movie and TV scenarios which go into publication processes in order to impact the masses.

## INDIRECT EDUCATION SYSTEMS

### Recruitment Training Network

The Recruitment Training Network recruits and trains catalytic forces from the local citizenry. Network meetings provide the means for coordinating overall activities of the training network. The consult team is a mobile group thoroughly trained in imaginal training methodologies handling training requests. The recruitment plan provides the means for locating potential trainees, training, and funneling them into appropriate parts of the network. The training rationale is the design that indicates what training rationale is needed and provides the outline to guide the training process. Training centers are the physical locations in which training occurs.

### Network Meetings

Network Meetings provide means for coordinating overall activities of the training network. guilds, assignment to various tasks, planning for future, accountability for past, projection of the future thrust. Resident Coordinators intends to create a group of residents who will coordinate actualization of the network. Recruitment Evaluation intends to evaluate recruitment models in relation to the local situation. Recruitment Assignment intends to assign recruitment personnel to specific local communities. Meetings Schedule intends to coordinate and timeline network meetings on a regular basis. Recruitment Accountability intends to hold recruitment personnel accountable for their assigned tasks.

### Consult Team

The Consult Team is a mobile group, trained in the methodologies and workshops of the network, that visits guilds areas in order to evaluate the effectiveness of the training, guide and advise future work, trouble shoot when needed, and serve advisory function to local training units. Breakthrough Visitation is the initial visits that the consult team would make on various firms or individuals. Popular Preaching is part of the methods used by the consult team. The consult team is involved in Speaking Engagements to publicize the training program. Follow-up Visits is made to be sure of decisions made by prospective trainees. Style Impaction will occur by just the very stance of the consult team.

## Recruitment Plan

The Recruitment Plan provides the means for locating potential trainees, presenting the need for training, and funneling them into appropriate parts of the network. Recruitment Timeline intends to provide a time schedule for recruitment. Occupational Recruitment models will be used to recruit people from various occupational groups. Area Grid will help recruitment by giving a geo-social picture of the area to be recruited. Recruitment Priorities will determine who are the key people to be recruited. Story Construct provides a basic adaptable story for recruiters to use.

## Training Rationale

The Training Rationale is the design that indicates what training is needed and provides the outline that guides the training process. Program Timeline intends to outline the time schedule for the recruitment training program. Meeting Formats intends to provide a consistent format of training meetings. Leadership Assignment intends to set assignment schedules for program leaders. Common Construct intends to provide a common model for training to be carried out. Training Evaluation intends to provide an evaluation of the effects of the training program.

## Training Centers

Training Centers are the physical locations in which training occurs; they are equipped with seminar rooms, **adequate backup and enablement facilities** curriculum resources, and situated to be easily accessible. Seminar Courses will be held in training centers. Methods Courses will be held in training centers so that the trainees are trained in methodology. Community PSU intends to problemat local communities. Occupational Courses will be held at training centers for occupational groups. Experimental Schools will be held for representatives of various businesses to be trained in new skills and methods within the training centers.

## INDIRECT EDUCATION SYSTEMS

### Local Outreach Schema

Local Outreach Schema will delineate and prioritize areas of need and concern by a local coordinating group. The schema will work out of direct and indirect education approaches, tangential presentations appropriating the visual arts, will be created using common language with simple powerful phrases and images from life experiences. Local Outreach Schema is the practical implementation of the combined efforts of the other components of Secular Evangelism Designs. It uses the developed curriculum, methods and research results of Life Story Research Interchange. The trained forces do the work designed by Local Outreach Schema. Permeation Logistics Administration coordinates from a global network. The enablement of different outreach frameworks provide intents and trained personnel. Constructs Resource Pool provides resources and organizational enablement. Local Outreach Schema is the cutting edge of the thrust of Secular Evangelism Designs.

### Thrust Delineation

Thrust Delineation calls for a polity system that identifies problems, decides priorities, plans and evaluates outreach methodologies, makes assignments, and provides communication network for the entire system. Thrust Prioritization gives a rationale for effectively permeating the community. Problem Identification brings light on the areas of human struggles. Evaluation Construct maintains the directness of the thrust. Assignment Rationale gives a rationale for assignment of troops to most effectively permeate the community. Communication Network constantly keeps data flowing so that evaluation might take place.

### Depth Engagement

Depth Engagement creates a sensitivity to life struggles through the articulation of life experiences encountered in all situations using techniques such as conversation methodologies, short courses, and interpretive questions. Signal Happenings intends to heighten the experience of such happenings so that every man can experience his life at a deeper level. News Interpretation intends to help man see the daily news at more than a surface level. Questions Construct intends to provide ideas of the levels and arenas of questions used to enable any man to experience depth in his life. Conversation Method intends local man to recover depth conversations through spirit conversations, movie conversations, and the like. Short Courses intend to take time, place, and situation and deal with it in a meaningful way to help every man encounter depth engagement.

## Tangential Presentations

Tangential Presentations is the use of indirect methodologies such as parlor games, slogans, intentional decor, and printed material to reinforce formal presentations. Decor Bombardment intends to non-verbally saturate the local community with the word through a variety of art forms, building decoration, road signs and billboards. Slogan Creation intends to verbally popularize the word by the creation of catchy watch words, greetings, and salutations. Intentional Symbols intends to create and popularize identifying styles of dress and habit. Printed Media intends to create and popularize cartoon strips, "Dell Books". Audio-Visual Aids intends to create and popularize soap operas, songs and parlor games.

## Operation Structures

Operational Structures creates the local outreach schema by utilization of existing structures such as children's and adult clubs, neighborhood coffee klatches, and the creation of new structures such as story-telling guilds. Structure Creation intends to build methods which will enable the creation of structures that are necessary to get social awakening in at the broad level. Structure Utilization intends to utilize methods for effective social awakening to get the Word into the local situation. Data Interchange is the method for getting the resources and methods into the field and the methods by which raw data is fed back for future building. Systematic Evaluation of a program intends to enable objectivity in the comprehensive situation. Pilot Sessions involves "dry-runs" of courses in order to work out difficulties and problems.

## Formal Presentations

Formal Presentations is the embodiment of local outreach schema through direct channels such as public lectures, news articles, television and radio performances, and courses dealing with local practical issues. Public Lectures is intended to present to the general public important highlights of the secular evangelistic message. News Articles is intended to impact the community with the information needed to make the community aware. Speaking Engagements, is intended to emphasize the highlights of the secular evangelistic message. TV/Radio Appearances is intended to be another means of impacting the public with the message. Occupational Courses is intended to train members of the community to awaken them to the possibilities of themselves.

## INDIRECT EDUCATION SYSTEMS

### Permeation Logistics Administration

Permeation Logistics Administration will enable the flow of information, trained forces, and materials to strategic focal areas determined by geo-social gridding, coordinated by corporate planning, time-lining, and evaluating through a regional network. The social form would be a coordination distribution centrum organizing a mailing system, tele-communication system, and filing system, for cross-cultural global permeation. Operating through a centrum, permeation logistics administration handles communications for life story research interchange, coordinates assignments of the training network. It allows local outreach schema to operate in connection with the rest of the globe by informing local situations of the available forces and resources, by calling for a response to need for forces, and by providing follow-up mailings. It channels requests for resources to the constructs resources pool and provides other enablement through its filing, mailing and tele-communications systems.

### Forces Assignment

Forces Assignment located within permeation logistics administration will provide for the placing of trained troops in areas in need of their skills. Placement Priorities is the process of comparing the local needs with the available troops to make the necessary assignments. Troop List is the constantly up-dated, comprehensive, organized list of available regional manpower. Documentation Records keeps complete records of the troop assignments organized by individuals, job categories and personell evaluations. Internal Staff analyses and prioritizes administration, office and service needs to make necessary internal staff assignments. Accountability Covenant provides the means of holding assigned troops accountable to this task, and pronouncing absolution on the completed tasks.

### Material Distribution

Materials Distribution arranges for locating, packaging and physically transporting to disseminate permeation blitz models, pamphlets, posters and other materials to the local areas requesting them. Resource Location maintains a listing of required materials from other structures and is responsible for procuring them. Packaging Centrum organizes and assembles materials in a comprehensive packet so that when it arrives in the local situation there is an indication as to its intended use. Transportation Selection decides the most effective mode of distribution and arranges transportation procedures. Motor Pool allows for immediate mobility of materials and personnel. Request List co-ordinates the delivery procedures from the time of receiving the request until it is fulfilled.

## Intercommunication Network

Intercommunication Network receives and dispenses research, resources and practice evaluation reports through such means as regional newsletters and global reports. Regional Newsletter informs the forces of the state of development and projected timeline on a quarterly basis. Global Reports bring awareness of global context and new experiments being used in other locations through symbolic collegial reporting. Resources Listings informs the forces of needed and available materials and personnel. Regional Meetings draw together the forces components to evaluate the distribution process and project new models. Mass Media presents through cable television the updated research breakthroughs and teaches training methodologies.

## Strategic Planning

Strategic Planning will create a concrete blueprint for administration by designing a comprehensive geo-social grid, determining the relationship between local needs and resources, developing priority guidelines, evaluating the operation staff. Geo-social Grid is visual presentation of geographic factors, occupational arenas, areas of population concentration and social class. Administration Blueprint is the primary organizing tool determining the administrative guidelines that result from the inter-relationships of the distribution priorities, evangelism schema, material resources and the forces under assignment. Priority Guidelines involves a working manual construct of the position of the target points and determines which steps are important in implementing the distribution of materials and information. Regional Coordination maintains contact with all the regional structures and enables effective interchange of wisdom and demands, thus ensuring effective global operation. Logistics Evaluation analyzes the operating methods, then judges their effectiveness, and proposes alterations where necessary.

## Coordination Centrum

Coordination Centrum provides the facilities and practice of the scheduling, filing and telecommunications required for local administration and the permeation logistics. Physical Facility provides materials, tools, office and machinery for the administration structures. Filing System keeps all information rationally ordered and readily available. Mailing List maintains a comprehensive record of names and addresses, and ensures it is up to date at all times. Communication Center is the technological nerve center of the designs using telephones, teleprinters, and so forth and coordinates in-coming and out-going mail. Facilitation Methods evaluates existing operation methods and facilities, and creates alternatives as necessary.

## INDIRECT EDUCATION SYSTEMS

### Construct Resource Pool

Construct Resource Pool is to collect, organize and disseminate information about available resources to enable other areas of the tactic. It is the coordinating body for all the public material needed in order to do Secular Evangelism. Constructs Resource Pool would be a source of materials such as publications, songs and decor; and information where resources can be located such as library materials, films or a printing press. It could be imaged as a clearing house based on upcoming curriculum and programming and would support the training network and permeation logistics administration by coordinating information on available resource materials.

### Reference Service

Reference Service supplies requested information, by maintaining files of local models resources, offering channels to services such as translators, and by maintaining contact with broader ongoing centers of information dissemination. Local Resources provides a model for locating resources pertaining to areas as restaurants, movies, available facilities and equipment. Audio-visual File will list films and film equipment, decor, records, and other necessary audio-visual equipment. Information Network enables a global/local flow of information lists and resources. Constructs Collection is a resource of all the methodologies materials; ie, short courses, table conversations, study techniques, and course constructs. Assorted Bibliographies lists different categories of published materials related to other action tactics needed to support Secular Evangelism.

### Administrative Procedures

Administrative Procedures involves obtaining persons to coordinate incoming research information, locate available supplies, determine the effective public presentation of the research and local publications, anticipate resources needed by the community being served. Ordered Staff provides an organized statement of tasks and skills required to accomplish each job function. Coordinated Supplies facilitates operations by central ordering, internally organizing, and distributing supplies. Accounting System provides financial record keeping, including incoming and outgoing bills and funds. Polity Decisions makes the basic decisions that determines the internal organization and operation of the system. Future Projections anticipates the requests that will be made for material and information contained in the system.

## Informative Publicity

Informative Publicity insures the necessary data for internal organization and enables efficiency in the information quality and quantity and its distribution. Mailing List will contain a strategic list of names of people and organizations that have contacted the system or that need to be contacted. Periodic Publications is designed to be an occasional newsletter or magazine informing the public about relevant information. Media Usage makes use of radio and newspapers to advertise services available. Effectiveness Evaluation determines the effectiveness of the advertising and the services received. Intentional Displays are imaginal art forms with a particular message to deliver concerning services available.

## Publication Process

Publication Process intends to print and duplicate materials supplied by Myth Research/Development Interchange. Basic Curriculum intends to supply materials needed to teach constructs, courses developed by Myth Research/Development Interchange. Supplemental Material intends to supply all other materials needed for the course and to provide information on local resources. Essential Equipment procures and maintains all equipment and supplies necessary for the reproduction of materials. Publicity Purposes will provide information on all materials available. Priority Timeline determines schedules for reproduction and supply to keep ahead of determined needs.

## MATERIALS FLOW

Materials Flow intends to identify all the material available and to it under a cross-reference cataloging and filing system for easy access so that requested material can be dispersed from the system either in person or by mail. Material Accumulation intends to collect or gather pertinent materials available. System Selection intends to provide a particular method by which materials may be organized into a specific manner. Files Maintenance keeps accurate files and cross-reference files on all materials. Current Publications intends to up-date the material flow. Materials Distribution intends to disperse the material personally or by mail.

## MASTER TACTICAL COMPONENT #2 GRASSROOTS TRAINING APPARATUS

Grassroots Training Apparatus-Designs is a Master Tactical component intended to create local skilled leadership through a broad program of special training characterized by a global corporate faculty style, pedagogical methods training, coordinating network designs and methodological evaluation processes.

The first identifying characteristic of this master tactical component is a Common Global Faculty style. This includes four sub-characteristics. First is the corporate intentionality of a staff standing as one body in the midst of a single task. The second is an intentional stance of serious engagement in a particular task out of responsibility for all mankind. The third subcharacteristic is an interior discipline resulting from an acceptance of the task as a necessary assignment to accomplish a common mission. The fourth is an adequately equipped faculty to secularly communicate a common mythology throughout the training program.

Pedagogical Methods Training is the second identifying characteristic of this master tactical component. It includes curriculum creation, comprehensive research methods and imaginal methods for all age levels. The practical training involves actual teaching situations, including preparation, dissemination and evaluation of pedagogical material and methods. Structural dynamics include training within a regional structure which is part of a global network. Essential to leadership pedagogical training is spiritual nurture, characterized by self-discipline and grounding in the heritage of the past in order to create a new future.

The third identifying characteristic of this master tactical component is a Network of Coordinating Designs: the coordinated action which enables faculty to operate commonly. Central coordination is the clearing-house for assignment of faculty to arenas where they will be most useful to the current strategic purposes. Enablement is the financial and material back-up for programs. Training structures are the local avenues through which the pedagogues reach local leaders. Permeation design is the methodology by which the leaders are able to reach out and prepare societal arenas for change.

The fourth identifying characteristic of this master tactical component is Methodological Evaluation Processes. There are four sub-characteristics which follow. Research gathering points to the continuous collection of data concerned with current developments in training. Dissemination of methodologies points to the formal and informal means of evaluating effective grassroots training methods. Continuous evaluation assures the constant overseeing and reflection upon the results and effects of all grassroots training methods. Comprehensive information flow methodologies are concerned with evaluation of methods which deal with making information immediately available to local leadership.

## GRASSROOTS TRAINING APPARATUS

### Methodologies Training Constructs

Methodologies Training Constructs provides the social dynamic of training local leadership as part of a global network on behalf of the local community. The faculty will embody and convey to the leadership trainees qualities and skills effective in social reformulation. As a vehicle for these, Methodologies Training Constructs will include leadership curriculum, conductive methods, operational designs, motivational tools and environment impact. It will relate local to global in the area of leadership development, providing courses and training in a regional construct. The tactic operates within the arena of the training itself which is understood at the deepest level and thrusts newly trained leadership into the social structures of the local community. Its external relationships, enablement, research, evaluation and its covenanted faculty are provided by the other tactics of this component.

### Leadership Curriculum

Leadership Curriculum is intended to utilize a globally common curriculum for the development of leaders. Global Commonality intends to prepare a common curriculum which provides leadership with a common mind yet allows for local participation. Foundational Reading intends to provide leadership with all resources needed to prepare curriculum. Secular Evangelism is that aspect of leadership curriculum which provides the methodologies that will deeply impact local man with his own experiences. Re-created Mythology will provide leaders with a story about the significance of leadership responsibility for corporate intentionality. Short Courses aids in the training of leadership by providing momentary shift in concept grounding.

### Conductive Methods

Conductive Methods is the instruments, mediums or techniques used by the faculty to convey the content. Pedagogy Skills provides specific techniques for effective leadership utilizing such methods as short courses, corporate writing, practical experience and format design. Research Techniques investigates the analytical tools of skill development, creates research models, analyzes each teaching situation and sharpens workshop methodology. Social Methods provides the instruments for examining and strategizing alternatives of a particular social grouping such as grids, problematting, brainstorming and workshopping. Spirit Contexting provides the vehicle for relating the depths of local man to the comprehensive dimension of his life through rituals, a common covenant, informal conversations and secular constructs. Consensus Methods provides a means for training individuals in a depth understanding of participation in group decision-making.

## Operation Designs

Operation Designs is the basic practical arrangements and alliances necessary to implement the training process. Scheduled Seminars develops trained leaders in all areas of the local community. Practices Co-ordination ensures community research on training needs, and an ongoing resourceful tool for making decisions relative to leadership training process. Co-operative Policy ensures a teaching faculty that speaks to various age levels, and a linking of the teaching process to formal educational institutions. Faculty Guild allows for an accreditation or qualification process within the ongoing development of a teaching staff. Community Survey ensures a sensitivity on the part of the leadership training faculty toward all areas of community need.

## Motivational Tools

Motivational Tools is methods, techniques and exercises intended to explode creativity and develop interior discipline as well as deepening awareness and intensifying self-consciousness. Accountability Framework motivates leaders holding them accountable to the decisions they have made and providing absolution for freeing the future. Experimental Singing is a motivational exercise which re-creates traditional songs with new words and styles of presentation for missional communication and rehearses the groups' understanding of life. Contexting Constructs is a motivational technique which tells the story that sets the stage for an event to come off. Intentional Conversation is a motivational method which uses structured means, such as art-forming movies and spirit conversations to deal with the life stance, and to provide opportunities for reflection which evokes self-consciousness. Spirit Exercises motivates the leader to develop his own interior discipline by consulting those who have influenced his reflections, decisions, and actions.

