<p>Life is a good partner offering us capacities we need</p> <p>Life Gives us a world rich in potential</p> <p>Life gives us “order for free” capable of organizing itself with inner coherence.</p> <p>Life gives us unending, incessant creativity eager to create newness..</p> <p>We have rebuffed the planet- instead of partnering</p> <p>We’ve taken over assuming we know best.</p>			<p>Power of possibilities. Inspire us to the impossible. RFK-“Some look at things the way they are, and ask why? I Dream of things that never were, and ask why not?”</p> <p>Forces of destruction have taken over from forces of creation.</p> <p>We want reasons, the causes and conditions that have led us so far from home.</p> <p>. Not a random universe— Everything comes from somewhere. There are good scientific reasons for how we got to be. Life creates change through its well-known processes.</p>		<p>Need to be reacquainted with our planet.</p> <p>Life’s dynamics interacted with human will to create this life destroying mess.</p> <p>Without discernment we act from blind hope, not from clear seeing.</p> <p>We push on believing with greater effort, more passion, and better networking, we will force the world to change for the better</p> <p>We are exhausted because we are struggling to accomplish what can never be accomplished. And then blaming ourselves and each other for our failures.</p>			<p>Use three of ;life’s most transforming dynamics to illuminate how we got to this dark reality.</p> <p>Must use science to explain why these destructive cycles arose and why they cannot be stopped.</p> <p>Purpose is not to add to our despair.</p> <p>Intention is to increase our clarity so we might discern wise action.</p> <p>Can’t change the way the world is, but by opening to the world as it is, we can discover how to be warriors for the human spirit.</p>