## Environmental Tools

Environmental Tools is the utilization of decor, media, intentional celebrations and edge literature displays to create compelling settings and provide a context conducive to effective leadership training. Intentional Audio prepares a compelling sound setting appropriate to the intention of the task at hand. Imaginal Decor creates visual images that confront and sustain a particular context. Literary Displays provides the rational context by evoking awareness and motivating a deeper understanding, using books, pamphlets and other appropriate materials. Celebration Motif is the design that unifies and intensifies the context and symbolizes the individual's freedom to live with failures and renew himself for accomplishing the intent. Media Exploration uses media to provide the dynamic visual field in which the imaginal context enhances the meaning of the curriculum.

## GRASSROOT TRAINING APPARATUS

### Sustained Covenantal Faculty

A Sustained Covenantal Faculty is a group of people who embody the leadership style they are communicating. The faculty is composed of people of all age phases, social, economic and professional backgrounds who share the mission of developing corporate and socially effective leadership wherever it is required in local situations around the globe. The faculty maintain a covenanted discipline to hold themselves accountable to their common mission and to enable effective, mobile, diverse, teaching teams. Nurture of spirit depths enables the necessary visionary work in these times of chaos, and the stance of possibility, the ability to minister to human suffering, and rehearse their self-understanding. The training of the faculty is relevant to the edge of social need. The rehearsal of a common memory gives a common content as that the faculty is interchangeably effective. Other tactics in the component relate by providing curriculum, organizing practices and training objectives, and providing long-range plans.

### COVENANTAL DISCIPLINE

Covenantal Discipline sustains the faculty through a relationship based on a corporately developed covenant and discipline which holds them present through specific and symbolic accountability and absolution. Accepted Covenant enables the faculty to be clear on the context of that covenant and its implied intent through corporate discussion and periodic re-evaluation of the covenant. Accountability and Absolution rituals hold the faculty in corporate rehearsal of rites and rituals which lift up accountability and absolution as a missional group. Assignment Rationale provides a common understanding of the reasons for assignments. Time Commitment objectifies the covenant in specific terms of time assigned to the common task. Role Definition gives clarity to the faculty as to their individual and corporate role in the structures as enablers of creative and responsible living.

### SPIRIT NURTURE

Spirit Nurture intends to nourish the faculty in spirit to create self-consciously his own destiny thereby releasing a resurgence of motivation for spirit grounding, the development of common rituals, unifying symbols, intentional decor, and corporate myth writing. Common Rituals will provide rituals that lift up the possibility in life as it exists. Spirit Grounding will provide structures which release the spirit, such as celebrations, rationales, conversation constructs, and songs. Unifying Symbols will provide a means of holding up the faculty's common story. Corporateness Development will equip the faculty to stand with power as a united and disciplined body. Mobile Decor will provide symbols and models in any given situation.

## FACULTY TRAINING

Faculty Training sustains the faculty through providing dynamic common teaching methodologies, pedagogical structures, global context and structural diversity. Dynamic Methodology requires the development of a clear vision, an honoring of the contextual purpose, and a vital flexibility in keeping with the purpose of the training. Pedagogy Refinement emphasized the dynamics present in the corporate retooling and peer evaluation resulting in an affirmed teaching style. Expanding Context places upon the faculty the necessity, through study, for a creatively expanding understanding of their own global context in relation to the vision of the task before them. Style Diversity seeks to affirm the unique gifts of individual faculty in light of the contribution those gifts make to furthering the value of personhood in the life of the corporate body. Priorship Rehearsal describes that faculty training structure that permits the acting out of the prior role, as well as developing additional methods of teaching the prior role to the group.

## COMMON MEMORY

Common Memory sustains the faculty through common experiences, in corporate study, and societal research that provide a corporate memory, story and images. Corporate Study provides for depth objective understanding of the materials to be presented through charting and reflective discussion. Societal Research undergirds the faculty by providing raw data gleaned in common reading and research assemblies. Data Interchange allows for uniform sharing of accumulated wisdom among the faculty. Common Story provides the faculty with a way to rehearse the common context and long-range vision of their missional thrust. Corporate Writing is an effective method for incorporating and distilling the insights of the mind of the faculty.

## SYMBOLIC STYLE

Symbolic Style sustains the faculty through a symbolic style that embodies the corporate life and missional thrust necessary for the task, which includes intentional dress, and an affirmative and futuric stance. Common Stance rehearses to the faculty its common mission and enables the power of a corporate task. Creative Non-chalance enables the faculty to stand with resilience and non-defensiveness, using humor, personal examples and other indirect methods to embody the style that enables others to recognize their own creativity. Futuric Roles points to the forging out of the roles demanded by the future in the areas of life phases, male-female ontology and vocational engagement. Visionary Images freight realistic possibilities out of which both faculty and participants operate to capitalize creative planning for necessary social change. Affirmative Stance provides an atmosphere that communicates the fact that all of life is good.

## GRASSROOTS TRAINING APPARATUS

### Enablement Coordination Centrum

Enablement Coordination Centrum is one of the network of central clearinghouses where leadership training is coordinated, assignments are made, supplies are provided, leadership development financing and budgeting are handled, travel arrangements are made, and distribution of supplies is managed. It is designed to coordinate the enabling of leadership development. It embodies the servant of servants role, and assigns personnel according to particular abilities and deploys them to the appropriate training facilities. Enablement Coordination Centrum is the intermediate coordination action between the general strategies developed by Inclusive Formulation Design and their implementation by Methodologies Training Constructs, Sustained Covenanted Faculty, and Methods Evaluation Interchange, in which material and human resources are found, coordinated, and assigned, to insure the efficient functioning of leadership training.

### Financial Management

Financial Management keeps records of course income, leadership fees, and expenditures such as airline fees, film rentals, leader's personal travel expenses, materials, and equipment purchases which are necessary to assure the ongoing programs for leadership training. Intentional Budget prioritizes short range future projects within the estimated income to insure that resources are effectively placed where they will have the greatest impact. Accounting Procedures systematizes non-standard bookkeeping dealing with cash reserves. Special Grants seeks out financial grants or low-interest loans from government agencies, corporations, and other benefactors. Training Fees creates an income for the self-sufficiency of the geo-social unit with enough surplus to provide funds for the corporate leadership development. Scholarship Funding locates continuing sources of financial support for the training of those who cannot afford the fees set.

### Resource Coordination

Resource Coordination is imaged as a curriculum archive network and personnel skills system, whereby all the practical criteria and rationale data is coordinated for use in faculty assignments and course planning. Interlinking Regions is an information system designed to hold relevant curriculum and pedagogical data for use in various regions with commonalities in specific social arenas. Faculty Ratings is a system whereby comprehensive data is kept for individual faculty in regard to advancement in common skills training abilities as well as unique gifts. Materials Cataloguing is a data bank which files all the backup data and supplies inventory needed by the coordination centrum's routine activities. Regional Substations is the "home office" which keeps curriculum materials. Dispatch Procedures keeps track of curriculum materials and holds the dispersal rationale according to scheduled demands and emergency needs.

## Deployment Coordination

Deployment Coordination assigns staff to the appropriate place according to the particular situation and the backup data from the resource bank and to handle the necessary travel arrangements. Requested Pedagogues receives and catalogues demands for teachers. Resource Availability lists and locates current available manpower and materials resources. Pedagogy Assignments assigns qualified pedagogues for each particular situation. Travel Arrangements makes the necessary travel plans for the pedagogues and provides the required materials. Pedagogue Briefing communicates to the assigned pedagogue the necessary information required to meet the needs of his special task and also his means of transportation.

## Embodiment Style

Embodiment Style designs space and spiritizes the centrum staff personnel to create a style of corporateness. Gracious Stylizing intentionalizes the appearance and the manner of the staff of the centrum that they embody the role of gracious servant. Decored Space complements the impact of the staff style in holding imaginally before all those who enter the comprehensiveness of the mission. Intentional Rites sustains the enablement staff, in order that they periodically remind themselves of the context and the purpose of their assignment. Intercultural Staffing rotates assignments as a further means of reminding both enablement staff and patrons of the comprehensiveness of their mission, and as a training tool in enabling staff to appropriate the insights and methods of other cultures. Assigned Time intensifies the intentionality of the life of the enablement staff to increase their ability to serve practically and symbolically.

## Production/Distribution

Production/Distribution is responsible for the printing of vast volumes and kinds of materials needed for leadership training, and for their packing and distribution to the correct course or consultation locations. Supplies Rationale is the accessibility of materials from paper to production machinery. Printing Model deals with the whole printing context ranging from materials to printing machinery. Systematic Aids is designed to package and distribute course enablement packets, such as printed course materials, special printed materials and brochures, and to see that the packets are dispatched to the appropriate locations. Comprehensive Mailings is designed to build a rationale for special mailing to the leaders to keep them updated on curricula changes, course schedules and nurture materials. Produce Audio/Visual is designed to route the necessary films, projectors and art forms to course locations.

## GRASSROOT TRAINING APPARATUS

### Methods Evaluation Interchange

Methods Evaluation Interchange evaluates all aspects of the strategic component. This includes gathering all relevant data, storing it, analyzing it and preparing reports. The intent is to provide for continuous revision and refinement of the leadership development procedures. The vigorous arenas of thrust are curriculum evaluation, which assesses content, methods and materials; evaluation centrum, which coordinates the data collection and reports; community performance, which analyzes community impact; staff style, which evaluates staff effectiveness, and spirit journey, which analyzes the spirit journeys of the participants both during and after the training programs.

### Curriculum Evaluation

Curriculum Evaluation gathers data to assess the curriculum content, methodology, and materials employed in the training structure. Localized Data employs and examines the data in light of insuring that the curriculum is applicable to needs of the specific area in which it is being used. Methodology Effectiveness analyzes the methodology used with reference to its impact on the particular social, spiritual and intellectual methods most suitable for training objectives relative to the trainees. Materials Assessment evaluates the materials of the program with regard to their appropriateness for the group, situation and desired results of the program. Comprehensiveness Evaluation promotes inter-relatedness of program components and highlights areas where weaknesses or omissions exist. Feedback Survey employs feedback to collect concrete staff and participant response to the program as it is implemented in a given area.

### Evaluation Centrum

Evaluation Centrum's primary purpose in relationship to a leadership network would be to evaluate and hold the various aspects of the network accountable, and determine the effectiveness of the total program to form a basis for any needed re-structuring. Research Gathering insures that all available data related to evaluation and methodologies is comprehensive and regularly collected. Designs Assessment is aimed at determining the adequacy of the format for the methodology, the over-all structure and the course comprehensiveness. Coordination Effectiveness deals with the evaluation of the centrum in relation to its adequacy in creating long-range plans, rationalized data and precise records of income in order to assure a flowing system. Communication Evaluation assesses the entire communication process to aid in insuring precise communication interchange concerning the current methods and any information necessary for the adequacy of the structure. Data Reports receives the evaluated data, gesticates it, and organizes it into imaginal reports ready to be communicated.

## Community Performance

Community Performance measures the ability of the leadership development network to produce trained leaders who are effective in meeting community needs in a global context. Community Analysis uncovers the community leadership by means of establishing a comprehensive grid of the community including the power structures, geography, economic and cultural makeup. Global Needs establishes the comprehensive context for evaluation by laying out global requirements and prioritizing them. Program Effects is concerned with measuring the effects of the program on the established social and institutional structures within a given community. Leadership Follow-up determines how a person, having gone through the leadership training program, is doing in three years, especially in the areas of his leadership ability to stand in the given situation. Program Updating concerns itself with the comparison of similar programs, the use of relevant methodologies and the implementation of the latest techniques.

## Staff Style

Staff Style evaluates the performance and effectiveness of the entire staff in relation to their decision to teach, their methodological prowess, and faculty-student inter-action. Pedagogy Report gathers data on staff pedagogical strengths and weaknesses. Staff Meetings enables evaluation and model building in such arenas as staff effectiveness and faculty-student inter-actions. Corporate Conversations enables staff reflection on the corporate staff dynamics and sharing of insights for improving staff style. Objective Accountability holds the staff over against its previous decisions and models. Quarterly Evaluation provides for periodic intensive evaluation sessions.

## Spirit Journey

Spirit Journey uses a variety of tools to evaluate the participants in their progress toward a practical spirit maturity, including such goals as facing the given limits, appropriating selfhood, adopting corporateness, and being open to possibility. Class Observation will evaluate the student's spirit journey by observing in the classroom situation with an evaluative team. Participant Interviews will evaluate the student's spirit journey through the interviewing of each student by either the staff or an outside evaluating team. Participant Journals will enable each student to evaluate his own spirit journey. Staff Reports on each participant's spirit journey allows modification and refinement of methods within the course of a particular training program. Follow-up Reports months or years after the completion of the student's training will produce data on long range spirit impact.

## GRASSROOTS TRAINING APPARATUS

### Inclusive Formulation Design

Inclusive Formulation Design creates the overall rationale and gives strategic form to the corporate leadership development network. The design integrates the actual and projected needs in the areas of personnel, curriculum, and finances into an overall rationale. The design would grid the arena of concern relative to the type of training required, the persons to whom the training should be directed and related needs, in order to determine the personnel requirements, the course design and an assignment rationale relevant to leadership development needs. Inclusive Formulation Design would discern projected needs in the field of leadership development and would construct a longrange timeline on the basis of these projections, as well as an overall strategy. Inclusive Formulation Design is concerned with developing the strategies, the objectives and the organizational frame upon which the tactical actions of the corporate leadership development network would be ordered.

### Penetration Designs

Penetration Designs within the arena of Inclusive Formulation Designs, refers to the creation of permeation models, reports on previously used penetration models, and the gridding of specific geographical areas for the purpose of establishing the kinds of training which would be necessary to reach a specific group. Organization Permeation enlists the cooperation of industrial and social structures in a mutual training program. A Prospects Grid would consist of a file of potential participants compiled from a prioritized geo-social grid and recommendations received from contacts. Recruiter Development is concerned with the manner in which people would be selected and trained to make recruitment contacts. Local Coordination deals with grass roots participation and suggests concrete recruitment tactics. Quota Establishment tends to set recruitment goals in specified arenas.

### Projection Structures

Projection Structures refers to projection of prioritized needs within the arenas of operational requirements and model creation, using timeline planning techniques. Strategies Timeline insures the progressive actualization of objectives by setting intermediate and final deadlines. Prioritized Needs sets up the hierarchy of values in such areas as personnel, finance, penetration, and curriculum. Projected Needs insures the fulfillment of anticipated future needs through futuristic planning. Nurture Models facilitates the continuation of momentum initiated by the training program. Financial Model insures that the budget is tactically and missionally oriented.

## Curriculum Rationale

Curriculum Rationale is designed to provide a framework for curriculum development and evaluation applicable to designated situations. Curriculum Goals would allow a representative body of leaders to determine the concrete objectives of leadership curriculum designs. Course Design provides structures for the content of the courses for effective leadership development training in a given arena. Value Determination determines the main thrusts for a given situation by local people. Translation Timeline develops a timeline for translating the leadership training curriculum building models into foreign languages for that local situation. Evaluation Criteria intends to provide a model for evaluating the effectiveness of the leadership curriculum in that specific community.

## Leadership Criteria

Leadership Criteria is designed to establish standards for selecting leaders on the basis of diversity, competence, skills prowess, and adaptability. Personnel Analysis insures a comprehensive basis for leadership drawing from diverse cultural, age, and racial groups. Evaluation Procedures establishes the standards by which the effectiveness can be most accurately determined. Skills Availability provides an index of skills to be found within the leadership network. Task Delineation outlines the necessary actions to perform a particular task. Assignment Flexibility refers to the need for leadership trained in various skills to enable them to accept rotational assignments as demanded by the particular needs to be met.

## Coordination Network

Coordination Network is designed to facilitate the coordination of leadership training designs by constructing enabling planning designs, coordinating and standardizing communication procedures and providing the rationale for activities scheduling. Enablement Design provides planning and guidelines for specific areas of enablement. Communication Channels suggests specific modes of communication to facilitate information flow. Inter-unit Liaison insures regular interaction between specific leadership task forces. Activities Collation enables smooth and efficient functioning of programs. Problem Solving Unit Workshops would enable several leadership units to work corporately at solving problems too difficult to be solved individually.

## DEMONSTRATION PROJECT DEVICES

Demonstration Project Devices is a master tactical component intended to catalyze and activate communities through demonstration-models employing data exchange, covenanted global task force, and remotivated primal communities. This intent is characterized by Local Demonstration Module, Local Engagement Channels, Demonstration Network, and the Local Social Demonstration.

The first identifying characteristic of the master tactical component is the Local Demonstration Module which is a covenanted group of people, embodying the style of global servanthood and under strategic assignment to a target community. They function as transparent catalysts within a community through expansion of the of the servanthood vision and the re-imagining of the possibilities of authentic humanness. Through their obvious, celebrative life style they demonstrate a way of being and doing the "yes" to life as it is given. Their internal operating commonality is characterized by consensus methodology, and prioritized strategies set within the trans-establishment style.

The second identifying characteristic of the master tactical component is Local Engagement Channels. Remotivated primal communities and demonstration projects are models that are avenues of trans-cultural wisdom exchange between local men across the globe as well as actual training centers that allow men the opportunity to experience engaging in life authentically. They are also a means of experiencing consensus as a basis for decision making and expose men to economic and political alternatives.

The third identifying characteristic of the master tactical component is a Demonstration Network which brings about visible community renewal, and thereby sparks public opinion to activate change. This activated public opinion would be the push to create a disciplined cadre dynamic bringing about local involvement. A grid of community organizations and involvement opportunities allows local man possibility for authentic, signal engagement, including effective decision making. By releasing comprehensive models, undergirded by a network of global needs and opportunities, local man is given a way to see his life as expenditure for human needs, within the total social process.

The fourth identifying characteristic of the master tactical component is the Local Social Demonstration which is an information-sharing system enabling model reduplication and sharing of operational manuals, data, and techniques. In addition, this system holds cross-cultural wisdom guaranteeing local man access to heritage and humanness stories. Access to global information and the opportunity to research issues that mark his time enables local man to forge authentic decisions.

## DEMONSTRATION PROJECT DEVICES

### Generated Demonstration Models

Generated Demonstration Models is the initial basic research and analysis of the community, a community organization scheme, a vision of needs for the future and a delineation of operation means for the ongoing process of recreating the local situation. It is the source of models that demonstrate techniques, methods and designs to impact the crucial areas of the community structure through indirect methods. Keeping in mind an objective appraisal of effectiveness, these models will direct and give clarity to each individual situation. By engaging local leaders, these models create an ongoing intentionality through the information exchange between the generalized model and the specific local community. Generated demonstration models relates to the other four primary tactics by undergirding and supporting them with contextualized model building. It is constantly modified by input from the other four. It singles out key leaders to be catalyzed and describes how to train collegial forces. Finally, it is sustained by common cultural signs.

### Analytical Research

Analytical Research states the underlying ideology, receives and compiles data, evaluates and coordinates existing models, and researches the given community to provide the needed information for generated demonstration models. Community Dynamics researches and collects data to clarify the dynamics operating to create the present situation. Data Screen defines the criteria and prioritizes the information coming from the community. Stated Alternatives delineates avenues of action to be researched and analyzed. Community Mindset analyzes the given situation and researches it to provide clarity in terms of their life stance as a community. Present Models evaluates and coordinates existing models to provide the necessary information for demonstration models.

### Methodological Techniques

Methodological Techniques insures reliable, reduplicable models by providing a basic methodology for training a common operating base for the generation of demonstration models. Leadership Servanthood puts into usable form the wisdom necessary to train leaders under the image of developing leaders as servants. Missional Methods is a comprehensive construct of the training necessary to bring consistency and power to the arenas of corporateness, symbolic life and missional engagement. Project Reduplication appropriates the necessary histories, priorities, insights, procedures and concrete successes and failures of the past to ensure the effective reduplication of a reformulation project in another location. Selective Recruitment increases methodological reliability through the maximization of wisdom input sources by including all vocations, denominations, ethnic and racial groupings, all life phases; and by including both interested and disinterested parties in model generation. Resource Channeling provides the pencils, paper, slide projectors, chalk, tables, snacks, typewriters and orders of the day that give substance and form to methodological techniques. -30-

## Permeation Plan

Permeation Plan builds the necessary models which aid missional forces in working through existing structures to bring about community reformulation and activation. Model-Builders Enlistment intends to bring together key local people to construct the needed models for permeating community structures. Troops Assignment intends to provide the necessary manpower for carrying out the models. Target Location intends to decide which community structure is the most significant in terms of permeation. Leadership Councils intend to gather all the wisdom that will enable the model to be most effective. Selective Publications intends to make the model public through imaginal symbols

## Pilot Project

Pilot Project makes visible to the coordinating representative group of that community the feasibility of a specific model, through which model-building is shown as a practical and necessary tool of structural reformulation. Coordination Committee submits information that is pertinent to the model and assists in the ordering of this data, enabling to the maturation of a pilot model that will be later presented as a possibility for further structuring. Experimental Force actively engages itself in the data submitted to bring a model into actuality, thereby holding the tension between its force and the over-all pilot project. Professional Consultant establishes an eschelon for all models and the communities that will be affected by the imposed reformulation. Evaluation Projects levies a consensus as to the validity and feasibility of the pilot projects models. Task Force governs the actualizing or taking-placedness of models and holds the entire model building in motion, and that activity enables the pilot project dynamic to come off.

## Practical Enablement

Practical Enablement keeps models in peak effectiveness by offering necessary maintenance, including legal and financial aid as needed, troop deployment and evaluation of priorities and time designs in order to aid the generated demonstration model in its initial covenanted task. Assignment Rationale intentionally deploys the the available troops. Financial Undergirding obtains necessary funds, creates a rationale for expenditures by the financial task team. Community Location locates and obtains a central working and meeting base within the community. Contextual Covenant provides the rationale and the articulation of purpose for the various groups of people, including researchers, model builders and local leaders. Legal Aid procures the necessary information to assure a valid project.

## DEMONSTRATION PROJECT DEVICES

### Activated Local Leadership

Activated Local Leadership intends to display how the wisdom and power of existing community membership may be catalyzed into leading committed community reconstruction. The tactic will motivate community organizations, grounding the image of change at the grass-roots level, and demonstrating the new engagement style of sacrificial service. It relates to Generated Demonstration Models by providing the practical guidance and application for this generating. It relates to Empowered Collegial Forces by initiating and engaging these forces in practical involvement. It relates to Community Structures Permeation by providing the direction and priorship necessary for strategic permeating. It relates to Common Cultural Signs by embodying these signs and contextualizing the necessity of their creation.

### Initial Cultivation

Initial Cultivation is intended to lay the ground work (foundation) for penetration into the leadership dynamic of the community and raise up strong self-conscious grass roots leadership. Leadership Grid intends to analyze existing leadership in the community. Prioritized Prospects intends to seek out the obvious and hidden leadership in community and decide strategy for engagement in the community. Motivation Stories is intended to incite enthusiasm and begin the process of changing paradigms. Penetration Meal-Construct intends to give imaginal and intentional style which will address those present. Intentional Celebration intends to reimage local leaders as global citizens.

### Spirit Nurture

Spirit Nurture is the effective energizing activity which local leadership adopts to perform beneficial representational roles in their communities. Spirit Celebrations are intentional celebrations which place before the participants their goals and their corporateness. Ecclesiola Structures and collegiums provide very effective means for the practice of corporateness required to activate the local leadership. Art-Form Conversations make use of poetry, literature and other art forms for spirit nurture. Secular Odyssey is an intensive retreat which includes elements of art-form conversations, spirit conversations, and rehearsals of corporateness and accountability. Solitary Trek is the use of a personal journal which enables one to reflect on one's own spirit journey through meditative readings, contemplative montages and the writing of personal resolutions.

## Priorship Motivation

Priorship Motivation is the process that illuminates the possibility and systematically provides the tools and motivity for the development of corporate leadership prowess. Contextualized Priorship delineates the activity by which the necessary operating images of the priorship role are provided and internalized. Priorship Developmental assignments is the process by which the corporate leadership role assignment rationale is tailored to the individual prior's present level of development and anticipated stages of advancement. Geo-Social Responsibility indicates the actualized methodology of assigning individuals for the purpose of developing a sense of responsibility and caring for the world. Symbolic Example is the tactical methodology of directly and indirectly presenting appropriate stylistic images of priorship. Corporate Engagement is the activity through which the context for priorship is radically intensified through participation in corporate work projects.

## Practical Preparation

The tactic of Practical Preparation describes the equipping of potential leaders with a common memory, intellectual prowess, and experiential grounding for the sake of effecting mobilization for community reconstruction. Cultural Curriculum is the teaching of cultural courses for the practical and theoretic contextualizing of potential community leaders. Project Study is the observational study of signal community reformulation projects as models for one's own community. Seminar Skills gives the formal intellectual tools, such as charting, short courses, and orchestration, necessary for extending local leadership. Workshop Methods enables a working knowledge and facility with the social methods of gestalting, problemating and battleplanning. Leadership Apprenticeship is 'on the march' training and involves participating in recruitment and other such missional practices.

## Structured Discipline

Structured Discipline reminds the leadership dynamic of their decisions regarding particular roles in a community in tension with the missional thrust of that community. The Accountability Structure is the tactic in which colleagues hold each other over against their tasks and also their decision of their covenants. Strategic Assignment refers to tasks intentionally given to leaders to engage them in nitty-gritty and to develop their pedagogical and prioriting skills. Regular Communication serves as structured discipline through collegial contact relative to assignments and individual brooding sharing. The Corporate Covenant made individually by local leaders is the symbolization of their decision to assume responsibility for their community on behalf of the world. Structured Solitary points to the necessity of holding the 'solitary decision' pole and refers to personal reflection and future projections on the part of the individual.

## DEMONSTRATION PROJECT DEVICES

### Empowered Collegial Forces

Empowered Collegial Forces points to a trained body of covenanted people. The task of this group is to become the sign of local trained people who address the community with the possibility of developing their own skills for the community demonstration. This tactic will provide methods of communicating to the total community the image of local man being trained to serve his community so that the local man will be motivated to become the trained community servant. The empowered collegial forces relates to generated demonstration models by initiating signal training demonstrations which provide the symbolic power for the community reformulation model. It relates to catalyzed local leaders by creating a pedagogical opportunity for grassroots man. For the community structures permeation, it grounds the local man with concrete experiences. For the person who is involved in common cultural signs, empowered collegial forces is the missional image of concrete possibility for using his or her creativity.

### Servanthood Roles

Servanthood Roles publicizes the ongoing servant functions in the community as a continuing possibility for everyman by pointing to what is specific and noteworthy in all roles, so local man can vision his function out of the context of local community need rather than solely out of his own past performance. Delineated Tasks objectifies present functions in the community and names them. Celebrated Worth acknowledges the concrete value of the tasks one has picked up and the needs filled by these tasks. Opportunities Expose presents the role models for filling the needs of the community. Imaged Mobility demonstrates the possibility of role shifts. Embodied Role allows a person to pour all his self-hood into serving the community through his particular roles.

### Symbols Use

Symbols Use creates and makes visible signs, symbols, and decor which will be a witness, fostering the image expansion wherein local man sees himself as responsible locally and globally. Missional Decor intentionally uses decor to hold the mission before people. Corporate Symbols weld collegial forces into a signal missional purpose. Community Story is symbolic of the community's identity and its particular stance toward global responsibility. Collegial Rituals rehearses what it means to be a body of people about a common task. Common Songs create songs which reflect the community's mood.

## Image Presentation

Image Presentation recognizes the leadership of the community through stories of local man's participation in the honoring of community leadership. Engagement Bureau enables the coordination of image presentation by providing the persons who can give special presentations as well as eliciting engagements from community committees and organizations. Contextual Presentation does research in creating and collecting contextual stories and human involvement stories of how local man participates in giving direction to his community, to be used in publicity, brochures, and mass media. Mass Media is the vehicle for impacting local man by using contextual presentations and enables the coordination in planning for communication in community newsletter, newspaper, radio, T.V., and other art forms to be displayed in public places. Honoring Leadership is directly involving oneself in researching and setting up types of situations to honor local leadership who have decided to take the local community seriously, and who can become a symbol of renewed and revitalized local man. Operating Design is the coordinating body which develops the strategies and timelines for impacting the community on a stable and even rhythm.

## Motivty Messages

Motivty Messages is the oral and written story inspiring community engagement. Miracle Tales relates seemingly impossible events to inspire the community. Short Courses are simply short statements of wisdom which enable an individual to relate to a specific situation. Motivational Briefs is the short heritage tales and training opportunity descriptions which generate enthusiasm for community engagement. Role Articulations tells stories of individuals' role playing possibilities as they are related to the needs of the community. Possibility Brochures lists and describes the community needs for leadership.

## Internal Enablement

Internal Enablement supports and sustains the collegial forces in carrying out their specific missional tasks by providing materials and services supplementary to those assignments. Speaker Preparation serves by assessing needs for and assuring adequate orientation and instruction of speakers for specific assignments. Construct Supply furnishes constructs, consult guidelines, lecture 4X4's, and other common outlines for recurring engagements. Training Sources provides for the identification of needs for, and assignment of individuals to schools, seminars, or workshops for training in pedagogy and short course presentation. Conversation File serves by collecting and prioritizing a reserve library of on-the-spot conversations to meet particular situations. Back-up Personnel tactics will establish a corporate pool of personnel to serve as replacements for collegial forces assigned to specific tasks, and by providing child structures.

## DEMONSTRATION PROJECT DEVICES

### Community Structures Permeation

Community Structures Permeation enables an infiltration of local structures in order to identify their gifts and show the possibility of utilizing these structures to bring about necessary social changes both from within and without. It intends to provide a common focus for community groups through opening communications between them, providing a pipeline to the power and financial structures, and encouraging grassroots involvement. In relation to the other tactics, it indicates the thrust of Generated Demonstration Models by providing data in areas for research. It impacts Activated Local Leaders by positioning one to identify leaders and to provide the necessary influence to catalyze them to action. The tactic affects Empowered Collegial Forces since it indicates what training is needed, secures course locations and finances and directs trained forces to areas of need. Its relatedness to Common Cultural Signs shows up by enabling one to see where symbols have collapses in the community and to determine what signs are needed.

### Node Participation

Node Participation involves participation in public gatherings where citizens meet to workshop community needs and formulate long-range plans. Public Meetings involves intentional attendance at public meetings, such as parent/teachers' associations to see that they maintain a comprehensive outlook. Community Forums intends to infuse irregularly scheduled community gatherings with the concept of missional thrust through asking questions and offering suggestions. Neighborhood Guilds intends to put people on the various guilds in the community who will push for a global view in the midst of the needs of the local situation. Polity Councils permeates the polity structures in the community through attendance at their meetings, electing and influencing officials sensitive to needs of the community and cognizant of the relation of the community to the globe. Regulatory Boards points to the activity of permeating community structures responsible for short and long range planning and regulation, in order to affect priorities and decisions on where the community is going.

### Resource Identification

Resource Identification is demonstrated by gridding and researching all the present social structures and institutions and analyzing their effective interaction within the community at large. Organizational Gridding maps out the community to find what organizations and businesses exist and where they are located. Institutional Research studies the existing structures, institutions and social organizations to identify their intentions and activities. Resource Priorities determines the community structures needing to be permeated and sets up a time-line. Effectiveness Analysis measures existing institutions and organizations for overlaps and gaps in relation to meeting community needs and solving community problems. Resources Coordination attempts to lead the community institutions and organizations to correct the existing overlaps, gaps and communication difficulties.

## Leadership Analysis

Leadership Analysis locates and identifies community leadership and collects and evaluates needed information to plan the priorities of permeation approach. Political Leaders intends to locate, identify and rate key political personnel in the community in order to determine catalytic points. Key Businessmen intends to evaluate and community economic leaders in order to identify the potential blocks and gifts in the community. Familiarization Situation intends to provide a guide of opportunities to become acquainted with leaders of the community in order to gather on-going data for leadership analysis. Grassroots Leaders is intended to sense after and identify those citizens within a particular community or neighborhood who are the existing appropriated cultural leadership. Approach Models intends to create from data and analysis those models which would enable appropriate initial and on-going contacts with community leadership.

## Missional Expenditure

Missional Expenditure is reimagining the stance toward vocation by permeation of missional involvement through the use of short courses, hero stories and popular preaching. Hero Publicity intends to lift up the significant involvement of missional individuals as a sign of possibility to the people around him. Popular Preaching is a means by which man is addressed with the Word of possibility about his life in the midst of any situation through informal short courses. Missional Employment emphasizes the requirement of each local man to choose his vocation for the advancement of the whole community, in the light of the community's needs and goals. Signal Involvement is the demonstration of missional expenditure through concrete vocational engagement which emphasizes this vocation as a mission for the community. Inexhaustible Servanthood stresses vocational engagement as total complete involvement doing what is necessary within the community.

## Communication Utilization

Communication Utilization permeates the mass media regarding community needs and opportunities through such devices as radio and television spots, bulletin boards, newspapers and brochures. The permeation of the Audio-visual Media is accomplished through the planning and implementing of radio and television spots and the coordinating of community announcements and issues. The permeations of the Printed Media is effected through selected columns in daily and weekly newspapers and emphasizes on question raising articles in local and area periodicals. Telephone Campaigns is the coordinated use of telephone committees for contacting of local residents and organizations with regard to community involvement. Visual Impact intends to permeate the community at large through visual displays such as signs, marques, and other outdoor media. Tract Publication provides an opportunity to permeate different groups and structures through the circulation of strategic literature which also includes public information.

## DEMONSTRATION PROJECT DEVICES

### Common Cultural Signs

Common Cultural Signs is a reminder to the community of who they are. Common cultural signs are unifying in holding the past before the community and directing them toward the future. Common cultural signs accomplishes corporateness, heritage appreciation, sociality and community pride. It pushes the family beyond its own concerns to a wider awareness of globality. As new images are created the community is aroused to action and discovers meaning amid the doing that leads to trust and creativity. Common cultural signs contextualize, inform, motivate and sustain each primary tactic necessary to accomplish Community Engagement Demonstration. For example, the nation of Israel used its common cultural signs to catalyze leaders, rally forces, build models and to permeate non-Jewish sentiment to achieve its goals.

### Intentional Dialogue

Intentional Dialogue intends to provide constructs which will cause groups to reflect about their role as a sign to the community. Conversation Formats provoke personal thought for critical consideration of the whole cultural goal. The Community Forum furnishes opportunity for clarification of community procedures. Media Debates explore community issues to learn the opinions of their audience. Public Addresses are intended to provide opportunity for large bodies to participate in the otherwise limited dialogues. Phase Exchange is a construct for all phases to explore their significant roles.

### Cultural Celebrations

Cultural Celebrations provides opportunity to experience new styles of celebrations and enables adoption of a new stance toward other cultures. Imaginal Publicity intends to arouse interest in the special community events through imaginal advertising. Celebration Decor intends to expand the community awareness of other cultures and the past and to renew what it means to celebrate with a new style. Intentional Pageantry intends to dramatize the various cultural stories with live performances. Community Festivals intends to inspire the community to celebrate its particular heritage through cultural events including song-fests, art-fests, story-telling, feasting and dancing. National Holidays intends to reappropriate the myths and past of a nation in a global and permission-giving context.

## Symbolism Analysis

Symbolism Analysis identifies the existing symbolic stance of the community and provides direction for future planning. Community Heroes intends to lift up heroes as models for individual engagement. Business stance intends to analyze, redirect and revitalize the symbolic life which a business stands before. Social Organization intends to analyze, redirect and revitalize the symbolic life which an organization stands before. Opinion Poll is intended to analyze the symbolic life of the community already in existence. Religious agencies is intended to relate religious symbols to local man.

## Identity Rehearsal

Identity Rehearsal intends to bring self-consciousness to the community covenant through the rehearsal of rituals and through participation in community workdays. Covenant Rehearsal is the way in which family and community continue to rehearse their decision to be a body of people bound together by a common task. Symbolic Obedience provides the ongoing opportunity for the community to work together on a concrete task. Story Recall keeps the community aware of its progress through the written word and other media. Symbolic Accountability intends to rehearse the decision of each individual to be a part of the community. Tourism Context intends to rehearse a story to enable tourism to be seen as a helpful cultural experience in a community

## Art Forms

Art Forms enables the total community to participate in creating the art forms that express the community story and stance through creation of symbols, films and such things as song writing contests. Mural Creation intends to involve the total community in its creation, to spell out the story in detail, to be a constant and permanent sign to community members and outsiders. Symbol Workshops call forth self-awareness of the power of symbols in our lives, clarification of the life story and provides experience in consensus and corporate creation. Story Creation enables the community to reappropriate its past in order to build the future by calling for meaning in every moment. Song Writing calls for celebration of the story of the community and releases the contribution of the greatness of individuals. Film Creation provides a rehearsal of the community story and brings the creators to an awareness of their responsibility to release others through such forms of popular preaching.

MASTER TACTICAL COMPONENT # 4  
ACTIONAL GUILD FRAMEWORKS

Actional Guild Frameworks is a master tactical component intended to formulate missional bodies of people through organizing them into specific task forces characterized by catalytic servanthood exemplification, covenanted local structures, inclusive vocational impact and comprehensive global strategy.

The first identifying characteristic of this master tactical component is Catalytic Servanthood Exemplification. Members of the guild would be living examples of the style of servanthood to the community within a vocation. Their exemplification would catalyze an eventual restyling of all members of their community. A major aspect of this style would be the intentional design of their whole vocational thrust to serve community needs. Guild activities would be a concrete manifestation of their intentional thrust for all to see.

The second identifying characteristic of this master tactical component is Covenanted Local Structure. This structure meets regularly, decides assignments on the basis of consensus methods, and takes care of recruitment for the guild. It is a disciplined body that holds specific accountability for the common task which is articulated through a covenant assuming mutual responsibility. It is nurtured through guild-family celebrations, regular strategic brainstorming, and accountability absolution.

The third identifying characteristic of this master tactical component is Inclusive Vocational Impact. The inclusive vocational impact cuts across all levels of skills in vocational fields to enable every man to see the total impact of his particular area as significant. It deals with all vocations, in order that they might realize their full potential for service. It either acts within existing organizations to transform them or creates new organizations as necessary to fulfill its function.

The fourth identifying characteristic of the master tactical component is a Comprehensive Global Strategy. It deals with developing a network of guilds across the globe, and maintaining communication and coordination among them. It is concerned with impacting a broad base of people. To do this, models will be built to enable the permeation of vocational organizations. Such models will include problemating of the area to be permeated and time-lining to intentionalize the strategic objective. Research and the development of strategic methods will be required. Training and teaching methods for guild members and others with a missional stance is included in this strategy. The Comprehensive Global Strategy will redirect the thrust and concern of vocational organizations and enable them to take responsibility for their local situation in the globe.

## ACTIONAL GUILD FRAMEWORKS

### Initial Impact Organization

Initial Impact Organization establishes guilds in specific geographical areas and life arenas and carries out a planned impact strategy to recruit a local guild or guild complex. Initial contacts will utilize mass media, flyers and personal visits to known colleagues or recommended persons. Speaking engagements will be sought and courses and seminars will be recruited. Follow-up models will push for concrete decisions to be invited to meetings laying out the vision and work of the guild for that particular situation. It draws on Accession Design Research for wisdom on where to start, and how to proceed. It draws on Permeation Models Implementation for concrete sub-tactic models, such as a conversation model. It draws on the Occupation Style Formulation to inform colleagues charged with the recruitment task, on how they stylistically embody what is possible for the proposed guild. It will expect Vocational Nurture Co-ordination to have a thirteen week introductory guild model ready to be implemented.

### Recruitment Rationale

Recruitment Rationale selects and assigns troops according to geographic location and type of visit needed, who will maintain records and write up evaluations. Assigned Rationale develops models for assigning troops according to geographic area, situations of need and timeline. Team Composition determines assignment groupings to recruit in areas and situations where they would be most effective. Visitation Goals decides aims and needs of recruitment in relation to social reformulation demands and the evaluation of the prospects as to openness and experience. Personnel Analysis Characterizes the troops according to recruitment needs relative to a recruiter's gifts and blocks. Evaluation Records maintains files on the effectiveness of contacts and the responses of prospects.

### Prospect Development

Prospect Development compiles an extensive list of prospects to be prioritized for calls. Brainstorm List provides a list of prospects who are assumed to be in need of contact. Journey Analysis keeps an up-to-date file on the spirit journey of particular prospects. Contact Priority decides what individuals or groups need to be approached first. Approach Strategy selects colleagues and troops, singly or in teams, to contact the prospects in certain geographical areas. Prospect Fishing takes advantage of unexpected openings in any situation for minute-courses.

## Presentation Designs

Presentation Designs gets a prospect to agree to a new life engagement through personal contacts, speeches, and mass communication approaches. Visit Models creates a time design for the most effective use of the opportunity to engage the prospect. Mass Communication effectively uses such opportunities as newspapers, radio, television, flyers and speeches. Recruiter Short-Courses develops a file of short-courses that can be used in many situations to impact the intended audience. Presentation Materials develops a number of in-depth presentations with a companion file of additional resource data. Catalytic Questions develops a number of provocative questions to be used in a variety of situations that will bring into focus the possibility and necessity for new decisions about particular situations for the sake of the future.

## Possibility Stories

Possibility Stories impresses prospects with the opportunities for new life decisions in their particular situation through illustrating servanthood success stories, global guild stories and media releases. Story Library develops a file of miracle stories about what has been accomplished through the guild dynamic. Signal Publicity brings to public consciousness outstanding accomplishments from the operation of the guild dynamic. Servanthood Appeal collects stories that appeal to man's innate desire to be significantly involved in his social situation. Personal Illustration invites individuals to give personal witness concerning their experience in the guild dynamic. Global Stories informs, either in person or by some other means, what is happening around the globe.

## Meeting Constructs

Meeting Constructs enables the planning of meetings that will be effective in getting people to commit themselves to the guild or guild complex. Selected Configuration determines the type, limitations, and goal of the meeting. Methods Selection chooses the motivational methodology and decision-forming guidelines to achieve the goal of the meeting. Functionary Preparation orients and briefs the leadership and enablement persons before the meeting. Transformed Space designs the posters, decor, and provides the atmosphere to enable the spirit of the meeting. Expansive Presentation ~~explodes~~ the vision and imagination of the participants, reflects upon the historical procession to this time, and creates the image of the edge.

## ACTIONAL GUILD FRAMEWORKS

### Vocational Nurture Coordination

Vocational Nurture Coordination is the dynamic responsible for the symbolic life of both the build and the whole occupation. It involves the intentional layout of journey designs in such a way that a person's vocational struggles can be dealt with seriously in the context of his lifetime. It works in facilitating communication among guild members, between guilds of different geographical localities and guilds within related fields. Thus, joint activities and programs such as celebrations, workshops, researches, policies, and common designs can be planned effectively to impact the vocations and sustain their members. The awareness of interrelatedness of the occupations would stimulate contextual re-study and professional development of members. Furthermore, this communication acts also as a medium for the exchange of information about extra-occupational arenas.

### Phaseology Plans

Phaseology Plans coordinates life phases with occupational roles, in order that a man may self-consciously program his occupational journey through life. Occupational Evaluation studies the demands of any occupation in terms of the phase style required. Phaseology Research pushes to the bottom the gifts of each of the life phases as they relate to occupational roles. Transphasal Celebrations bring to consciousness and affirms the uniqueness of each life phase within the vocational arena, and prepares people for the transitions. Life-Phase Study reprograms people's consciousness to the possibility of relating the gifts of their particular life phase to the whole scope of vocational fields, and then deciding where and when they would be best used. Visioning Workshops enables ongoing corporate projections into the future as new occupational fields emerge.

### Occupational Symbols

Occupational Symbols is designed to illuminate, bring to consciousness, and rehearse the significance and cruciality of the occupational task. Symbols Workshop enables the creation of corporate symbols which hold the occupational group before its task. Story Workshop articulates in a simple yet depth manner, through corporate writing, an occupational myth. Ritual Implementation creates and rehearses secular rituals which hold life stance and occupational role. Social Decor visually symbolizes the role and interrelationships of any occupation. Heroes Celebration lifts up the great men, their deeds and historical significance, of any occupation.

## Information Exchange

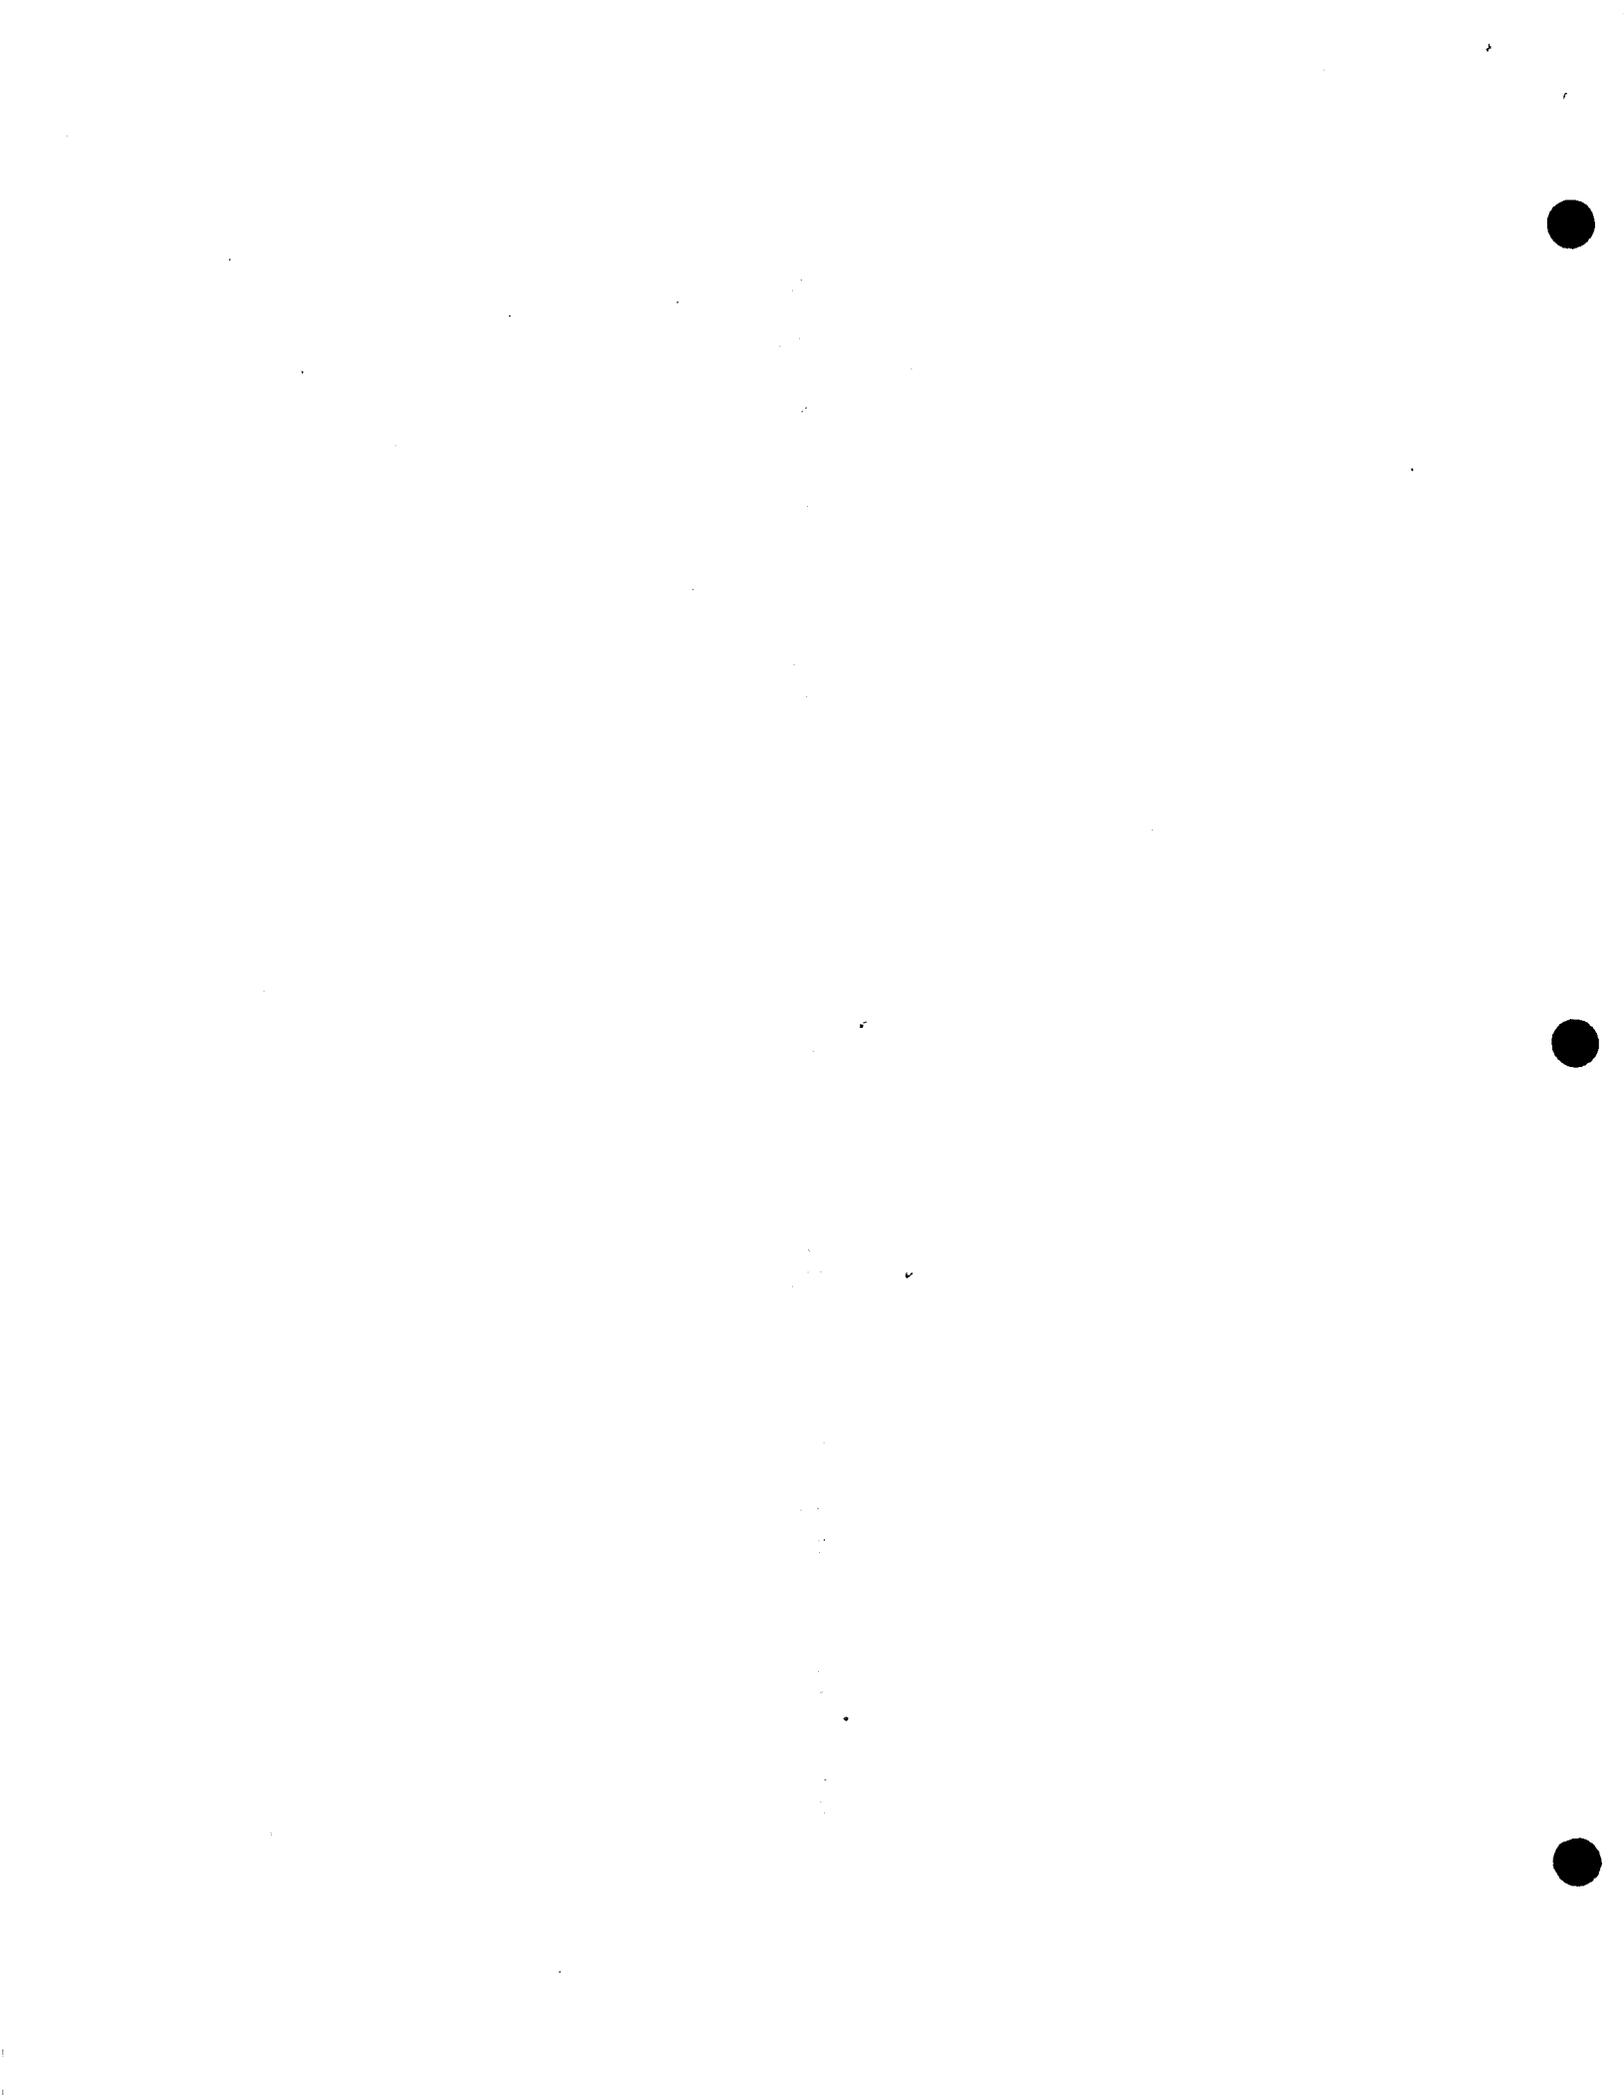

Information Exchange is designed to provide an equitable share and assessment of objective, accurate, and co-ordinated information, which is essential in creating global images, as well as an awareness of one's extra-occupational contribution to the world. Communication Set-up uses modern and rapid media such as television and cable in dissemination of information. Labor Exchange provides opportunities for labor to work in some other countries so that they can experience their relatedness in a global context. Leisure Assignment stimulates people to be more aware of the significance of their use of the leisure time in relation to their occupations. Industrial Courier insures that the information can reach people in all levels through a more personal means. Global Newsletter is a more economical, but comprehensive and detailed disseminating media.

## Contextual Re-Study

Contextual Re-study is designed to enable a comprehensive image of one's particular occupation through gathering data, updating skills, and ongoing projection of demands made upon the occupation. Study Tour is a tour of several countries, showing the techniques of a particular occupation in other countries. Corporate Methodology provides a corporate method of study to enable members of an occupational group to remain informed of new developments in their field. Input Consolidation digests all incoming information relative to a given occupation. Retooling Workshop keeps members of an occupational group up to date concerning new developments in occupational skills. Trends Thinktank makes ongoing projections concerning future demands on a particular occupation.

## Time Orchestration

Time Orchestration is designed to recreate the flow of time around activities that bring to self-consciousness the corporate task in its context of servanthood. Accountability Rituals reviews where the group stands in its corporate and individual task assignments at regular intervals. Timelined Celebrations decides the particular occasions upon which celebrations need to occur in the coming year. Corporate Luncheon provides daily opportunity for assessment of the morning's accomplishments and a new decision about one's relationship to the afternoon's task. Singing Experimentation marks the hours of the day with secular songs that articulate the ontological deeps and enable people to see the passage of the day within their total life expenditure. Secular Hours names the hours of the day so as to sustain people in their struggles with their limits and enables them to push through them for the corporate task.

## Work-Stance Observation

Work-stance observation notes the relationship men take toward their particular occupational stations, to be used as data in the creation of models for the implementation of guild structures. Personnel interviews provides a formal structure through which self-stories relative to occupation can be compiled and evaluated. Production annotation evaluates the rate of productivity of employees relative to time-study norms. Literature overview studies and evaluates the attitudinal stance embodied in a variety of in-house publications like management bulletins and union newsletters. Informal Conversations provide an informal structure through which to collect and evaluate self-stories relative to work. Inservice Observation directly observes the on-the-job style of employees.

## Methodological Studies

Methodological studies gathers data about labor regulations, contextual ethics the history of various occupations, and the purpose and structures of medieval guilds, to inform the model building for the implementation of guild structures. Periodical surveys provides information on current trends and problems in occupations in which guild structures might be implemented. Journal perusal obtains pertinent information regarding the problems and trends in various occupations through trade journals. History charting outlines the histories of medieval guilds and of the occupations in which guild structures might be implemented. Union Observation provides information on the labor relations and operates models of unions in which occupational guild structures might be implemented. Records Research discerns trends in production, profit-making, and employee absenteeism in occupations in which guild structures might be implemented.

## Goal Delineation

Goal Delineation determines goals for the implementation of guild structures by analyzing gestalts of data gathered, identifies contradictions and articulates strategies. Arena prioritization states on the basis of research, the order in which guilds might be implemented in various occupational areas. Strategy articulation lays out the overarching plan based on research for guild structures. Contradiction identification raises to consciousness possible blocks to the accomplishment of the proposed goals. Future Projection discerns and evaluates the influence which future trends will have on the long-range accomplishment of the proposed goals. Gestalt Examination sifts through the results of all the research and on the basis of this evidence, articulates the necessary goals.

## ACTIONAL GUILD FRAMEWORKS

### Occupational Style Formulation

Occupational Style Formulation is the continual re-creation of every man's style in response to the changing social context so that his style is that which is demanded by a given time and a particular situation. Through a guild structure men would be called on to intentionally formulate occupational style, recontext what it means to be in vocation, symbolize their decisions and prepare for increased occupational and geographical mobility. Continually reformulating style is the leading edge which insures that occupations do not become static and irrelevant by constantly pointing up the need for new research, new implementation models, and new nurture structures through creating and embodying new styles.

### Decisional Symbols

Decisional Symbols creates ways to ritualize decisions, establishing a decor design, creating recontexting self-stories, encouraging internal decision in manner and form of clothing symbols, and creating context exploding celebrations. Ritualized Decisions creates ways to rehearse in ritual forms the decisions of guild members to embody servanthood style in order to sustain and reinforce those decisions. Celebration Rationale creates a format for acting out the significance of one's daily labor that allows him to appropriate that as needed for the future of man. Vocational Self-Stories creates the stories and myths by which a guild member arrives at and sustains himself in his decision to be occupational expenditure. Occupational Garb selects apparel and symbols that symbolize a vocational stance of servanthood much as a nun's habit speaks about her life decision. Decor Designs selects and applies decor that reminds and sustains the worker in his decision and impacts all who see it with the significance of daily labor as radical expenditure.

### Service Assignments

Service Assignments recreates vocational style through various structures encouraging participation in particularized care of fellow workers, assignment to community service projects, creation of individual weekly time lines, week II assignments and on-going accountability for participation in these assignments. Week II Assignments creates the image that all time is assigned through actual assignments for Week II which is usually viewed as discontinuous from intentional expenditure. Individual Timelines encourages intentional use of time through intentionalizing individual decisions about time, as a means of re-imagining the possibility of radical vocational expenditure. Worker Support assigns people to particular ways of caring for fellow workers in order to encourage servanthood style. Community Care assigns people to serve in particular community need areas as a way of exploding and illustrating the possibility of radical servanthood. Task Enablement creates structures which enable a person to pick up assignments and be held accountable for them.

## Mobility Orientation

Mobility Orientation meets the increasing demand for occupational flexibility which breaks down traditional work patterns requiring radical adjustments in relating the worker to his employment and to servanthood through celebration of transfers and phasal transitions, training for a variety of occupations, counseling for those struggling with changing job roles, assigning the unemployed to creative discontinuity and transferring workers between guilds. Transition Celebration rehearses job and phase changes as significant passages from one phase and mission to another. Multi-job Training trains troops for many jobs including contexting them with the idea that every life involves many occupational phases and many types of servanthood. Style Counsel counsels individuals facing occupational role changes to enable the constant shifts demanded to keep styles relevant to particular times and situations. Assigned Unemployed assigns unemployed individuals to significant missional tasks. Inter-guild Transfers re-assigns colleagues who change jobs to the care of a guild in their new location.

## Style Research

Style Research creates the needed style through analyzing occupational uniqueness, builds an index of styles, conducts seminars on community needs, studies various styles present in history and researches probable trends. Occupation Analysis determines the unique gift of an occupation in the history-creating process thus allowing appropriation of those styles which are necessary. Style Index holds style research data in easily retrievable form. Community Seminar obtains the information on community needs required to determine the needed style and provides structures to study those needs, and structures decisions about thrust and assignments. Historical Study pulls together images of past styles and provides structures for study and evaluation of these styles in order to create new possibilities for the future. Trend Prognosis determines the trends that will demand futuristic stylistic responses by guild members and provides data about the apparent style changes demanded to insure that occupations do not become static and irrelevant.

## Style-Molding Exercises

Style-molding Exercises transforms individual style through corporate decisions to do with particular stylistic analysis of feedback on individual style impact, dialogues with colleagues on struggles experienced in adopting a style, conversations objectifying styles and methods and content for popular preaching. Style Experiments experiments with different styles to continually search out the most effective styles for a situation. Feedback Analysis gathers and sorts information which gives clarity about the impact of particular manifestations of style. Struggle Dialogues gives guild members a chance to share their struggles to be intentionally engaged thereby strengthening their resolve. Detachment Conversations objectifies life through such ways as news conversations, ultimately allowing detachment from particular engagement situations. Popular Homiletics provides training in popular preaching methodologies, and structures decisions about popular preaching content in particular situations.

## ACTIONAL GUILD FRAMEWORKS

### Permeation Models Implementation

Permeation Models Implementation is the actualization of the battle plan aimed at the alteration of the social context in which work is carried on. It implements models built on this and other tactics. This will be accomplished by assigning people to pre-selected stations in key fields relative to affecting other occupations with an affirmative life-style. This tactic will redirect occupational organizations not only by training and assignment of personnel, but also by the conversion of their attitudinal relationships to assigned work. This tactic can be reduplicated by extending the style embodiment to the grass-roots level of every conceivable occupation. Thus, this tactic will develop, implement, and evaluate models affecting an affirmative life-style enabling the individual to live creatively in any situation and embody the servanthood dynamic of his station to all levels of the human community.

### Prioritized Assignments

Prioritized Assignments is designed to delineate and strategically design the arena of action of the guild by means of comprehensive battle plans, built, actualized and evaluated by assigned guild members. Assignment Construct intentionally assigns guild members to tasks and roles to carry out the mission of the guild, and holds them accountable to their assignments. Regular Evaluation frequently reviews the results of guild work, the operating principles and objectives in order to insure future effectiveness. Needs Problemat determines the contradictions and blocks in the particular occupational arena with which the guild is concerned in order to define the task of the guild. Priority Articulation self-consciously states the key contradictions, visions, and strategies for a particular occupational field in order to delineate the specific points of engagement for the guild. Timelined Battleplan builds a concrete, practical plan for engaging guild members in impacting a particular occupation, including goals, strategies, tactics, and timelines.

### Worker Training

Worker Training is designed to impact the masses with the images necessary to engage significantly in their particular station by means of both formal courses and futuristic experimental opportunities. Curriculum Development forms relevant courses that will help the workers to see the final meaning of their job. Worker Recruitment provides opportunities for workers to come together to learn from one another, and for mutual sustenance. Experimental Workshop creates the spirit of vitality by creating new forms of training for their job. Occupational Exchange enlarges the context of workers through the organized shifts of jobs. In-service Training gives opportunities to workers to acquire more pertinent skills while they are working.

## Intentionalized Relationships

Intentionalized Relationships is designed to coordinate demonstration of the new worker style in everyday employment relationships. Structured Conversation accomplishes Intentionalized Relationships by providing various kinds of dialogue in relation to work, assignments, and spirit. Informal Contacts accomplishes Intentionalized Relationships by enabling frequent use of known persons and associates in communication. Occupational Ties accomplishes Intentionalized Relationships by building relationships with members of that occupation. Strategic Objectives accomplishes Intentionalized Relationships by establishing goals and discussing the meaning of job. Popular Preaching accomplishes Intentionalized Relationships by enabling on-the-spot spirit nurture in midst of personal crisis or illusionary escape.

## Servanthood Roles

Servanthood Roles is designed to define and provide concrete opportunities for the worker to engage in local and global service and responsibility. Community Services accomplishes Servanthood Roles by defining the manner in which the common worker serves the community. Global Involvement accomplishes Servanthood Roles by allowing the local man to assume greater responsibility for serving all mankind. Role Articulation accomplishes Servanthood Roles by showing local man his obligations to the world in a more understandable way. Future Projection accomplishes Servanthood Roles by incurring better relations between employer and common man by promoting awareness of job assignments and effective completion of assignments. Story Dissemination accomplishes Servanthood Roles by spreading the story of how workers can participate in local communities.

## Spirit Implosion

Spirit Implosion is designed to inject motivating and humanizing spirit into everyday work situations for grassroots local man. Leadership Alliance accomplishes Spirit Implosion by building affirmative relationships with those people concerned with the mental health and attitude of their workers. Morale Analyses accomplishes Spirit Implosion by providing data on attitudes of workers and discerning the nature of their depth contradictions. Care Implementation accomplishes Spirit Implosion by redirecting existing occupational care structures to insure that personnel policies and practices are humanly oriented. Symbol Redirection accomplishes Spirit Implosion by redirecting, intentionalizing, and humanizing occupational decor, music, rituals and celebrations. Guru Development accomplishes Spirit Implosion by training and orienting workers, foremen, and supervisors to care for the depth needs of workers.

## SOCIAL INVOLVEMENT CONSTRUCTS

Social Involvement Constructs is a master tactical component intended to develop covenanted vocation on the part of every man through the thrust of signal colleagues in target communities, characterized by catalytic servanthood style, symbolic intent, corporate polity network and training and assignment structures.

The first identifying characteristic of the master tactical component is the Local Catalytic Servant who functions within the framework of missional vocation. His participation in community is globally orientated, futuristic, and comprehensive. He participates most effectively at the critical points in the local community as a strategic planner in the establishment of signal projects. This involves selection of key symbols, questions and strategies to create community consciousness and to hold such groups accountable to community needs and aspirations. Through his use of gridding, problemating, and model building he embodies the pedagogy dynamic and is a constant trainee of his fellow citizens.

The second identifying characteristic of the master tactical intent is The Intentional Symbolism. It is designed to nurture the individual, as part of a corporate group, by moving with him step-by-step through his life, constantly impregnating him with reminders of man's common story. Ritualized behavior, including rites of passage and celebrations, the use of jargonized language affording continuous conversational reinforcement, and missional symbols provide a constantly expanding sensory range of possibilities; i.e. music, decor, gestures, dance. The intentional use of the symbolic within a mythological context, historically or newly created, provides the means for internalization of mankind's common story.

The third identifying characteristic of the master tactical intent is the Corporate Polity which structures grassroots participation in global responsibility. The identifying characteristic is specifically ordering structures within the localis of engagement. Corporate life is initiated, maintained and renewed through policy setting models such as community forums which act as vehicles for researching local needs, utilizing workshop methods, and training in consensus decision-making methods. A data exchange for the collection and evaluation of information provides a global context for decision making. Assignment/accountability structures hold all of society accountable to the consensed polity, putting each man under assignment to the world and holding him responsible for that assignment by his community.

The fourth identifying characteristic of the master tactical intent is a Comprehensive Training and Assignment Rationale which would prioritize targets for impact and determine the skills and talents necessary to meet the particular needs of target situations. Scheduling of events, taking into account the results to be accomplished relative to expenditure of troops, skills and resources would be facilitated through the use of long range time lines and pert charts which would assure orderly planned progression of all phases of the thrust. Exemplar training in imaginal methods, cultural grounding and style, tactical operations and strategic recruitment provides the skills and develops a spirit of dynamic engagement for personnel receiving global assignment.

## SOCIAL INVOLVEMENT CONSTRUCTS

### Demonstrated Vocational Recovery

Demonstrated Vocational Recovery places signal people in the community to bring all men to the self-conscious understanding of covenantal vocation in the context of global responsibility. The goal is to remotivate others by allowing them to see the possibilities in their own lives. This would involve demonstrating a re-motivated community in many capacities while embodying an understanding of life as being expenditure on behalf of all. They would indirectly be a sign for others by being observable, and would be a sign in more direct ways by creatively enabling others to see their own possibilities for acting within a vocational thrust. This group would utilize symbols of their vocational stance, use reduplicable methods for constructively responding to community situations and participate in assignment structures in the process of demonstrating their vocational recovery.

### Nuclei Formulation

Nuclei Formulation provides signal covenantal people with a global style in the community through a grouping grid, needs identification, covenant restoration, troop recruitment, and vocational vision. Groupings Grid locates and identifies the various vocational and occupational groupings in the community. Needs Identification locates and identifies the immediate and long-range needs of a community giving focus to the mission of vocational nuclei. Covenant Restoration recovers the stories of covenantal responsibility for society. Troop Recruitment enlists the manpower for the units working through a particular vocation or occupation. Vocational Vision enables the articulation of the new social vision within the context of particular vocational thrusts.

### Ongoing Training

Ongoing Training encourages vocational stance and promotes vocational understanding through audio-visual media, discussions and forums, workshop participation, week-end courses, and guild inter-action. Audio-visual media reimages and/or trains the community vocationally by way of closed circuit television T.V. spots, radio and other media forms. Guild Interaction enables the interaction of various vocational guilds to exchange resources and information. Week-end Courses provides intensive training to provide tools and motivity for vocational participation. Workshop Participation fosters an individual's vocational understanding through active participation in workshop procedures with others of similar vocation. Discussion Forums initiate and promote responsible assumption of a vocational stance, by means of public meetings, lectures, and discussions.

## Permeation Engagement

Permeation Engagement enables the penetration of corporate signal groups into all areas of community life through the particularized assignment of group members, prioritized targets, provocative conversations, plenary reporting, and vocational counselling. Assignment Rationale coordinates the intentional assignment of members of the covenanted group to effect penetration in particularized areas. Prioritize Targets enables the order to concentrate effort into particular arenas, taking into account the personnel available in the covenanted group. Provocative Conversation allows man to be self-conscious about questions he is asking himself and about questions other people are asking him in relation to radical vocational recovery. Plenary Report recaptures the story of man's past actions and keeps him present to everyday happenings as he tells the story of his vocation. Vocational Consultation allows man to articulate life as it is in his vocation, enabling him to raise questions about his vision relative to his vocation, and enabling him to organize his life data in the midst of creating history.

## Spirit Care

Spirit Care intentionalizes the rehearsal of man's accountability of his vocational decision, daily collegium, and vocational mythology, ritual, symbol, and celebration. Vocational Mythology recovers and recreates stories of the particular vocation of the corporate body. Daily Collegium contexts the corporate daily stance and provides the necessary accountability structure. Vocational Rituals reminds man of the continuing vocational demands placed on him as relates to the global world. Vocational Symbols release the power of the secular-religious symbol, e.g., the iron man, to hold man before his vocational decision. Vocational Celebrations motivate the individual to creating and celebrating his vocational decision.

## Corporate Stance

Corporate Stance impacts the community with a corporate image of intentional expenditure by making use of time designs, vocational decor, transitional language, short course commonality, and covenantal accountability. Time Design holds local man and the corporate body accountable for chronological and kairotic time. Vocational Decor reminds spirit man of his responsibility to God for the world through his vocational engagement. Transitional Language bridges the gap between the local colloquialism and the spirit jargon of the Other World. Short-Course Commonality contexts each day through topics of the thrust. Covenantal Accountability holds spirit man up against his assigned task and vocational decision.

## SOCIAL INVOLVEMENT CONSTRUCTS

### Reduplicable Method Utilization

Reduplicable Method Utilization impacts a community with a method style designed to enhance man's participation in model building by giving him confidence in trusting and articulating his insights and intuition as part of a more effective vocational involvement. Such externalized model-building methods as problem-solving units, think tanks, gestalting, gridding, and charting enable individuals and groups to develop a sense of competence in confronting issues. The dissemination of personalized model-building constructs, such as spirit spinning, corporate care, ritualizing, and new religious mode methodologies provide man with the interior motivity and resolve necessary to engage in the externalized methods. Developing and effectively communicating these methods requires implementing a set of techniques, such as seminars, lecture, shortcoursing, art forms, and imaginal education.

### Indirect Implantation

Indirect Implantation utilizes structured yet subtle methods that enable local man to see the need for and possibilities of serving mankind through covenantal groups. Imaginal Education creates methodologies that indirectly teach and motivate imaginal education short courses, humor, and creative child care structures. Transparent Action refers to subtle, intentional societal engagement; influencing local community organization through participation in leadership roles and suggesting program topics. Symbolic Visuals calls for visual stimulus that tell a story or serve as reminders such as intentional room decor, dress and jewelry. Subtle Happenings structures events or actions that raise issues or tell a story through the singing of movement songs, and intentional celebrations. Sensory Stimulus refers to those intentional objects that evoke desired images through sensory stimulation such as incense and candles.

### Direct Impaction

Direct Impaction, raises man's consciousness to an awareness of his possibility in history through the use of resources, saturation, task orientation and imaginal process. Saturation Process structures it's action to impact the economy in the areas of advertising and merchandising; provides data bank of impaction resources, that is, speakers, consultants, tapes, films and printed materials. Task-oriented Processes uses problem-solving seminars, think tanks and other model-building methods to train and develop a sense of competence. Informal Processes, such as coffee parties, beer gardens and myth and letter writing sessions, subtly implant methods for engagement. Imaginal Processes motivate creative participation in society through imaginal education classes, art forms classes and child care structures.

## External Application

External Application is the application of one set of methods which include thought articulation, problem solving methodologies, group inter-action techniques, and reflective evaluation. Problem-solving Methodologies enable man to arrive at solutions to local problems through training methods which include gridding, think tanks, and gestalting. Thought Articulation provides opportunities for the message of the myth to be created and shared through poetry and music. Group Interaction develops the dynamics of speaking and listening as activities essential to group participation and planning. Mind Expansion provides opportunities for analysis and creative thinking through conversation. Reflective Evaluation encourages group process through analysis and reflection.

## Spirit Sustenance

Spirit Sustenance allows man to enable his neighbor and himself to be ever self-conscious of the facticity of his ideology and its ongoing dynamics. Corporate Rehearsals come in the form of group methodology to serve as reminders of the Christ story, i.e., worship, canonical hours, celebrations, watches, fasts and balls. Solitary Trekking is the individual meditative journey intentionalized through the use of the New Religious Mode charts and the Scriptures. Space Creation is the creative use of visual images to transform the existing space with altars, incense, candles, rood screens and montages. Writing Expenditure is appropriating existing inspiring printed materials through risking oneself in writing personal experiences from the other world chart, myth, prayer and legend writing. Continual Rituals is constant rehearsal of the stance of possibility through the ritual.

## Strategic Assessment

Strategic Assessment is necessary to determine locations for the use of both and indirect utilization methods, analysis of the community that utilization may be strategic, categorizing of methods that the most effective may be used, continual self-evaluation and feedback in order to enable effective communication. Strategic Reconnaissance engages one in the data gathering process relative to community organizations and groupings including research analysis and evaluation. Battle Panning calls for decision of concrete steps and would include strategic planning for model creation and categorization, and discerning assignment methods. Individual Sensitivity makes possible the comprehension of body movement, facial expressions, and gestures as well as the sensitivity to where a group is. Self-evaluation must pay attention to all significant data in weighing and analyzing intentional self-consciousness and the repeating of effective methods. Effective Communication necessitates the development of lucid communication about the methods and within the methods being employed.

## SOCIAL INVOLVEMENT CONSTRUCTS

### Covenantal Assignment Structure

Covenantal Assignment Structures will establish a rationale and provide methods for assignment of a covenanted group who self-consciously hold themselves accountable to the community's needs as the basis for the group consensus. This tactic is out to ground a core of self-conscious people who would image themselves as a sign of renewal to their community of new vocational engagement and as reimagining all time as assigned, thereby releasing the necessary troops for the reformulation of the local community. Covenantal Assignment Structures relates to Demonstrated Vocational Recovery by serving as a symbolic presence as a sign to the community of what is necessary to vocational recovery. This tactic provides assignment structures that can be reduplicated. It is dependent on Empowering Symbols to relate the global context for responsible action on behalf of all men.

### Corporate Commitment

Corporate Commitment creates a covenanted community which would meet regularly, use consensus methodology and would hold each member accountable to the group. Covenant Rehearsal intends to hold the community before its decision. Meeting Timeline intends to hold the group to regularly scheduled meetings. Consensus Methodology intends to enable corporate decision-making. Covenant Model intends to have the group articulate a covenant for itself and provide a model of covenants for other groups. Accountability Structure intends to hold the group to its task through ritualizing the intention of the group toward its task.

### Practical Enablement

Practical Enablement enables regular meetings and to carry out assignments through the coordination of training model, common time design, recruitment model, practics assignments and financial enablement. Training Model intends to provide the necessary skills to enable effective corporate meetings. Common Time-Design intends to provide for each member of the community the available time of each of its members. Recruitment Model intends to bring in a constant flow of new people. Practics Assignment intends to free members of the community for meetings and engagement by providing child care and transportation. Financial Enablement intends to corporately deal with the possible financial demands of special social engagement.

## Symbolic Life

Symbolic life is the ritualization and celebration of engagement in life through such things as spirit songs, decor and accountability/absolution rituals in order to hold man present to the global context and the awe in every life situation. Global Signs intends to objectify the global context through common decor, Ur symbols and intentional conversations. Ritualized Engagement intends to ritualize the assignments, and the acceptance of those assignments, for mission. Celebrate Engagement intends to raise to self-consciousness the decision to embrace all of life as a gift. Accountability/Absolution intends to involve local man in these rituals in order for him to be aware of local/global needs. Symbol Language intends to use verbal and visual forms to hold before the community the thrust of the covenant.

## Engagement Research

Engagement Research delineates the area of engagement, illuminates and holds the needs and gaps of the community, identifies the skills, talents, and opportunities available, and creates an action model. Local/Global Grid intends to delineate the geographical arena of engagement. Local/Global Problem intends to illuminate the needs of the community. Survey Opportunities intends to locate the most strategic places for engagement. Identify Talents intends to locate all the existing skills of the community. Action Model intends to delineate the arenas of engagement in relationship to research data.

## Assignment Procedures

Assignment Procedures would structure all time as assigned. Where specific assignments would be made for an intentional project, these would be made on a weekly, quarterly and/or yearly basis. An assignment rationale would include a vocation chart which would hold before the group the comprehensive scope of their gifts that would be available for assignment according to community needs. Assignment Rationale intends to assign the troops in a logical manner to the tasks which must be done, holding in mind the priority of getting the tasks finished and the need of each individual for his journey. Vocational Chart intends to allow each individual to articulate the gifts and abilities he has to offer to history and to be radically aware that by putting these on the chart he stands ready to have those used on behalf of all. Week I/Week II Assignments intends to gain the maximum use of available time in missional engagement. Intentional Projects intends to assure the completion of missional goals through corporate and individual assignments. Long-Range Timeline intends to provide the prospective of long-range goals, the stimulus of daily, weekly, and monthly deadlines, and stand as a symbol of all time belonging to mission.

## SOCIAL INVOLVEMENT CONSTRUCTS

### Intentionally Empowering Symbols

Intentionally Empowering Symbols is the transcendent reality that grounds service in both the sacred and the global experience of man. The two most crucial functions of the Intentional Empowering Symbols are external visibility and internal sustenance. Within the guild, the symbol enables the accountability of each servant, thereby re-enforcing each member's mission and allowing him to rehearse regularly his self-understanding and his decision to rebuild the earth. Thus equipped, the guild is empowered and energized to move into the work, continually celebrating its completion. Relating to the other four tactics, it helps to recover, redefine and renew the meaning of vocation. It stands as a constant reminder of the covenantal relationship. In recovering the power of symbol, people also recover their past, their capacity of symbol creation, and their essential understanding of community.

### Ritual Usage

Ritual Usage is intended to intentionally empower symbols through life-phase celebrations, sustaining decisionality, enacting accountability, focusing expenditure and impacting society. Celebrating Life-Phases intends to allow man to significantly rehearse his own self-story in relation to the globe. Sustaining Decisionality intends to remind man through rituals of his covenanted relationship with other men. Focus Expenditure intends to channel energy in decisive directions for optimal effectiveness through corporate, imaginal, chastity-enabling enactments. Enact Accountability intends to structure occasions for individuals actually and symbolically to report to the corporate body as to their faithfulness to the covenant. Impact Society intends to direct enactments of corporate bodies to the larger community in order to occasion alteration of consciousness.

### Embodied Servanthood

Embodied Servanthood intends to facilitate the appropriation of an intentional "on behalf of" stance thru the use of assignment ritual, servanthood story, corporate covenant, world guild, and family symbol. Assignment Ritual intends to hold the individual before the indicative of being constantly under assignment by the corporate body. Servanthood Story intends to create the self-story of the vocated man who expends his life on behalf of the world. Corporate Covenant intends to embody and rehearse the understanding of the commitment to servanthood style. World Grid intends to convey imaginally the global missional imperative. Family Symbol intends to enable the family to assume the global missional stance.

## Symbol Guild

Symbol Guild intends to enable training in use and creation of secular symbols. Symbol Rehearsal intends to dramatize life expenditure through daily use of rituals. Verbal Symbols intends to create new verbal symbols that rehearse the decision to be vocational servanthood. Contextualized Symbols intends to re-empower symbols that have lost meaning by creating lectures and short courses. Symbol Conversation intends to regain the power of symbol through art form conversations. Symbol Workshop intends to regain the power of symbol through enabling the creation of a symbol.

## External Visibility

External Visibility is designed to bring to consciousness the secondary symbols man stands before that remind him of his primary symbols that relate him to all of life. Display Posters intends to force man to view life the way it is, and not the way he wants it. Worship Centers is designed to give man a place of contemplating that is mobile and changeable, and a symbolic display that holds the mystery of life. Ur Decor intends to visually remind man of the inter-relations and gifts of all men. Symbolic Garb is designed to display symbols through intentional dress, or display of jewelry that hold vocation, ur, individual or family symbols. Display Timeline intends to make man realize he has a future in his hands and that he plans it.

## Symbology Recovery

Symbology Recovery refers to the necessity of local man's experiencing his own capacity to create and respond to the symbolic dimension of life. Symbology Research intends to research the vast existing mytho-poetic resources which have empowered other men in other times and places. Mytho-Poetic Accentuation intends to bombard the target forcing and enabling them to appropriate the power of symbols. Story Sharing intends to expose the target group to those who have themselves experienced the power of symbols. Impact Experience intends to expose the target group first-hand to the powerful and transforming effects of tactically utilized symbology. Physical Participation intends to push the individual to new consciousness by such acts as fasting, watches, and dances.

## SOCIAL INVOLVEMENT CONSTRUCTS

### Structured Global Interchange

Structured Global Interchange is the catalytic inter-relationship of the various ongoing forms of corporate actualization of servanthood through deliberate dynamics. These deliberative inter-relationship dynamics would consist of interchange of data on societal needs and methods, organizational models, training models, rotation of personnel on an assignment basis, and exchange of techniques and tools found to be effective. The tactic will enable servanthood to operate out of a common comprehensive context utilizing the wisdom and tools of all the globe, to foster strategic effectiveness, internal corporate spirit and visible demonstrations of global possibility. Structured global interchange holds the other tactics of this component before the global context and vehicle through which vocational recovery is demonstrated, it is the channel for the circulation of reduplicable methods; it is the means for actualizing covenantal assignment structures, and it serves to reinforce and broaden the influence of intentional empowering symbols.

### Assignment Rationale

Assignment Rationale refers to the deliberate assignment of spirit colleagues to situations which will reveal and emphasize the power of covenantal engagement on behalf of society, choosing with care the target situations, the gifts of those to be assigned relative to the particular needs of the target situations, and the long-range results necessary over the entire world society. Long-range Time Lines is the scheduling of events and taking into account the results to be accomplished in a specific situation with the necessary expenditure, available troops, skills and resources needed. Key Businesses points to the businesses to target in on to achieve the optimum desired results. PERT Charts means the orderly planned progression of all phases of a specific activity to attain the required results on time. Rotating Assignments is the means by which people would be routinely reassigned in and out of positions of responsibility in order to get the necessary deed done. Accountability Structures means introducing into secular engagement the freeing dynamic of accountability/absolution which permits total engagement, freedom to risk totally without being trapped by guilt.

### Circulation Net

Circulation Net involves the necessary structures to insure that continued exchange of data and personnel can take place efficiently. Vocation Guilds is that through which a group of people can decide corporately to provide necessary community needs. Computerized Information obtains co-ordinated data to inform the covenantal body. Language Translation is that through which global information can be shared. Global Reports allows the continual exchange of information to spread to all networks. Communication System is that through which the circulation of all information can be globally received.

## Symbol Saturation

Symbol Saturation strategically impacts the community with audio and visual art forms and advertising gimmicks which will present the possibilities of actual global occupational interchange to local man. Advertising Gimmicks, such as bumper stickers and postage stamps, will develop the awareness of vocational globality. Selective Advertisement deals with the placement of visual and audio symbols in employment offices where strategic audiences are impacted. Intercultural Art Forms such as music, Ur art objects, and films widen the individual experiences of global culture at the local level. International Occupational Symbols through appropriation of existing trademarks or the development of new ones will enable the spread of a common sign through large groups and over wide areas of the globe. Local/Global Symbols will be created and placed to call every man to the consciousness of his global citizenship.

## Research Exchange

Research Exchange is the communicating and using of data from various research bodies throughout the globe. Planning Centrum is the intensive model building dynamic which creates the research rationale, pulls together all information and constantly re-evaluates the research needs and accomplishments. International Corporations will reveal possible arenas for permeation through interchange of occupations. Geo-occupational Grid determines the key areas for interchange and generally the occupations involved (medicine, business, technology). Available Skills delineates specifically the occupational skills within selected business and service. Existing Exchange locates and permeates the existing structures where global interchange is going on.

## Exemplar Training

Exemplar Training provides adequate grounding and necessary skills for personnel who will receive global assignments. Imaginal Methods give the exemplar tools to bring forth total involvement from participants in, for example, workshops and consensing decisions. Cultural Grounding focuses the specific styles and wisdom of a particular society so that it can be entered with familiarity. Strategic Recruitment is an ongoing process which finds and commits the necessary persons for involvement and training. Servant-hood Style demonstrates the spirit attitudes of detachment and engagement in daily time schedules and budget priorities. Tactical Operations suggest the order and priority of initial actions in order to establish the exemplar in a community.

MASTER TACTICAL COMPONENT #6  
LOCAL REFORMULATION MACHINERY

Local Reformulation Machinery is a master tactical component intended to enable relevant action at the local level through encouraging structural participation characterized by tactical action methodologies, facilitated comprehensive participation, visionary catalytic core and covenantal consensus accountability.

The first identifying characteristic of this master tactical component is Tactical Action Methodologies. This has to do with emphasizing the participation of all individuals--both within their own organization and in the community as a whole, through problem-solving workshops and meetings, always tied to common consensus. Enabling tactics are also necessary to encourage relevant gridding methods for establishing guidelines which reflect priorities consensed on by the community. Also, in order to enable course presentation particular models and methods are needed, such as recruitment and facility models, curriculum resources and adequate equipment for conducting such presentations.

The second identifying characteristic of this master tactical component is Facilitated Comprehensive Participation. This involves encouraging every local citizen to engage effectively in all the world's decisions. This would include opening up commitment through some form of local community sharing; speaking out on issues; using communication media to encourage local man's participation; building structures which make participation possible; and researching community problems in order to gain objective data on issues. The Centrum also would encourage grassroots decisions through publicizing time and place of neighborhood caucuses for making community decisions as part of a local-regional-national-global decision-making complex.

The third identifying characteristic of this master tactical component is Visionary Catalytic Core. This dynamic serves to provide direction to the common thrust of the community by insuring comprehensive planning and enactment. An integral dimension of this dynamic is the involvement of local man in leadership as it manifests itself in the overall coordination function. Therefore, local people would be incorporated into this coordinating administrative role. This dynamic also ensures that the decisions and models created in the community will be coordinated so they do not conflict and will be evaluated to see if they are effective or need to be changed.

The fourth identifying characteristic of this master tactical component is Covenantal Consensus Accountability. The covenant accountability holds the existing community structures responsible for carrying out the consensus of local man. It would also hold individuals up against their decisions to embody the style of those structures. An example would be the teacher who is covenanted and accountable to his teachers' guild and the guild which is in turn accountable to the school system. The self-consciousness of covenant and accountability encourages the maintenance of a dynamic rather than static relationship between the social structures and the general populace.

## LOCAL REFORMULATION MACHINERY

### Community Situation Analysis

The tactic Community Situation Analysis is a research action which collects and analyzes data to enable individuals to effectively engage in their community structures. Data is assimilated from the arena of the economic, such as prices of goods, marketing practices, and wage structures. Investigations are made in the arena of local politics to include school boards, corporate organizations, and public meeting practices. Community cultural trends are identified and heritage information is gathered. Then analysis is made to expose blocks to effective engagement and to identify the resources availability to overcome these blocks. The resultant material from the community situation analysis would be articulated and disseminated by Public Concerns Communication action. Background data, such as available educational resources, would be made available for use by the Motivational Learning Opportunities action. The analysis would provide statistics for use by Equitable Services Access action. The heritage, community self-image, and cultural trend data and analysis results would be information for use by the Corporate Symbolic Identity.

### Environment Reservoirs

Environment Reservoirs is concerned with the quality of the environment in which the citizens must live--that is, the conservation and development of parks and recreational areas, the zoning regulations and considerations, the industrial use of ecological measures, as well as the general maintenance and esthetic beauty of the community. Industrial Ecology is the research of the local industry ecological measures concerning noise, water, and air pollution. Parks Recreation is the research of the state of the parks and recreational areas of the community bringing to light possible areas of development, improvement, and conservation. Node Determination is a study of node locations to enable the community to decide what attracts the citizens as well as what improvements could be made to enhance them. Community Maintenance is a study of the effectiveness of structures for rubbish collection, street maintenance, lighting location and maintenance. The research of Zoning Priorities within the community would help in determining the needs and desires of the residents, and would enable the future decisions as to how zoning could be changed or developed.

### Cultural Images

Cultural Images is researching the rituals, symbols, and images of the community as a whole, its ethnic and phasal groups, and arts and religions. Researching of Religious Rituals and symbols of various types of religions would reveal the differences and similarities, as well as attitudes, enabling them to effectively interact. Research on Community Self-image would clarify the way the community envisions its role and significance in the world, and the way it envisions the role of the individual within it. The study of Ethnic Heritage would reveal the various imaginal gifts that made the community what it is and how it was created, so that the traditions of different sectors of the community could be appropriated. Research of the Expressionistic Arts would reveal the attitudes, abilities, and potential of the community as interpreted through the liturgy, dance, music, theatre, and visual arts. Analysis of Phasal Symbolology points to the means employed by age groups to symbolize their positions and involvement in the community.

## Community Services

Community Services is a complete analysis of every existing community arena, such as service groups and agencies, shopping center development, financial and resource aids, and evaluation of the gifts of all age phases to make them significant. Research on Core Rejuvenation would illuminate the possibilities for making available better services for the core, along with recreate new self-images of community pride. Research on Volunteer Agencies within the community would call to attention the areas of service being carried out and their availability, as well as the positive and negative aspects of these agencies. Crisis Agencies is research in evaluating the emergency needs within the community, such as hospitals and mental care centers. Research on Government Grants would make the community aware of the assistance, financial and technical, to them. Phase Utilization is rediscovering the talents, wisdom, and vision of all age groups and thus facilitating the existing structures.

## Education System

A study of the condition and facilities of the Educational System would evaluate the adequacy of school distribution and facilities, adult education, and decisional procedures in order to make certain the community educational needs are met. School Grids would be studied in order to determine the adequacy of distribution, size, and quality of school facilities, to enable equal educational opportunity for all citizens. The communities current resources and future educational needs along with possible alternative models would be researched for Youth/Adult Curriculum. The School-board Polity would be investigated to determine whether the wishes of the people and needs of the community are considered and used in the decision-making process, and how much power the school board wields in relation to its stated function. Faculty Patterns need to be researched to discover the faculty/student ratio, the faculty/racial balance and the effectiveness and qualifications of each teacher. Library Facilities should be studied to see if they meet the needs of all learning possibilities and what areas need to be improved.

## Polity Forces

To gather data from Polity Forces within the community, significant meetings are monitored, forms and identities of the community leadership are sensed, influence of the various polity structure elements are measured, platform positions of key leaders are identified, and laws and ordinances of the community are investigated. A Meeting Monitor attends significant community meetings in order to obtain the interests, opinions, and mandates of these groups. The elements of the community Leadership Structures are identified and interrelationships determined to gain data necessary for effective engagement. The influence of the various key leaders within the community on the decision-making process is calculated to discover the critical pressure points for effective community decisions. The positions on critical issues and past decisional records of various organizations and key individuals are found in Platform Identification so that support for engagement programs can be determined. The legal institutions and local laws are researched in Legal Investigation to insure they are honored and change those unjust or outmoded.

## LOCAL REFORMULATION MACHINERY

### Public Concerns Communication

Public Concerns Communications is using a variety of media, drama and events to disseminate data informing the citizens of a community about public issues. This tactic relates to Community Situation Analysis by first bringing an awareness and consciousness to citizens to identify with the concerns involved and second, creating an interest and impetus for researching by the local citizens, delving deeper into the community problems. Also, there is a relationship with Motivational Learning Opportunities in that an informed, concerned public citizen will want to learn more as to how he can most effectively engage in improving the world around him. One accomplishment of this tactic will be more intentional involvement in existing structures in which local man participates, being self-conscious to human needs and the possibilities of future action regarding them.

### Circulation Methods

Circulation Methods intends to disseminate information through publicity flashes and issue conversation designs delivered to the public via human data chains and door-to-door delivery. Vignette Publicity informs the community of crucial issues and coming events through miniature composites of information such as sky writing or imaginal graphics. Intentional Ham channels local data from the community outward via amateur radio contacts. Personalized Delivery brings crucial printed information such as leaflets and fliers to homes and street corners via dissemination routes assigned to community members and especially to youth. Occupational Data-vines provide human circuits through which intentionally selected information may be conveyed to individuals in all community institutions. Conversation Constructs build common memory on issues in an entire community by mailing weekly conversation formats for specific issues to all homes.

### Spiritized Practics

Spiritized Practics is intended to provide the structures and administration to run the Public Concern Communications tactic smoothly and to see that all priorities in the timeline are completed by introducing wonder into its mundane tasks. Staff Rituals intends to inject into the mundanity of office life a fresh spirit through daily office rituals. Publications Minutemen is intended to perform all the menial tasks without which nothing moves forward. Decor Equipment is intended to remove the mundanity imposed by office furniture and equipment by creating wonder decor to spiritize the workmen. Symbolic Timelines is intended to provide a scheduled period of work to insure task completion without a last minute dash for the finish line. Prioritized Needs sets up a list of tasks to be done in order of their importance in order that the most critical needs are met first.

## Collection Arena

Collection Arena intends to provide the community with an information storage point through accountable participation in profile interviews, humanness stories, and geo-social reports with gathering made by phasal monitors or persons of all ages. Profiled Interviews intends to enhance communications by providing written articles featuring recognized or invisible individuals who have made personal contributions of noteworthy activity to the area. Humanness Stories compiles authentic narratives for publication to illuminate the possibility of every man's life through neighborhood experiences. Phasal Monitors intends to involve intentional clusters of persons, divided by age, to evaluate radio news and T.V. programs, holding the media accountable for various types of information. Community Ear provides current information for publication and offers a medium for "small-talk" to honor neighborhood lifes' events and individuals. Geo-social Reports is intended to compile comprehensive news items related to the community priorities of the Local Reformulation Machinery in order to develop a sense of global identity.

## Personal Contact

Personal Contact intentionalizes the process of one-to-one communication through the transestablishment in order to create a consensus for the model within the missional goal. Informed Board-movers sends intentional informed citizens to the board of directors of any organization for the purpose of shifting their goals to include the concerns of local man. Team Presentation sends out groups or teams to determine what the public concerns are. Informal Dialogues uses the one-to-one relationship in an informal setting. Citizens Forums holds an open community meeting to discuss relevant issues so the grassroots man to find consensus on his goals and programs. Leaders' Guild opens public concerns to a guild of community leaders from all over the globe, including community volunteers and governmental workers in all branches and levels of government.

## Communications Media

Communications Media is intended to bring heritage grounding and stimulate issue consensus and engagement to members of a community via T.V., radio, film, and the printed word. Heritage Publications intends to impact all people with the gifts and cultural heritage of the six major Urs of the world as well as appreciation for local heritage. Dramatized Issues is the announcing and portrayal of community issue through the media of plays, skits and role-playing. Newspaper Commentaries is the intentional placement of editorials and articles to create consensus on a particular model. Citizen TV-Radio-logues is intended to communicate all sides of public issues through the method of group dialogue presentations. Intentional Films is out to permeate the imagination of the community with a globalized interior montage.

## LOCAL REFORMULATION MACHINERY

### Motivational Learning Opportunities

The primary tactic of Motivational Learning Opportunities changes a person's self-image from that of an un-involved victim without community or possibility to a life stance of commitment and involvement in meeting the needs of community. This tactic would be seen in provision of courses, distribution of resources, demonstrations of participation, utilization of media and socially contexting public participation. It has a primary function in relation to the other first level tactics of motivating, recruiting and training people for carrying out the other tactics.

### Course Provisions

Course Provisions ascertains what courses best motivate individuals to pick up their lives and provides these courses on a regular schedule or a need dictated basis.

Imaginal Curriculum determines courses to be taught that will meet the needs of the individuals in their particular situations in the community.

Facility Models stipulates the physical requirements for conducting courses and workshops.

Occupational Training makes training in various skills and trades available. Curriculum Resources provides all resource materials and equipment needed to conduct courses and workshops.

Varied Workshops or series of workshops set up as needed to solve particular problems.

### Resources Channels

Resources Channels is the release to organizations and individuals of printed, personal and experiential motivational aids.

Needs/resources Models are printed structures which clarify and present the needs and resource of a particular geo-social area.

Gridding Methodology is methodology or guidelines which could be used by organizations and individuals to picture the consensed priorities, needs, and resources in a certain area.

Discussion Stimulators are bibliographies, audio-visuals lists and reviews, TV program previews and discussion guides for those resources.

Speakers Recommendations are biographies, competence evaluation, costs and topic preferences of speakers available to a given area.

Impaction Tours is intentionally planned corporate trips designed to present new experiences of a particular location.

## Participation Demonstration

Participation Demonstration intends to create a permission giving image of possibility for the public that releases people to engage in the community through selecting, recruiting, and supporting key people and organizations to portray responsible participation in their communities.

Leaders Contacts is asking group leaders to be involved in community projects.

Institutions Involvement is expanding the roles of existing institutions in in community services as an example of servanthood.

Recruitment Models is persistantly and systematically contacting and asking community people to engage themselves in community activities.

Personal Portrayal is securing people to demonstrate their participation and responsibility through selected community activities.

Grassroots Campaigns is encouraging and supporting local community leaders to run for public service positions.

## Media Utilization

Media Utilization is intended to effectively captivate an extensive audience through regular, intensive and systematic audio-visual and graphic means in a block freeing context which stretches the parochial-uninvolved mindset and thus move people toward an active, responsible approach to community and global needs.

Impactful Advertisement is out to broaden shallow isolated mindsets through imaginal material, graphically illustrated fly sheets and music which short courses man's freedom of decision and responsibility.

TV Courses which appear regularly and are intricately designed and would utilize regular TV programs or use the existing schedule to recontext the viewing.

Talk Shows would provide a wide array of subjects and speakers who would through their style expose methods and tools and the art forms as a means to both reveal potential, and responsibly equip him to actualize what he sees as demanded by history.

Newspaper Education makes use of editorials, special columns, articles, and letters to the editor to communicate the local situation.

Community Movies involves the use of community and commercial produced films as education method.

## Public Contexting

Public Contexting utilizes media in various contexts to excite the people to commit themselves to serving the needs of their community on behalf of all as they are enabled to see the new possibilities for their lives.

Special Events intends to context people at formal presentations such as graduations regarding the needs of the community/nation/world.

Invited Talks are given to various groups or organizations to context them relative to their commitment to servicing the needs of community/nation/world.

Informal Socializing is a means of recontexting in a less structured environment.

Direct Contact would occur through contacting key people on a one to one basis and laying out the possibilities for their life expenditure in that community.

Special Courses expand the context of one's responsibility in particular arenas, such as business, education, and social work.

## LOCAL REFORMULATION MACHINERY

### Equitable Service Access

The Equitable Service Access would exist for the overall function of accountability. Knowing that basic services are unevenly distributed and not equally accessible across the globe, the service would operate to guarantee access and inform people as to what is available. It would also have a broad enough scope of public services that it could coordinate and suggest particular controls relative to availability. It's services would be further enhanced by the Community Situational Analysis tactic in that it's response to needs could be based on the analysis of the community. The Public Concerns Communications serve to make known resources and services. Those concerned with public services could work through the Motivational Training Opportunities tactic for further information and training. The Corporate Symbolic Identity tactic in relationship to the service operates to tie the community together in concern for the services to be equitable and accessible.

### Polity Pressure

Polity Pressure is designed to call attention to those services which are inequitable and inaccessible at the local level by initiating consensus from local men and creating avenues for his participation in redirecting the trend. Public Protest is a method used by a community to focus attention on those arenas of dissatisfaction where the application of pressure will effect change. Open Forums is a structure which provides a community the opportunity to exchange ideas in arenas of community concern and register complaints relative to community services. Lobby Groups is a method that can be used to apply pressure on key parties to effect change. Petition Circulation is an effective method used to gain support from the community by obtaining signatures relative to an issue of community concern. Public Boycott, as a creative demonstration of consumer spending power in a community, is an effective way of applying pressure.

### Information Integration

Information Integration is for the purpose of gathering all available community analysis data to mesh, sift and focus for the sake of seeing unobvious relationships, immediately pinning down problem areas and making future projections. Model Building creates models and realistic projections from the process of sifting and integrating the data gathered from community analysis. A comprehensive, descriptive Service Directory comes out of realizing the complexity of many communities and the imperative to locate particular services. Populace Analysis considers social and ethnic relations to determine where the service distribution is being unobviously determined by social backgrounds. Data Analysis refines and sifts available data relative to the community in order to focus in on particular service concerns. Problem Identification pinpoints and identifies problems on a grid or problems chart in order to have an overall and particular picture of community needs.

## Services Actualization

Services Actualization provides assurance of balance in meeting public needs through comprehensive structures. Assured Equitability is out to oversee the total dissemination and quality of services rendered. Financial Balance evaluates the economic costs and resources to require the community to make sure its plans are realistic. Effectiveness Statistics would be helpful in the determining of whether or not services are actually dealing with community problems and needs by measuring effectiveness over against objective criteria. Needs Criteria would determine the difference between authentic need and personal complaint. Advanced Planning would be necessary in order to make realistic priority listings.

## Supplementary Services

Supplementary Services assures equitable service access by coordinating regularly offered services with supplementary services which would fill particular needs, assuring availability of needed services for all men. Emergency Models locates and organizes special aid in crisis situations such as public disaster or unexpected individual need; this could include emergency flood control or ambulance service. Ongoing Assistance provides supplementary services to areas and individuals who fall outside the services of regular community structures. Located Monitors would coordinate and maintain lists of competent advisory services in order to assure availability to all. Request Registry would be the dynamic of the enablement centrum which would listen to special requests of individuals, evaluate their particular needs and route them to the appropriate structure. Crisis Prevention would assure planning in advance to avoid emergencies through anticipating and preparing for crisis.

## Accountability Network

Accountability Network assures equitable service access across the community by making people aware of possibilities and putting reasonable consensed upon controls on service resources and on the population using them. Citizens Network is the co-ordination of access to decision making and accountability by having citizens responsible for particular tasks with a network of assignments and accountability designed in such a way that a telephone call could do the job assignment making and accountability. Follow-up Process provides accountability for the consensed upon decisions, and also accountability for demands made upon various services. Written Regulation is a written statement which holds profit and service oriented groups before their goals in such a way that they would be self-conscious of their goals. Cooperative Services interrelates all services in such a way that each service's goals are known to the other. Resource Control provides coordination of services to insure the best use of those services for the benefit of all.

## LOCAL REFORMULATION MACHINERY

### Corporate Symbolic Identity

The tactic of Corporate Symbolic Identity opens up a variety of celebrative styles within the community. It aims at creating a sense of identity by relating the individual to his society and to the globe through a wide range of symbols and sustaining that relationship by the creation of a new corporate myth and a nurture structure. A sense of local context with a comprehensive engagement perspective would prevent the development of parochialism. Celebrations and corporate activities such as a street fair or a block work day would further a new understanding of what it means to be a community servant. The creation of a symbolic identity would hold the comprehensive in the midst of specific engagement tactics. The sense of corporate symbol would embody the community's future thrust.

### Symbol Creation

Symbol Creation would allow local man to directly participate in designing images that speak to his corporate community identity. Signified Passage furthers awareness of the unique gifts and significance of each life phase, through such activities as an elementary-age children's drama group, or elder participation in community history writing. Community Stories is the creation of a new self-story for grounding the community in relation to the global society, weaving together both past heritage and future vision. Particularized Rituals is the dynamic for creation and continual rehearsal of comprehensively contexted local rituals and rites, through such activities as workshops and guilds. Song Composers engages informal groups, workshops and guilds in writing words to existing music or original lyrics so that the total community could rehearse its corporate identity through song. Embodied Identity refers to the designing of a common community symbol and motto that would incorporate the identity of the community and the globe.

### Symbol Guardians

The Symbol Guardians refers to activities which would insure comprehensive symbols that would enable the community to see its uniqueness and its inter-relatedness with the globe. Enabled Resources is the locating of manpower and materials, and gathering community views in order that symbol creation be carried out. Missional Nurture is the grounding of care for the world through care for individuals within the community, through such dynamics as intra-family visitations, a community pantry, and emergency slush funds. Community Refurbishment upgrades the corporate self-image by such activities as painting walls, fences and garbage cans as signal symbols of community pride. Signal Celebrations is the planning and carrying out of celebrations that would corporately engage the community in recognizing its being as a local and global significance. Comprehensive Symbolology guards the authentic relationship of the community symbol in a realistically grounded, internally consistent symbol system.

## Cultural Accelerators

Cultural Accelerators acts as an informational research and storage house, and imaginal distribution agent for the components of the corporate symbolic identity. Local Arts points to focal centers designed to involve all ages in the experiences of image and symbol creation manifest in such activities as global art classes and sidewalk painting. Heritage Documents meets the necessity of every human settlement by gathering local historical data in order that the past may be cherished and utilized. Symbol Storehouse is a tactic to provide local man with history long and world-wide collection of symbols which will inform his consciousness while he creates symbols for his own situation. Dramatic Myths publicly acts out stories of humanness in order to provide a corporate celebration and rehearsal of the deeps of life. Ritual Collections are resources available to the community that will illuminate the role of rituals in all human societies and therefore inform the creation of new rituals for post-modern man.

## Folk Happenings

Folk Happenings is intended to involve the total community directly in creating corporate symbolic identity through events that appropriate community history and the gifts of all the people. Historical Visits is designed to recover the community's heritage by visiting local historical sites, community elders and treasure chests of the past. Passage Rites is designed to corporately celebrate journeys of families and individuals in the community. Symbol Experiments is designed to involve citizens in creating and sharing community symbols through activities such as sidewalk painting and art contests. Businessman's Ecclesiola is designed to expand the context of occupationally related groups to world-wide view through news-conversation lunches. International Meals is designed to help citizens appropriate gifts of all Urs through community meal festivals, Ur cookbooks, and weekly designated family nights and group nights to eat Ur meals.

## Visual Impacts

Visual Impacts is a tactic designed to beam images to the masses communicating global images, historical grounding, and destinal roles which release consciousness of their corporate identity so that they might move toward community engagement as global citizens. Intentional Billboards captures strategically located billboards to depict global identity images to every citizen, through large montages or impressionistic paintings portraying slogans. Global Displays is the tactical activity of placing responsible globalized decor in public places such as parks and lamp posts, as well as permeating private businesses with rotating global displays reflective of various cultural gifts. Historical Markers serves as a visual reminder of a common heritage, thus helping to ground the community in its corporate identity. The Wall Mural tactic is a symbolic reminder of a common history or experience, thereby creating community destinal role awareness. Expressive Garb involves the wearing of symbolic articles and different cultural clothing publicly, thereby awakening global awareness in the viewer.

## MASTER TACTICAL COMPONENT # 7

### PRACTICAL RESEARCH NETWORKS

Practical Research Network is a master tactical component intended to facilitate the exchange of data and the creation of authentic consensus at the grass-roots level through relevant practical forms for research characterized by myth enablement systems, inclusive data systems, data organizing indices, and practical applications coordination.

The first identifying characteristic of this master tactical component is a Myth Enablement System. This would support and enable the myth dynamic by providing tutorial aides, models, and current computerized data to every part of the globe. A concrete example of this would be providing current human experience data allowing local man to translate his relationship to the external situation of his world to his inner being. By changing language response patterns, the data system would allow man to speak about the depth human experiences which are his life.

The second identifying characteristic of this master tactical component is an Inclusive Data System. Through the utilization of data banks, assimilation and dissemination centers as well as multi-media, this data system will generate an exchange of local/global and trans-cultural wisdom in all languages, thereby making accessible that data to every man. Such a system, for example, could well facilitate the collection and communication of the common story.

The third identifying characteristic of this master tactical component is a Data Organizing System. This index pioneers research, interprets data, and projects the future. Pioneering research includes planning edge research, gathering supportive data, and editing research results. Interpreting of data involves organizing the data into relevant priorities for application to primary polity issues. With the data in this form the organizing index illuminates the projection of future trends. Technical sophistication will insure the effectiveness of these functions.

The fourth identifying characteristic of the master tactical component is Practical Applications Coordination. The creation of signal projects requires the coordination of collective wisdom which would interlink globally the accessible application of the data. Breakthroughs will be published to allow the data to be used in practical applications. This implies a coordinating body of disciplined research experts who have covenanted their time and their obedience to launch and project this new experiment in mythology. It also requires that they give field support to the demonstration projects.

## PRACTICAL RESEARCH NETWORKS

### Data Compilation System

Data Compilation System is a collecting and organizing system for the input and retrieval of computerized global data. Parts of this system include international analysis, random questionnaires, abstracting information from reports and studies, and on-going media scans. As an international chain of storage centers, the system provides an initial gestalt of data/knowledge. through the Data Compilation System, storage and availability of raw data is vastly facilitated. Through course evaluations and the use of social sciences, this system ascertains the tone of spirit of given segments of society. The historical preservation of society is protected in the world memory, honoring cross-disciplinary and cross-cultural knowledge and wisdom.

### Data Collection

Data Collection facilitates the flow of data into the system through information collection stations, global census and surveys, media scans, as well as oral interviews. Oral Interviews will seek out, assemble and file transcribed, recorded and filmed interviews and all dialogue of relevance to future history. Field Surveys will spot surveys anywhere on the globe in any field of inquiry at any time. Collecting Stations will be set up and be available to all, the function of which will be the assembly of local statistics, e.g. mood information. International Census will comprehensively collect the information from all stations and utilize forms to the global populace to arrive at accurate global statistical information. Media Scans will broadcast and publish media relevant to future history.

### Data Storage

Data Storage provides consistent rational imaginal gestalt of the information through a research index, statistics bureau, central library, globalized cybernetics, and inter-linguistic codification. Research Index is an internationally adaptable indexing method that will facilitate the filing and availability of global research data. Statistical Bureaus will base and provide survey and analysis teams for various census projects. A Central Library linked to a library network will assure the accessibility of books, films, recordings, and microfilms as well as study areas to all men. Globalized Cybernetics will computerize and gestalt statistical data rendering it accessible and understandable. Inter-Lingual Codification is a method for analyzing diverse languages in order to arrive at common meanings in translation and begin to create one language world-wide.

## Data Retrieval

Data Retrieval extracts data from the system in an easily understood form through data abstracts, output terminals, holding forms, interdisciplinary nexus, and cross-reference recall. Data Abstracts assigns coded identity to every data unit of comprehensive outlining, for cross-reference purposes and recall facilitation. Output Terminal strategically locates computer service outlets so that data recall is facilitated for all people at all times. Holding Forms standardizes the form for accumulation and programming data entry. Interdisciplinary Nexus creates the data pool strategic to all the basic disciplines as a means of readying complementary information to any research undertaken. Cross-reference System assigns data into related topical categories so that recall of data under one topic shall provide the researcher with other helpful data in the related field.

## Statistical Projection

Statistical Projection anticipates future global needs and trends by soliciting world-wide participation and prediction of demographic investment, resources style, and political trends. Demographic Trends charts and projects population growth and concentration shifts throughout the world. Investment Trends charts data concerning how much investment is made and in what fields investments are made. Resource Trends projects future data concerning the availability and use of the world's natural resources and the development of ecology. Style Trends deals with the quality of life as it relates to leisure time, consumer demands and other cultural styles through data received internationally. Political Trends intends to forecast the nature of governmental structures as it effects global cities.

## Process Development

Process Development will improve and expand the technology of information sciences through sampling method, network expansion, sensors development, equipment application and techniques evaluation. Expanding Network assures that compiling and dissemination methods are flexible and responsive to diverse conditions such as information volume shifts and population diversity changes. Sampling Methods will be available on short notice to conduct surveys on any part of the globe utilizing such tools as interviews, information cards, and statistical analysis. Sensors Development will be movable within a given area and will have the capacity to immediately detect critical information. Technique Education discerns, analyzes, and assures the constant improvement of exacting compilation systems. Equipment Application relates to the correct use of existing equipment relative to its correct arena, over mindful of broadening the scope of possible application.

## PRACTICAL RESEARCH NETWORKS

### Wisdom Development Refinery

Wisdom Development Refinery is the ideological valuing, social myth renewing, future trend visioning, formulating and applicability testing of raw data. It allows the crucial data needed for responsible participation in society to be made available to everyman. This tactic is the refinery in Wisdom Research Interchange. It refines raw data from the Data Compilation System and formulates it. The practical wisdom of the refinery is channeled by System Coordination Centrum into Multi-Channel Dissemination. Local Research Network provides the final practical test of the soundness of the wisdom. Further, Wisdom Development Refinery provides the basis for the direction of the entire Wisdom Research Interchange process, decided upon by System Coordination Centrum.

### Ideological Screen

Ideological Screen establishes a filter through which all data can be seen as relevant to the underlying global ideology. Needs Synthesis analyzes compiled data to meet the needs of the people. Data Screen organizes received data into a usable form that elucidates the ideology represented. Value Model holds the different cultures and their values within the data received. Bias Catalogue ascertains the prejudices that may come out of the compiled data that is received. Societal Grids provides a means by which data can be expressed in the context of each individual society.

### Mythological Framework

Mythological Framework recovers past cultural symbols and myths as well as to constantly create new ones in order to express forcefully yet simply the wisdom of every man today. Mythological Language articulates wisdom through metaphors, illustrations, and poetry that will intensify man's consciousness of his real experiences. Symbol Projection utilizes symbols that have both power and simplicity so as to directly impact a specific audience. Cultural Heritage recovers the myths, symbols, and language of human wisdom. Myth Research forges new myths that will hold modern man's wisdom. Effective Language articulates wisdom in direct and concrete words rather than abstract jargon.

## Futuric Visioning

Future Visioning projects and anticipates the future research needs through stating edge issues in order of their priorities, gapping to initiate new arenas, and using think tanks to project future trends and demands. Issue Priorities recommends a particular ordering of current societal concerns for further research. Research Arenas determines and names areas of research which need further study. Futuric Gapping utilizes informed intuition to move beyond hard data into authentic creativity, relative to problem solving. Methods Development creates methodologies to enable futuric visioning. Think Tank provides a structure for gathering the ideas of many people into specific research tasks.

## Data Analysis

Data Analysis categorizes and edits the gathered data into useable knowledge relative to specific needs and issues. Data Organization pulls together data relevant to a particular issue through the analytical method of brainstorming. Holding Forms are grids for imaginably organizing data in order to reveal the internal relationships within the data. Information Editing pulls gestalted data through the ideological and mythological screens in order to determine what knowledge is usable and important for local man to understand on any specific issue. Data Inter-relation reveals how a specific issue fits in with the rest of the data/research interchange. Gestalt Categories pulls together the brainstorm data into a specified number of categories in order to gain a better grasp of what is in the category.

## Wisdom Articulation

Wisdom Articulation takes new and old insights and forms of human knowledge that are understandable by the specific audiences to which they are intended. Application Testing provides a measure for judging whether or not the available information is applicable to the matter under review. Digest Writing distills data and thus provides ease of access and a handle to the mass of data from which the distillation was derived. Useable Forms puts data into constructs that can be readily understood and utilized. Common Vocabulary permits the wisdom to be transmitted easily from one culture to another. Colloquial Language provides wisdom in locally common forms and jargon that any person in a particular community will understand.

## PRACTICAL RESEARCH NETWORKS

### Local Research Network

Local Research Network will provide a coordinated network of collegial researchers in key locations. These locations or nodes will be accessible to local man so that he can at all times, either as an individual or group, comprehensive data and wisdom through the node. The node will be a discretely visible part of his local community. It will be designed to initiate, coordinate and sustain research on the local level in harmony with a global design. Local political and social structures will be permeated and made aware of the research network and its functions by recruiting local personnel for involvement in research units. The global design of the local network will facilitate the sharing of grassroots research data with the entire network through the accessibility hookup. The relation of the local research network to the other tactics of Wisdom Research Interchange is to provide grounding interchange and enable local researchers with technical skills to carry out their globally demanded task.

### Node Coordination

Node Coordination intends to oversee the activities of recruitment training, nurturing of forces and maintaining the link to every local man while at the same time directing the activity at the local node in accordance with the needs of a coordinating centrum. Office Maintenance intends to insure that staff is available at a specific location in order to facilitate the function of the node. Community Sign intends to symbolize visually the existence of the local link to a global research net. Unit Coordination intends to provide the managerial dynamic that is necessary to ensure productive, comprehensive research. Nurture Structure intends to sustain interest and involvement of the research participants through discontinuous activities. Participant File keeps accurate records of the particular research gifts and experience of available members of the local community.

### Recruitment Design

Recruitment Design intends to recruit both the forces necessary for further training for research and also to recruit the cooperation of those in the established and fringe structures. Fringe Contribution is to reach the marginally motivated people and elicit their involvement in the research network. Speaking Engagements is to reach large numbers of people at minimum recruitment expenditure through existing structures. Imaginal Presentations is to impact the total population of a community with the visible images of participation. Community Mailout is intended to provide a method of informing the entire community of research possibilities and soliciting mass participation. Visitation Model is to systematically recruit researchers through planned personal visits which offer the vision and possibilities of long-term research participation.

## Design Training

Design Training intends to train the forces in methods needed in local research and coordination. Methods Courses is to provide lectures on various methods of research. Field Practice intends to enable local man to engage productively in various methods of practical research. Work-Study Program is to create a set of constructs for reflecting on the practice of research methods that can be employed following any research procedure. Social Application is to introduce the research methods into community organizations and thereby train research leadership. Methods Exchange is to provide a construct for acquiring proficiency in the latest methodological breakthroughs in research.

## Research Units

Research Units intends to provide structural research methods through which local communities or groups have the possibility of drawing together their intuitions and wisdom about a particular arena or problem and producing a plan or action to deal with it. Short-Term Research pulls out the insights of local man through concentrated short-term research. Extended Research provides research units utilizing the insights and abilities of various types of people over extended periods of time. Research Replication is to purify research by reduplicating research procedures on specific data as it is assigned across the local research network. Practicality Valencing is to methodologically prioritize data being studied. Application Procedures will enable the use of completed research within the community and across the global network.

## Accessibility Hook-Up

Accessibility Hook-up intends to institute the necessary channels through which local man's research results or raw data can be forwarded to a research compilation center and through which local man can receive necessary data. Citizen Employment is to initiate a system for accessibility to all node information that any local community member can employ. Open House is to provide regular lecture and discussions for the release of breakthroughs and insights, particularly relevant to local issues. Information Inventory is to develop and maintain an updated file of all data and wisdom contained within the local compilation system. Telecomputer Network is to establish the electronic transfer channel with a world-wide network so that instant dissemination and collection is a reality. Institutional Listings is to maintain a globally comprehensive up-to-date file of educational and research institutions and to collate the results of their research.

## PRACTICAL RESEARCH NETWORKS

### System Coordinating Centrum

The main function of the System Coordination Centrum is to act as the sensitive and responsive dynamic by coordinating the actions within the global research network. The sensing function, although deeply inherent in all the centrum's activity, is best seen in the monitoring of the system. This is the big ear, the filed finger tips, or the sponge activity which absorbs what is being done and pushes back concrete methods of continuance out of the context of the total picture. As research needs are seen, priorities are established and futuristic plans are set for implementation. Policy decisions are then made by the policy board as to how and where the research will be channeled. Assignment of personnel is coordinated with tasks, and edge research is initiated where needed. An evaluation system will provide the means whereby the centrum can collect the research data, determine its completeness and comprehensiveness, and thus redirect its use into the ongoing process. The centrum sends out "orders of the day" which reflect the methods necessary for optimum use of the data in the overall purpose of the project.

### Priorities Establishment

Priorities Establishment is the area which discerns the needs, and takes into account underlying presuppositions, financial resources, and future trends in forging the basic outlines for research. Ideological Maintenance maintains ideological presuppositions as the foundation for establishing priorities. Need Discernment enables the needs of the particular local context to be paramount in establishing priorities. Projected Results enables consideration of consequences of planned actions in establishing priorities. Financial Resources provides for recognition of the costs and materials needed and to clarify the limits in establishing priorities. Future Trends develops clarity on changing sociological conditions for the discernment of needs and the use of resources in establishing priorities.

### Program Determination

Program Determination is the area which discerns the trends of what research needs to be initiated, determines tasks within the system, and issues policy statements. Name Function elucidates the categories of enablement, coordination, leadership, and planning. Research Initiation identifies and begins particular lines of research needed to catalyze the determination of program. Comprehensive Screen insures that all relevant data is considered. Research Continuance determines what factors, conditions, resources, time expenditure and personnel are needed to continue particular lines of research. Long Range Follow-up evaluates the continuing effects of tactical actions through an extended period of time upon the processes, models and presuppositions of program determination.

## Monitor System

Monitor System is the area which provides momentum for research by assuring that policy is coordinated and maintain the direction, provides the measures to take care of breakdown in the system, and distributes personnel according to the systems needs. Trouble Shooting provides trained problem solvers to local research units as system bugs appear. Personnel Distribution assigns research personnel rationally according to task needs--as the net becomes a covenantal reality. Accountability Systems informs the centrum of concrete data from the global net to reveal the walls walked through and the foes still awaiting. Sensory Procedures surveys the operations of the system in order to provide the policy board to be totally aware of all activity, predict future victories and defeats and relate to the mood of the net. Mobile Forces transmits data and questions between the local forces and the centrum as a communications channel.

## Methods Coordination

Methods Coordination is the battleplanning dynamic of the net. It charts the journey, articulates the proper methods and coordinates the time and task pattern. Spirit Trek provides the mythological sustenance which will deepen awareness of the corporate journey into the unknown. Methods Experimentation allows the creative development of new methodological procedures which allows testing of a complex of methods for applicability. Methods Criteria screens the available known methods and then to link them up with the research developmental process. Format Orchestration suggests the corporate style of creativity as expressed in its writing forms, procedures and product. Timing Plans provides the concrete screen for accountability to the centrum on a long-range and quarterly basis in order to discern the movemental progress.

## Policy Board

Policy Board is the area which takes all the research done, decides its relationship to which needs to happen, and designs the process by which the next steps are accomplished. Daily Orders delineates the concrete steps necessary to complete intended actions and research efforts. System Evaluation provides detachment upon current operational procedures through examination of their effectiveness to achieve articulated goals. Task Distribution disperses assignments according to the task requirements of the system during a specified time period. Policy Communication provides the rules of the game to the local forces through system interchange media. Perpetual Prior is the anchor in the midst of the storm, the bearer of all wisdom and the guru dynamic of the net.

## PRACTICAL RESEARCH NETWORKS

### Multi-Channel Dissemination Program

Multi-Channel Dissemination Program takes data that has been compiled and distributes it to every man. This tactic will enable every man to have a broader base on which to make decisions because of his access to multiple sources of wisdom. Multi-channel dissemination program is the carrier of the wisdom researched and gathered to wherever the need arises in the globe.

### Editorial Desk

Editorial Desk transforms concepts to basic hard copy and oversees the quality and production of the entire function. Policy Application assures that basic criteria of the Wisdom Research Interchange is honored in the dissemination process. Concept Interpretation produces the initial hard copy in the process of creating the media called for by the interchange. Assignment Rationale is designed to comprehensively work out personnel and resource utilization. Practics Coordination enables all the specific functions to operate adequately and on an integrated time scheme. Quality Enforcement upholds the technical standards of the products.

### Media Bureau

Media Bureau modifies and applies basic copy to the various media appropriate to dissemination need. Variety Catalog maintains a comprehensive listing and analysis of media forms and outlets. Needs Application determines the appropriate media types and mix in relationship to the stated need for data. Target Analysis determines the appropriate media outlets in relationship to the audience. Evaluation Feedback involves a mechanism whereby the public reaction can be heard and evaluated. Copy Modification recasts initial hard copy into forms appropriate to respective media.

### Design Studio

Design Studio creates the master copies and models for the various media output. Imaginal Arts applies imaginal education criteria as an overlay to the other design arts to insure clarity of rational aim, effectiveness of existential bite, and grounding in humanness. Graphic Arts apply these techniques and skills to the effective visual presentation of wisdom in the form of printing, posters, and films. Recording Arts apply these techniques and skills to the effective audio presentation of wisdom in the forms of records, tapes, films, etc. Dramatic Arts apply these skills to the story presentation of wisdom ranging from songs to full theater productions. Copywrite Staff prepares the prose and script material.

### Production Shop

Production Shop performs the massive replication of media output. Print Shop reduplicates all printed material for distribution. Art Shop reproduces the models designed by graphic arts for mass distribution. Properties Shop produces and assembles all the materials necessary for the production of specific broadcasts and events. Photo Shop reproduces movies and photographs for distribution. Sound Shop mass produces the audio tools such as tapes, records, etc. for distribution to the dissemination media.

### Placement Agency

Placement Agency coordinates and enables the scheduling, circulating, and staging of dissemination of various media outputs. Circulation Files is the master address list for massive dissemination of printed materials and subscriber services for special program dissemination (i.e. tape-a-month, training manuals, etc.) Broadcast Programming places advertising and programming with radio and television broadcasters. Copy Publication places advertising and articles in newspapers and magazines. Staging Teams manage the arranging, setting up and promoting of events such as meetings, speaking and presentation tours, parades, fairs, etc. Shipping Office packages and dispenses all materials.
